

Sacramento Regional Transit District Agenda

COMBINED SPECIAL MEETING OF THE RETIREMENT BOARDS FOR THE EMPLOYEES AND RETIREES OF THE SACRAMENTO REGIONAL TRANSIT DISTRICT

9:00 A.M., WEDNESDAY, MARCH 11, 2020

REGIONAL TRANSIT AUDITORIUM

1400 29TH STREET, SACRAMENTO, CALIFORNIA

Website Address: www.sacrt.com

(29th St. Light Rail Station/Bus 38, 67, 68)

MEETING NOTE: *This is a joint and concurrent meeting of the five independent Retirement Boards for the pension plans for the employees and retirees of the Sacramento Regional Transit District. This single, combined agenda designates which items will be subject to action by which board(s). Members of each board may be present for the other boards' discussions and actions, except during individual closed sessions.*

ROLL CALL

ATU Retirement Board:	Directors: Li, Kennedy, Niz, McGee Lee Alternates: Jennings, Land
IBEW Retirement Board:	Directors: Li, Kennedy, Ohlson, Bibbs Alternates: Jennings, McCleskey
AEA Retirement Board:	Directors: Li, Kennedy, Devorak, McGoldrick Alternates: Jennings, Santhanakrishnan
AFSCME Retirement Board:	Directors: Li, Kennedy, Guimond, Thompson Alternates: Jennings, Salva
MCEG Retirement Board:	Directors: Li, Kennedy, Ham, Norman Alternates: Jennings, Flores

PUBLIC ADDRESSES BOARD ON MATTERS ON CONSENT AND MATTERS NOT ON THE AGENDA

At this time the public may address the Retirement Board(s) on subject matters pertaining to Retirement Board business listed on the Consent Calendar, any Closed Sessions or items not listed on the agenda. Remarks may be limited to 3 minutes subject to the discretion of the Common Chair. Members of the public wishing to address one or more of the Boards may submit a "Public Comment Speaker Card" to the Assistant Secretary. While the Retirement Boards encourage your comments, State law prevents the Boards from discussing items that are not set forth on this meeting agenda. The Boards and staff take your comments very seriously and, if appropriate, will follow up on them.

REPORTS, IDEAS AND COMMUNICATIONS

ADJOURN

NOTICE TO THE PUBLIC

It is the policy of the Boards of Directors of the Sacramento Regional Transit District Retirement Plans to encourage participation in the meetings of the Boards of Directors. At each open meeting, members of the public shall be provided with an opportunity to directly address the Board on items of interest to the public that are within the subject matter jurisdiction of the Boards.

This agenda may be amended up to 72 hours prior to the meeting being held. An agenda, in final form, is located by the front door of Regional Transit's building at 1400 – 29th Street and posted to SacRT's website at www.sacrt.com.

Any person(s) requiring accessible formats of the agenda or assisted listening devices/sign language interpreters should contact the Human Resources Pension and Retiree Services Administrator at 916-556-0296 or TDD 916/483-4327 at least 72 business hours in advance of the Board Meeting.

Copies of staff reports or other written documentation relating to each item of business referred to on the agenda are on file with the Human Resources Administrative Technician at 916-556-0298 and/or Clerk to the Board of Directors of the Sacramento Regional Transit District and are available for public inspection at 1400 29th Street, Sacramento, CA. Any person who has questions concerning any agenda item may call the Human Resources Administrative Technician of Sacramento Regional Transit District to make inquiry.

**Sacramento Regional Transit District
Combined Retirement Board Meeting
Wednesday, December 11, 2019
MEETING SUMMARY**

ROLL CALL

This meeting was held as a common meeting of the Sacramento Regional Transit District Retirement Boards for employees of the AEA, MCEG, ATU and IBEW. The Sacramento Regional Transit District Retirement Boards for employees of AFSCME was unable to meet due to lack of a quorum.

MCEG

The Retirement Board was brought to order at 9:04 a.m. A quorum was present comprised as follows: Directors Li, Norman and Alternate Flores were present. Director Kennedy, Director Ham and Alternate Jennings were absent.

This meeting was held as a common meeting of the Sacramento Regional Transit District Retirement Boards for employees of the AEA, MCEG, ATU and IBEW. The Sacramento Regional Transit District Retirement Boards for employees of AFSCME was unable to meet due to lack of a quorum.

By MCEG Resolution No. 18-12-203 for calendar year 2019, Common Vice Chair Li presided over this Retirement Board meeting.

PUBLIC ADDRESSES BOARD ON MATTERS NOT ON THE AGENDA

None.

CONSENT CALENDAR

- 2. Motion: Receive and File Administrative Reports for the Quarter Ended September 30, 2019 for the Salaried Pension Plan (AEA/AFSCME/MCEG). (Adelman)
- 11. Motion: Receive and File Update on Staff Roles and Responsibilities Related to Pension Administration (ALL) (Weekly)
- 11. Motion: Receive and File Update on Staff Roles and Responsibilities Related to Pension Administration (ALL) (Weekly)
- 11. Motion: Receive and File Update on Staff Roles and Responsibilities Related to Pension Administration (ALL) (Weekly)

9. Motion: Approving the Minutes for the September 11, 2019 Quarterly Retirement Board Meeting (MCEG). (Weekly)
10. Motion: Receive and File Administrative Reports for the Quarter Ended September 30, 2019 for the Salaried Pension Plan (AEA/AFSCME/MCEG). (Adelman)
11. Motion: Receive and File Update on Staff Roles and Responsibilities Related to Pension Administration (ALL) (Weekly)

Director Norman moved to adopt MCEG Retirement Board Items 9, 10 and 11. Alternate Flores seconded the motion. Items 9, 10 and 11 were carried unanimously by roll call vote: Ayes: Directors Li, Norman and Alternate Flores. Noes: None.

NEW BUSINESS

12. Information: Investment Performance Review by Atlanta Capital for the ATU, IBEW and Salaried Employee Retirement Funds for the Domestic Small Cap Equity Asset Class for the Quarter Ended September 30, 2019 (ALL). (Adelman)

Jamie Adelman introduced Michael Jaje with Atlanta Capital who provided the investment performance review for the Domestic Small Cap Equity Asset Class for the Quarter Ended September 30, 2019 and was available for questions.

13. Information: Investment Performance Review of the S&P 500 Index and MSCI EAFE Funds by State Street Global Advisors (SSgA) for the ATU, IBEW and Salaried Employee Retirement Funds for the Quarter Ended September 30, 2019 (ALL). (Adelman)

Jamie Adelman introduced Christy Nemethy with State Street, who provided the investment performance review for the S&P 500 Index and MSCI EAFE Funds by State Street Global Advisors (SSgA) for the Quarter Ended September 30, 2019 and was available for questions.

14. Motion: Receive and File Investment Performance Results for the ATU, IBEW and Salaried Employee Retirement Plans for Quarter Ended September 30, 2019 (ALL). (Adelman)

Jamie Adelman introduced Anne Heaphy with Callan LLC, who provided the investment performance results for the Quarter Ended September 30, 2019 and was available for questions.

Ms. Adelman noted that, in the preceding quarter, the total portfolio for the three Retirement Plan funds exceeded \$300 million for the first time.

MCEG

Director Norman moved to adopt item 14. Alternate Flores seconded the motion. Item 14 was carried unanimously by roll call vote. Ayes: Directors Li, Norman and Alternate Flores. Noes: None.

15. Information: Emerging Markets Analysis and Review of Dimensional Fund Advisors (DFA) Investment Manager Performance (ALL). (Adelman)

Jamie Adelman introduced Anne Heaphy and Ho Hwang with Callan LLC, who reviewed Callan's presentation on Emerging Markets Analysis and Review of Dimensional Fund Advisors (DFA) investment manager performance and were available for questions.

Ms. Heaphy noted that DFA is very broadly diversified and holds approximately 4,700 stocks. In response to a question from AEA Retirement Board Alternate McGoldrick on whether that is a large number of stocks to monitor, Mr. Hwang responded that DFA's three-factor selection model allows the firm to monitor that number of stocks. Mr. Hwang reported that DFA had recently made changes to enhance its investment process, including, in October 2019, elimination of the 17.5% country cap for its emerging markets strategies.

Ms. Adelman asked whether Callan viewed that change as a positive move, and still considered DFA to be a good manager.

Mr. Hwang responded that, as a standalone manager, DFA is an optimal solution because: 1) it provides broad exposure in the asset class and 2) the tracking error of the strategy is around 2% in the range of performance. Despite the recent changes DFA has made in its investment process, especially the removal of the country cap, the tracking error (or risk/return profile) is not expected to meaningfully change. Callan will monitor whether removal of the country cap results in the strategy becoming more passive and less active.

Based on Callan's presentation, Ms. Adelman recommended that the Retirement Boards monitor DFA's performance on a quarterly basis, but not place the manager on the watch list at this time. AEA Retirement Board Director Devorak agreed, noting that, given the recent fundamental change of the elimination of the country cap, the Retirement Boards should monitor DFA's performance for changes over the next couple of quarters. Ms. Heaphy added that all managers are always being monitored by Callan.

Director Li noted that an allocation of 5% to emerging market investments may not be considered high, but with the trade wars and current uncertainty, the emerging market allocation will remain an area of focus for the Retirement Boards.

REPORTS FROM COMMITTEES

Update on Potential Real Estate Asset Class Fund Manager Search

Ms. Adelman reported that the Search Committee, comprised of members of the ATU, IBEW, MCEG and AEA (there was no representative from AFSCME) met last week. Anne Heaphy and Avery Robinson from Callan provided a detailed presentation and proposed four high quality managers in the Real Estate sector. The Committee unanimously voted to recommend that the Retirement Boards invite three of the managers to provide presentations to the Retirement Boards at their February 26, 2020 Special meeting. The recommendation from Callan is to select two managers, which would split a 10% investment allocation. Callan will present different scenarios at the February special meeting regarding changes in other asset class allocations to raise the 10% real estate asset class allocation.

REPORTS, IDEAS AND COMMUNICATIONS

Update on Custodial Services Transition

Ms. Adelman reported that the custodian service transition from State Street to Northern Trust went very smoothly and that all Plan assets are now with Northern Trust. The final reconciliation of all Plan assets will be completed towards the end of January. Northern Trust will be on site to work with Ms. Adelman, Lynda Volk and the SacRT Accounting team and will provide training on their online module, online cash movement, daily cash reporting and all the great features Northern Trust has to offer.

The meeting was adjourned at 10:19 a.m.

**Sacramento Regional Transit District
AFSCME Retirement Board Meeting
Wednesday, September 11, 2019
MEETING SUMMARY**

ROLL CALL

The Retirement Board was brought to order at 9:02 a.m. A quorum was present comprised as follows: Directors Kennedy, Li, Guimond and Alternate Thompson. Alternate Jennings was absent.

This meeting was held as a common meeting of the five Sacramento Regional Transit District Retirement Boards.

By AFSCME Resolution No. 19-03-168 for calendar year 2019, the Governing Board Member in attendance served as Common Chair of this Retirement Board meeting.

PUBLIC ADDRESSES BOARD ON MATTERS NOT ON THE AGENDA

None.

CONSENT CALENDAR

- 4. Motion Approving the Minutes for the June 12, 2019 Quarterly Retirement Board Meeting (AFSCME). (Weekly)

- 5. Motion: Receive and File Administrative Reports for the Quarter Ended June 30, 2019 for the Salaried Pension Plan (AEA/AFSCME/MCEG). (Adelman)

- 6. Motion: Approving the Minutes for the July 24, 2019 Special Retirement Board Meeting (AFSCME). (Adelman)

Director Guimond moved to adopt AFSCME Retirement Board Items 4-6. Alternate Thompson seconded the motion. Items 4-6 were carried unanimously by roll call vote: Ayes: Directors Kennedy, Li, Guimond and Alternate Thompson. Noes: None.

- 16. Motion: Adopting Regional Transit Retirement Boards 2020 Meeting Calendar (ALL). (Weekly)

Director Guimond moved to adopt Item 16. Alternate Thompson seconded the motion. Item 20 was carried unanimously by roll call vote: Ayes: Directors Kennedy, Li, Guimond and Alternate Thompson. Noes: None.

NEW BUSINESS

17. Information: Update on Staff Roles and Responsibilities Related to Pension Administration (ALL). (Weekly)

Valerie Weekly provided an update on the roles and responsibilities of various District staff members and Legal Counsel related to the administration of the Pension Plans. Staff clarified that this was an informational item and no motion would be needed.

18. Information: Investment Performance Review by Dimensional Fund Advisors (DFA) for the ATU, IBEW and Salaried Employee Retirement Funds for the International Emerging Markets Asset Class for the Quarter Ended June 30, 2019 (ALL). (Adelman)

Jamie Adelman introduced Chermaine Fullinck with DFA, who provided the investment performance results for the International Emerging Markets Asset Class for the Quarter Ended June 30, 2019 and was available for questions.

19. Information: Investment Performance Review by Boston Partners for the ATU, IBEW and Salaried Employee Retirement Funds for the Domestic Large Cap Equity Asset Class for the Quarter Ended June 30, 2019 (ALL). (Adelman)

Jamie Adelman introduced Carolyn Margiotti with Boston Partners, who provided the investment performance results for the Domestic Large Cap Equity Asset Class for the Quarter Ended June 30, 2019 and was available for questions.

20. Motion Receive and File Investment Performance Results for the ATU, IBEW and Salaried Employee Retirement Plans for Quarter Ended June 30, 2019 (ALL). (Adelman)

Jamie Adelman introduced Anne Heaphy and Uvan Tseng with Callan LLC, who provided the Investment Performance Results for the ATU, IBEW and Salaried Employee Retirement Plans for the Quarter Ended June 30, 2019 and were available for questions. In response to a question from AEA Director Devorak regarding DFA's relative weighting of investments in China and whether or not to put DFA on watch, Ms. Heaphy responded that Callan will analyze the Emerging Markets allocations, possibly extract certain markets from the benchmark, and provide analysis at the next meeting.

Director Guimond moved to adopt Item 20. Alternate Thompson seconded the motion. Item 20 was carried unanimously by roll call vote: Ayes: Directors Kennedy, Li, Guimond, and Alternate Thompson. Noes: None.

21. Resolution Conditionally Award a Contract for Investment Custodial and Compliance Monitoring Services for the ATU, IBEW and Salaried Plans (ALL). (Adelman)

Jamie Adelman presented item 21 for approval. Jamie noted that three proposals came in: from Northern Trust, State Street and BMO. Staff recommended that Northern Trust be conditionally awarded the contract to allow the 10-day bid protest period to run and to allow for final negotiations of the services contract. Jamie noted that the new contract price came in at 30% less than the cost of services by the incumbent, State Street.

Jamie expressed appreciation to the Plans' advisors at Callan, legal counsel at Hanson Bridgett and the members of the evaluation committee for their assistance with the solicitation.

In response to question from MCEG Director Thorn regarding the transition process and plan, Jamie noted that Northern Trust has a special dedicated team during the transition process. She felt that between the dedicated team at Northern Trust and expert advice from Callan, there would be a smooth transition and there will be no delay or variance. Jamie added that the transition process will take approximately 90 days. Jamie added that there should be no changes in market value. Northern Trust will ensure that the balance for each investment will match State Street's close-of-month investment balances to the next month's opening balances.

ATU Director McGee-Lee asked what factors were key to determining the award of the contract to Northern Trust. Jamie mentioned that there were multiple factors, including customer service, accuracy and work product. She added that Northern Trust was technologically strong, and provides more clarity and transparency. Jamie also noted that Northern Trust has an online portal that provides information almost in real time. Price saving and feedback from Callan were additional factors.

Brent Bernegger noted that some clients from the incumbent custodian, State Street, have recently moved to other custodians. Jamie noted that since 2012, five relationship managers left State Street, which is a big turnover. She added that the level of service from State Street decreased every time a relationship manager left. She felt that this was the right time to go out and do an earnest search to make sure that the plans have a good custodian bank for a long time.

Director Guimond moved to adopt Item 21. Alternate Thompson seconded the motion. Item 21 was carried unanimously by roll call vote: Ayes: Directors Kennedy, Li, Guimond and Alternate Thompson. Noes: None.

REPORTS FROM COMMITTEES

None.

REPORTS, IDEAS AND COMMUNICATIONS

None.

RECESS TO CLOSED SESSION

The joint meeting of the five Retirement Boards recessed to allow each Board, except the MCEG Board, to meet separately in closed sessions.

- 24. **Closed Session Item (AFSCME):**
 Conference with Legal Counsel – Anticipated Litigation
 Significant Exposure to Litigation Pursuant to Government Code
 Section 54956.9(d)(2): 2 Potential Cases

The AFSCME Retirement Board recessed to closed session at 10:32 a.m. and reconvened in open session at 10:39.

CLOSED SESSION REPORT

No reportable actions were taken in the closed session.

The AFSCME Retirement board adjourned at 10:40 a.m.

DISCUSSION

Table 1 below shows the employer and employee contribution rates for all of the Sacramento Regional Transit District Retirement Plans, by Plan and tier, as of the date indicated.

Table 1

Employer Contribution Rates As of September 30, 2019

	ATU	IBEW	Salary
	Contribution Rate	Contribution Rate	Contribution Rate
Classic	27.78%	24.73%	35.41%
Classic w/Contribution*	24.78%		
PEPRA**	20.53%	18.73%	30.16%

*Includes members hired during calendar year 2015, employee rate 3%

**PEPRA employee rates: ATU – 7.25%, IBEW 6.0% and Salary 5.75%

Unaudited Financial Statements

Attached hereto are unaudited financial statements for the quarter and the year-to-date ended September 30, 2019. The financial statements are presented on an accrual basis and consist of a Statement of Fiduciary Net Position (balance sheet) (Attachment 1), a Statement of Changes in Fiduciary Net Position (income statement) for the quarter ended September 30,

Approved:

Administrative Reports

Agenda Item No.	Board Meeting Date	Open/Closed Session	Information/Action Item	Issue Date
9	03/11/2020	Retirement	Information	11/01/19

Subject: Receive and File Administrative Reports for the Quarter Ended September 30, 2019 for the Salaried Pension Plan (AFSCME). (Adelman)

2019 (Attachment 2), and a year-to-date Statement of Changes in Fiduciary Net Position (Attachment 3).

The Statement of Fiduciary Net Position includes a summary of fund assets showing the amounts in the following categories: investments, prepaid assets, and other receivables. This statement also provides amounts due from/to the District and Total Fund Equity (net position).

The Statement of Changes in Fiduciary Net Position includes activities in the following categories: investment gains/losses, dividends, interest income, unrealized gains/losses, benefit contributions/payouts, and investment management and administrative expenses.

Asset Rebalancing

Pursuant to Section IV, Asset Rebalancing Policy of the Statement of Investment Objectives and Policy Guidelines for the ATU, IBEW and Salaried Employees' Retirement Funds, the Retirement Boards have delegated authority to manage pension plan assets in accordance with the approved rebalancing policy to the District's AVP of Finance and Treasury. The AVP of Finance and Treasury is required to report asset rebalancing activity to the Boards at their quarterly meetings. Rebalancing can occur for one or more of the following reasons:

1. The Pension Plan ended the month with an accounts receivable or payable balance due to the District. A payable or receivable is the net amount of the monthly required contribution (required contribution is the percentage of covered payroll determined by the annual actuarial valuation) less the Plan's actual expenses.
2. The Pension Plan hires or removes a Fund Manager, in which case securities must be moved to a new fund manager.
3. The Pension Plan investment mix is under or over the minimum or maximum asset allocation as defined in the Statement of Investment Objectives and Policy Guidelines.

Attached hereto as Attachment 4 is the Salaried Plan's Schedule of Cash Activities for the three months ended September 30, 2019. The schedule of cash activities includes a summary of Plan activities showing the amounts in the following categories: District's pension contributions to the Plan, payments to retirees, and the Pension Plan's cash expenditures paid. This schedule also lists the rebalancing activity that occurred for the three months ended September 30, 2019. The Salaried Plan reimbursed \$115,524.52 to the District as the result of the net cash activity between the pension plan expenses and the required pension contributions.

Attached hereto as Attachment 5 is the Salaried Plan's Asset Allocation as of September 30, 2019. This statement shows the Salaried Plan's asset allocation as compared to targeted allocation percentages as defined in the Statement of Investment Objectives and Policy Guidelines.

Attached hereto as Attachment 6 is a reconciliation between the Callan Performance Report and the ATU, IBEW and Salaried Pension Plans' unaudited financial statements. The reports

Agenda Item No.	Board Meeting Date	Open/Closed Session	Information/Action Item	Issue Date
9	03/11/2020	Retirement	Information	11/01/19

Subject: Receive and File Administrative Reports for the Quarter Ended September 30, 2019 for the Salaried Pension Plan (AFSCME). (Adelman)

differ in that the unaudited financial statements reflect both investment activities and the pension fund's inflows and outflows. Callan's report only reflects the investment activities. The "Net Difference" amounts shown are the results of Callan and State Street using different valuations for the same securities and/or litigation settlements received by the Plans.

Included also as Attachment 7 is a reconciliation between the Callan Performance Report and the Schedule of Cash Activities for payments made from/to the District. Callan's report classifies gains from trades and litigation income as "net new investments." Finance staff classifies gains from trades and litigation income in the Pension Plan's unaudited Statement of Changes in Fiduciary Net Position as "Other Income," which is combined in the category of "Interest, Dividend, & Other Inc".

Attached hereto as Attachment 8 is a schedule reflecting Fund Managers' quarterly investment returns and their investment fees. Additionally, the schedule reflects annual rates of return on investment net of investment fees for the one-year and three-year periods ended September 30, 2019 as compared to their benchmarks.

Attached hereto as Attachment 9 is a schedule reflecting employee transfers from one union/employee group to another, as well as any transfers of plan assets from the ATU Plan to the Salaried Plan, all retirements, and retiree deaths during the three months ended September 30, 2019.

**HANSON BRIDGETT LLP &
SACRAMENTO REGIONAL TRANSIT DISTRICT RETIREMENT BOARDS**

LEGAL SERVICES SUMMARY

Set forth below is a broad summary report of significant legal matters addressed by Hanson Bridgett LLP for the Sacramento Regional Transit District Retirement Boards during the Quarter ended September 30, 2019.

1. Weekly client conference calls and internal conferences on pending matters, upcoming Board meetings and follow-up from prior Board meetings.
2. Preparation for and participation in Quarterly Board Meetings and Special Board Meetings, including review and markup of agenda materials and related Board Chair conference calls.
3. Assist with custodian services procurement including, but not limited to: preparing for and attending proposer interviews; analyzing exceptions to proposed agreement; and negotiating contract with Northern Trust.
4. Support custodian services transition process, including contract extension with incumbent.
5. Review and analyze potential correction issues with operations audit including applicable interest rate for under/overpayments.
6. Provide counsel on issues including, but not limited to:
 - a. Financial reporting;
 - b. Calculation of benefits under various scenarios;
 - c. Fiduciary duties.

Respectfully Submitted,

/s/ Shayna M. van Hoften

Sacramento Regional Transit Retirement Boards Training Report

Attendee:	Valerie Weekly, Retirement Services Manager			
Training:	Management Academy for Retirement System Managers			
Agency:	California Association of Public Retirement Systems (CALAPRS)			
Location:	Pasadena, California			
Purpose:	Public retirement systems offer management challenges far different than those found in either the private sector or other government settings. The CALAPRS Management Academy provides participants outstanding training and exposure to enterprise management, problem solving, leadership and a feedback component in the retirement system context.			
Agenda:	Module 1 April 15-16	Module 2 June 10-12	Module 3 July 22-24

Subject: Investment Performance Review by Atlanta Capital for the ATU, IBEW, and Salaried Retirement Funds for the Domestic Small Cap Equity Asset Class for the Quarter Ended September 30, 2019 (AFSCME). (Adelman)

ISSUE

Investment Performance Review by Atlanta Capital for the ATU, IBEW, and Salaried Retirement Funds for the Domestic Small Cap Equity Asset Class for the Quarter Ended June 30, 2018 (AFSCME). (Adelman)

RECOMMENDED ACTION

Information only.

FISCAL IMPACT

None.

DISCUSSION

Retirement funds are invested consistent with the Statement of Investment Objectives and Policy Guidelines (Policy) adopted by each Retirement Board (Board). The Board shall meet at least every eighteen (18) months with each investment manager to review the performance of its investment, the adherence to the Policy, and any material changes to its organization. The Policy also establishes the Retirement Funds' asset allocation policy and the asset classes in which the Plans funds are invested. The asset classes established by the Policy are (1) Domestic Large Capitalization Equity, (2) Domestic Small Capitalization Equity, (3) International Large Capitalization Equity, (4) International Small Capitalization Equity (5) International Emerging Markets, and (6) Domestic Fixed-Income.

Atlanta Capital is the Retirement Boards' Domestic Small Capitalization Equity fund manager. Atlanta Capital will be presenting performance results for the quarter ended September 30, 2019, shown in Attachment 1, and answering any questions.

- Our team does not rely on a research staff to generate ideas or perform fundamental research
- Each portfolio manager conducts his own research while decisions are made on a consensus basis

Consistent Growth & Stability in Earnings

Key Tenet of Our Investment Philosophy

**Five-Year Rolling CAGR of As Reported Earnings
Russell 2000® Index by Earnings Stability**

	<u>Earnings Stability</u>	<u>Avg. 5-Year CAGR</u>	<u>Earnings Variability</u>	<u># Positive Periods</u>	<u># Negative Periods</u>
High Quality Portfolio	6.9%	1.7%	120 or 100%	0 or 0%	
Low Quality Portfolio	4.1%	3.4%	106 or 88%	14 or 12%	

Time period: January 1, 1989 – December 31, 2018. This information is provided for general illustrative purposes only. The High Quality and Low Quality Research portfolios are provided to compare the aggregate earnings stability of all companies in the index with High Quality SPGMI Quality Rankings (B+ or Better) to those with Low Quality SPGMI Quality Rankings (B or Below). The High Quality Research and Low Quality Research portfolios are model portfolios formed and rebalanced monthly by Atlanta Capital. The universe includes all Russell 2000® Index constituents with SPGMI Quality Rankings and prices greater than \$1. Five-year historical earnings growth rates are calculated using a market capitalization-weighted methodology. The Russell 2000® Index is an unmanaged index of 2,000 US small-cap stocks. Historical performance of the index and Research portfolios illustrates market trends and does not represent past or future performance of the strategy. The material is based upon information that Atlanta Capital considers to be reliable, however no assurances are provided. The material should not be considered investment advice or a recommendation to invest in a particular strategy. Reproduction or redistribution of this page in any form without express permission from Atlanta Capital is prohibited. Past performance is not a reliable indicator of future results. Small Cap Investment Objective

April 1, 1992 – September 30, 2019

Our objective is to participate in rising markets, protect capital during declining markets, and outperform over the long term...

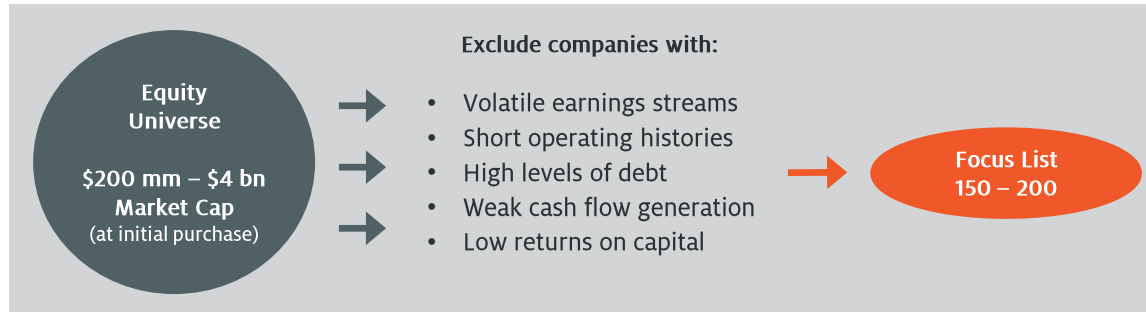

...without the volatility typically associated with small cap investing.

*The inception date of the High Quality Small Capitalization Composite is April 1, 1992. For illustrative purposes only. The charts above illustrate the average (annualized) return of the High Quality Small Capitalization Composite during both rising and declining markets since inception. Results for other time periods may differ from the long-term trend shown above. Rising markets are defined as quarters where the return of the Russell 2000® index was positive. Declining markets are defined as quarters where the return of the Russell 2000® index was negative. These positive and negative quarters are separated out from the intervening quarters, cumulated across the period, and annualized. Long-term investment returns include both rising and declining periods. Composite performance is shown in US dollars and reflects reinvestment of all income and capital gains. Composite performance is shown net of investment advisory fees using a maximum annual investment management fee of 0.80% applied monthly; client results will be reduced by custody fees and other client expenses. Performance during certain periods reflects strong stock market performance that is not typical and may not be repeated. Individual client returns will vary due to fees, client-imposed investment constraints and client inception date. Beta measures the historical sensitivity of portfolio excess returns to movements in the excess return of the market index. Standard Deviation is a measure of absolute volatility of returns. The Russell 2000® index is unmanaged and does not incur management fees or other expenses associated with managed accounts. It is not possible to directly invest in an index. Please see the Composite's GIPS® compliant presentation at the end of this presentation for important additional information and disclosure. **Past performance does not predict future results. Source: eVestment and Atlanta Capital.**

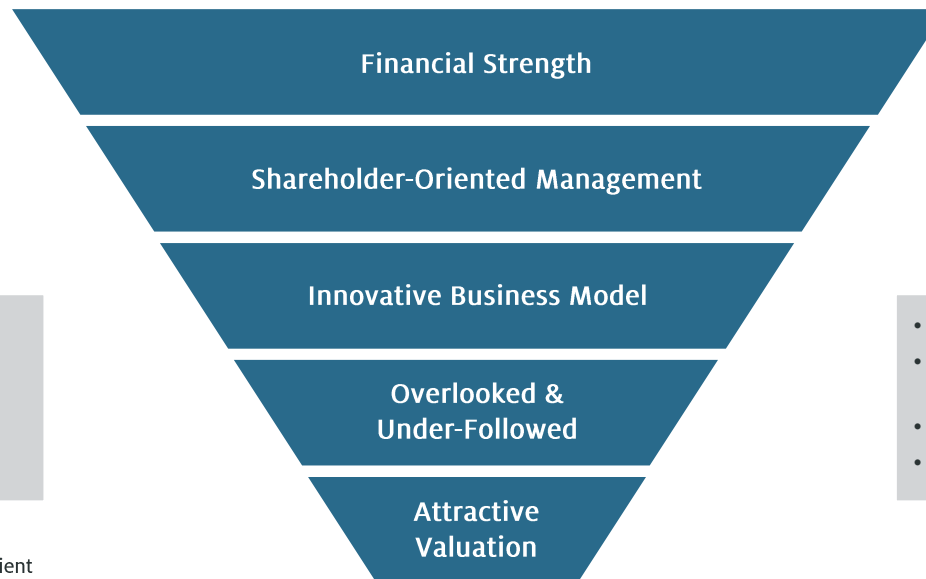

Disciplined Investment Process

High Quality Small Cap Equity

Step 1 Create a 'Focus List' of High Quality Companies

Step 2 Conduct 'Onsite' Fundamental Research

Step 3 Construct a Focused Yet Well-Diversified Portfolio

- Generally 60 – 70 holdings
- 5% max position sizes
- 30% absolute sector weights
- 16% 3-year average turnover*
- Russell 2000® Index

Step 4 Monitor Holdings & Review Focus List

- Prudent profit taking
- Change in management or business strategy
- Deterioration of financial quality
- Excessive valuation

* Turnover based on a single representative client portfolio and subject to change; individual client results may vary.

Annualized Performance

As of September 30, 2019

Sacramento Regional Transit District

	QTD (%)	YTD (%)	1 Yr (%)	3 Yrs* (%)	5 Yrs* (%)	7 Yrs* (%)	10 Yrs* (%)	Since Inception*
High Quality Small Cap	2.76	21.94	4.71	15.31	14.49	15.12	--	14.55
Russell 2000® Index	-2.40	14.18	-8.89	8.23	8.19	10.44	--	9.52

Account Summary

Performance Inception Date:	April 22, 2010
Net Investment Contributions:	\$24,188
Investment Dollars Earned:	\$26,124,953
Market Value (09/30/19):	\$26,149,141

*Time periods greater than one year are annualized.

Performance reflects reinvestment of all income and capital gains (realized and unrealized).

Results are based on the accrual method of accounting as well as trade date valuation.

Returns are gross of fees unless otherwise noted.

Gross of fee returns do not reflect the deduction of management and custodial fees. Net of fee returns reflect the deduction of the management fee accrued on a monthly basis.

Returns are based on the total assets of the client's account, calculated on a daily basis, and geometrically linked to calculate returns for longer periods of time.

The unmanaged indexes shown for comparative purposes do not reflect the subtraction of any fees of transaction costs. It is not possible to directly invest in an index.

Past performance does not guarantee or predict future results.

Portfolio Transactions

Last 3-Months Ending September 30, 2019

Sacramento Regional Transit District
High Quality Small Cap

New Purchases

Industrials

CBIZ Inc.

Provides an array of critical professional services to small and mid-sized businesses nationally. Strong client retention along with a focus on margin and sales productivity should drive earnings.

Complete Sales

Consumer Discretionary

Pool Corp.

Is a large distributor of swimming pool and irrigation products. We sold the position as the company's market capitalization had appreciated to the high end of our range.

Investment Outlook & Strategy

As of September 30, 2019

High Quality Small Cap

Outlook

- U.S. small cap equity markets have certainly “climbed a wall of worry” so far in 2019, with the Russell 2000® index gaining over +14% YTD.
- However, in the 3rd quarter, the Russell 2000® declined -2.4% as the market considered the impact of a potential economic slowdown driven by factors like unresolved global trade/tariff disputes, renewed Middle Eastern tensions and an attack on critical Saudi oil infrastructure, a still pending Brexit decision in the UK, and escalating political discord in the U.S.
- While total returns for small cap stocks remain solid year-to-date, we have and continue to expect increased periods of heightened market volatility. We continue to focus on investing in high quality companies that we believe should participate if markets move higher, and help to minimize downside risk if markets decline.

Portfolio Positioning

- During the quarter, we added one new holding and sold one position entirely.
- At quarter end, the portfolio held 63 stocks representing nine of the eleven economic sectors in the Russell 2000®.
- Relative to the benchmark, the portfolio remains overweight Industrials, Consumer Staples, Technology, Materials, and Consumer Discretionary.
- The portfolio was underweight Health Care, Real Estate, Energy, and Financials. There were no positions in Utilities or Communication Services.

¹Period 01/01/2018 through 12/31/2018. Past performance does not predict or guarantee future results.

Atlanta Capital Management Company, LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS Standards. Atlanta Capital Management has been independently verified for the periods January 1, 1999 through December 31, 2018.

Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. The High Quality Small Capitalization Composite has been examined for the periods January 1, 1999 through December 31, 2018. The verification and performance examination reports are available upon request.

Firm Definition: Atlanta Capital Management Company, LLC (Atlanta Capital or the Firm) is an SEC-registered investment adviser located in Atlanta, Georgia. The Firm became a majority-owned subsidiary of Eaton Vance Corp. in 2001. Atlanta Capital operates as an independent subsidiary of Eaton Vance and provides professional investment advisory services to a broad range of institutional and individual clients, and sub-advisory investment management to mutual funds and separately managed sub-advisory account programs. Atlanta Capital includes all discretionary accounts under management in its composites; total firm assets include discretionary and nondiscretionary accounts for which the firm has investment responsibility.

Composite Description: The investment objective of this style is to seek long-term capital growth. Accounts in this composite invest in common stocks of companies having market capitalizations within the range of companies comprising the Russell 2000®. Management seeks to invest in quality companies in strong financial condition whose equities are priced below their estimate of fair value. Characteristics of high quality companies include a history of sustained growth in earnings and operating cash flow, high returns on capital, attractive profit margins and leading industry positions. Investments are determined based primarily on fundamental analysis of a company's financial trends, products and services, and other factors. Financial quality rankings provided by nationally-recognized rating services may be utilized as part of the investment analysis but are not solely relied upon. The portfolios are broadly diversified. All fully discretionary accounts that are managed in this style and do not pay a bundled or SMA wrap fee are eligible for inclusion in the composite.

Benchmark: The composite's benchmark is the Russell 2000® Index, a widely accepted measure of the small-cap segment of the U.S. equity universe. The index includes the smallest 2000 companies in the Russell 3000®. Prior to July 1, 2005, the composite was also compared to the Russell 2000® Value Index as the portfolio construction process produced both core and value characteristics. Our high quality investment philosophy tends to be defensive in nature and does consider valuation metrics, but it is more consistent with the philosophy and process of a core manager than a value manager. As of July 1, 2015, to clarify our process for potential clients, we determined that it was most appropriate to benchmark our performance results against the Russell 2000® Index only. The investment process for this strategy is not limited by the relative weights of a benchmark. Strategy deviations from the benchmark may include but are not limited to such factors as active management, exclusion/inclusion of securities held/not held in the index, over/underweighting specific sectors or securities, limitations in market cap, and/or client constraints. Indexes include the reinvestment of dividends and earnings, are unmanaged, and do not incur management fees, transaction costs or other expenses associated with separately managed accounts. It is not possible to directly invest in an index.

Gross and Net Returns: Performance reflects reinvestment of all income and capital gains. Composite returns and market values are reported in U.S. dollars. Gross-of-fees performance returns are presented before management and custodial fees but after all trading expenses. Returns are presented net of withholding taxes. Net-of-fees performance returns are calculated by deducting the highest management fee of 0.80% from the monthly gross-of-fees returns. Other expenses will reduce a client's returns. The annual fee schedule for this composite is as follows: 0.80% on the first \$50 million in assets; 0.70% on the next \$50 million in assets; 0.60% on the next \$150 million. Actual management fees incurred by clients may vary.

Composite Dispersion: The annual internal composite dispersion is calculated using the asset-weighted standard deviation of annual gross returns of those portfolios that were included in the composite for the entire year. Internal dispersion is shown only for composites that held at least six accounts for the entire year. The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period.

Notes to Composite: The creation date of this composite is July 1992. Effective July 1, 2010, the composite was redefined to include both taxable and tax-exempt institutional accounts. The composite up to that time included only tax-exempt institutional accounts. The change provides increased transparency to prospective clients by reducing the number of separate composites maintained for this strategy. There has been no change in investment objective or management style. Clients or prospective clients should not assume that they will have an investment experience similar to that indicated by past performance results, as shown on the Schedule. Returns may vary based upon differences in account size, timing of transactions and market conditions at the time of investment. Performance during certain time periods reflects the strong stock market performance and/or the strong performance of stocks held during those periods. This performance is not typical and may not be repeated. Investing entails risks and there is always the possibility of loss.

Other Matters: The Firm's list of composite descriptions and policies for valuing portfolios, calculating performance and preparing compliant presentations are available upon request. To request any additional information, please contact the Atlanta Capital Management Performance Department at 404-876-9411 or write to Atlanta Capital Management Company, LLC, 1075 Peachtree Street NE, Suite 2100, Atlanta, Georgia 30309, Attention Performance Department. **Past performance does not predict future results.**

Subject: Investment Performance Review of the S&P 500 Index and MSCI EAFE Funds by State Street Global Advisors (SSgA) for the ATU, IBEW and Salaried Employee Retirement Funds for the Quarter Ended September 30, 2019 (AFSCME). (Adelman)

ISSUE

Investment Performance Review of the S&P 500 Index and MSCI EAFE Funds by State Street Global Advisors (SSgA) for the ATU, IBEW and Salaried Employee Retirement Funds for the Quarter Ended September 30, 2019 (AFSCME). (Adelman)

RECOMMENDED ACTION

Information Only

FISCAL IMPACT

None.

DISCUSSION

Retirement funds are invested consistent with the Statement of Investment Objectives and Policy Guidelines (Policy) adopted by each Retirement Board (Board). The Board shall meet at least every eighteen (18) months with each investment manager to review the performance of its investment, the adherence to the Policy, and any material changes to its organization. The Policy also establishes the Retirement Funds' asset allocation policy and the asset classes in which the Plans' funds are invested. The asset classes established by the Policy are (1) Domestic Large Capitalization Equity, (2) Domestic Small Capitalization Equity, (3) International Large Capitalization Equity, (4) International Small Capitalization Equity, (5) International Emerging Markets, and (6) Domestic Fixed-Income.

SSgA is the fund manager for the Retirement Boards' Domestic Large Capitalization Equity S&P 500 Index Fund, as well as the Retirement Boards' International Large Capitalization Equity MSCI EAFE Index Fund. SSgA will be presenting performance results, for both funds, for the quarter ended September 30, 2019, shown on Attachment 1, and answering any questions.

Guiding Principles

Since 1978 we've had a drive to always reinvent the way we invest for our clients.

Start with Rigor

Our more than 500 investment professionals worldwide take a highly risk-aware approach to all investing challenges.

Build from Breadth

We build from a universe of active and index strategies to create cost effective solutions.

Invest as Stewards

We help our portfolio companies understand that what's fair for people and sustainable for the planet can deliver long-term performance.

Invent the Future

We created the first US ETF and we're pioneers in index, active, and ESG investing.

US\$2.95 Trillion in Assets Under Management¹

Clients by AUM

¹AUM reflects approximately \$45.01 billion (as of September 30, 2019), with respect to which State Street Global Advisors Funds Distributors, LLC (SSGA FD) serves as marketing agent; SSGA FD and State Street Global Advisors are affiliated

²Official Institutions is a client type that includes all plan type assets including DB and DC.

Investment Philosophy

Understanding Multiple Dimensions

Creating successful investment outcomes starts with understanding the multiple dimensions of a client's long-term objectives and liabilities.

Knowing Markets are Not Always Efficient

Due to behavioral biases, informational inefficiencies and limits to arbitrage, markets are not always efficient, leading to opportunities for excess returns.

Focusing on Asset Allocation

The primary driver of long-term returns is asset allocation.

Investors need efficient access to a broad universe of capital market exposure.

Focus should be on underlying risks, not asset class labels.

Achieving Capital- & Risk-Efficient Portfolios

A thoughtful and precise combination of market-, factor- and idiosyncratic-risk, along with manager skill, are key to achieving capital-, and risk-efficient portfolios.

ESG in Action:

Wall Street, Meet Fearless Girl

Starting in 2017, our Asset Stewardship team has called on companies in our investment portfolio to increase the number of women on their boards, and made clear we would use our proxy voting power to effect change if they failed to act.

Photo: Sculpture by Kristen Visbal
Source: State Street Global Advisors Asset Stewardship Team September 2019

1300+

companies identified in the US, UK, Australia, Japan, Canada and continental Europe that had no women on their boards.

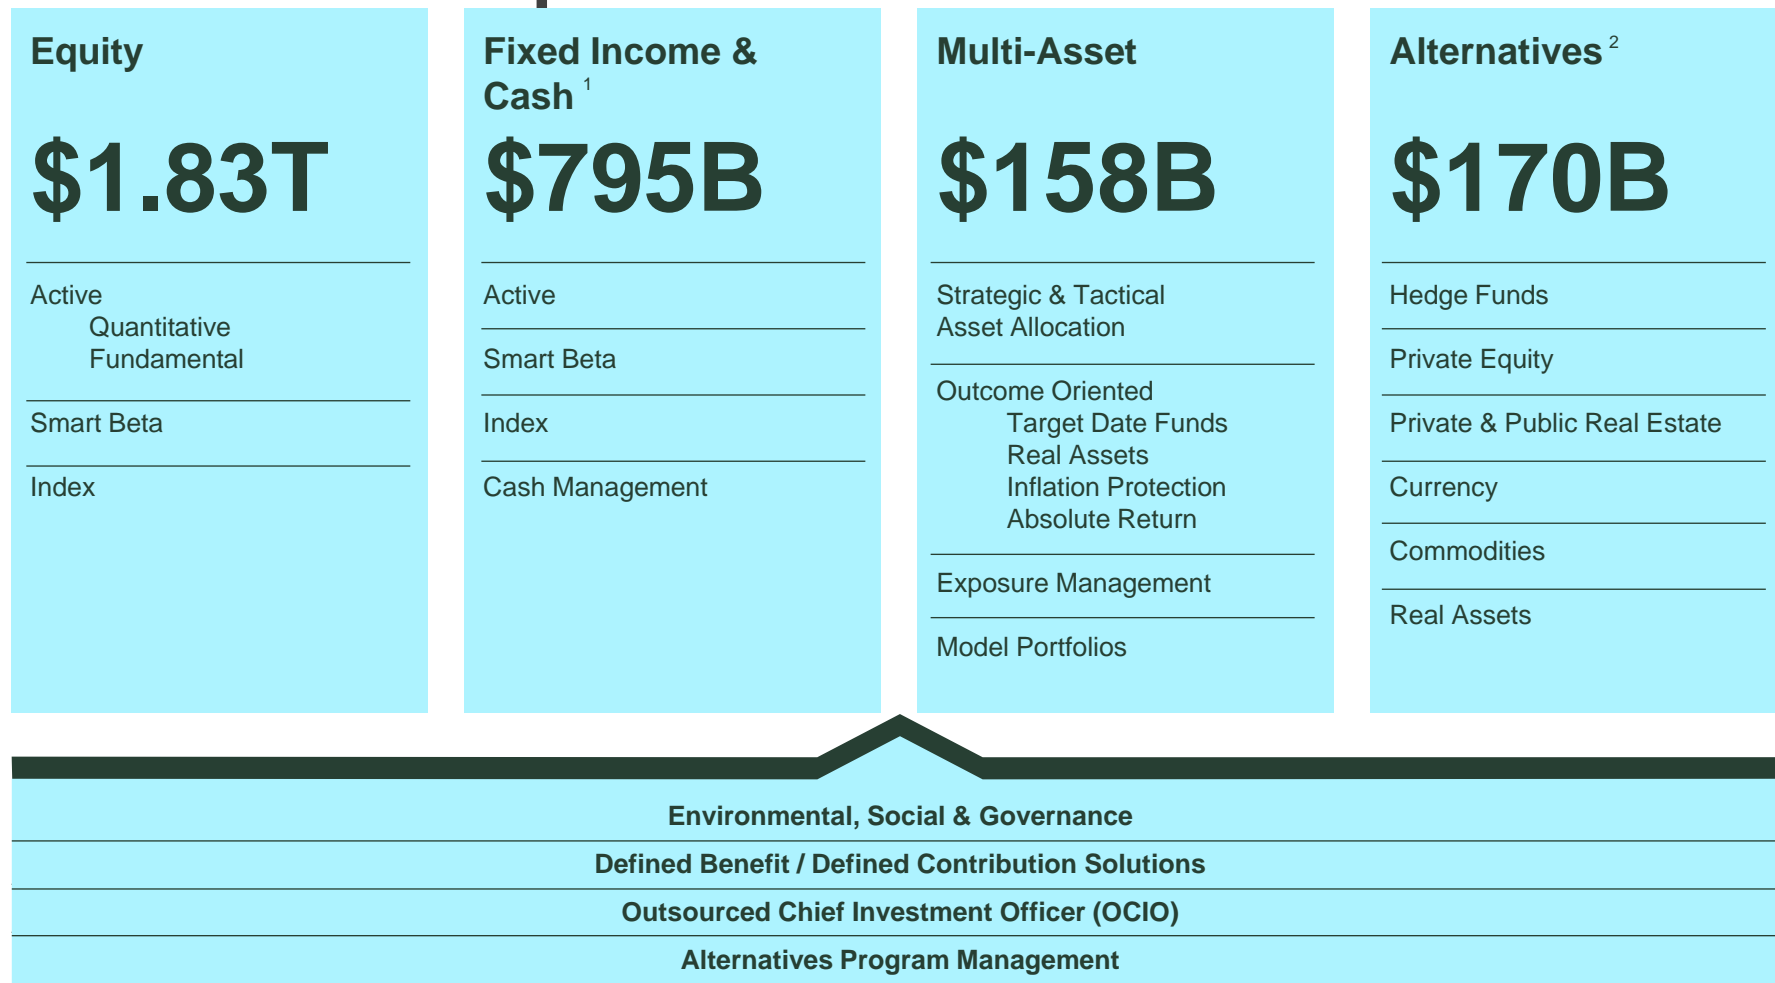

600+

companies voted against for failing to take adequate steps toward adding a female director to their board.

583

companies have now added a female director to their board or committed to doing so

Our Active and Index Capabilities Cover the Risk/Reward Spectrum

Figures are in USD dollars; Period end as of September 30, 2019

¹Cash includes both floating- and constant-net-asset-value portfolios held in commingled structures or separate accounts. ²Alternatives Includes real estate investment trusts, currency and commodities, including gold-backed ETFs for which SSGA only serves as marketing agent.

What Keeps Clients Awake at Night?

Investor Challenges and Needs

Policy Matters

Policy risk muted but not gone away

Corporate leverage is high

Past performance is not a reliable indicator of future performance. Performance returns for periods of less than one year are not annualized. The performance figures contained herein are provided on a gross and net of fees basis. Gross of fees do not reflect and net of fees do reflect the deduction of advisory or other fees which could reduce the return. The performance includes the reinvestment of dividends and other corporate earnings and is calculated in USD. Index returns reflect capital gains and losses, income, and the reinvestment of dividends.

Equity Indexing Skillfully Delivered

Who We Are

Why State Street Global Advisors for Index, Smart Beta & ESG Investing

Core Focus Area and Key Strength

- 40 year history of delivering high quality, broad based index solutions
- Index represents 80%¹ of assets under management and 68%¹ of revenues
- >98%^{1,2} of equity index funds have historically tracked within their tolerance bands

Industry Leader and Innovator

- ✓ Launched first US ETF
- ✓ In-house index creation
- ✓ Developing smart beta since 2006

Groundbreaking efforts in ESG research and integrated portfolio solutions

In-house proprietary ESG framework and screening tool

Experienced and Reliable Team

- 20 years average portfolio manager tenure
- Utilize a globally consistent investment management platform and processes
- Strategic focus on implementation and risk management
- Deep Research expertise with innovative heritage

¹ Source: State Street Global Advisors, December 2018.

² Based on cumulative quarterly gross-of-fees returns for all GEBS managed pooled, and separate account for both 3 years and 5 years period ending December 31, 2018. Tracking error based on the difference between portfolio and benchmark cumulative returns.

Investment Philosophy

We aim to deliver to each client the returns and characteristics of a targeted index or strategy

We believe in...

Integration of technology & human insight

- Maintain a primary portfolio manager structure while using a state of the art portfolio management platform
- Continuous investment in our technology infrastructure to gain further efficiencies

Supporting long-term shareholder values

- Engage with investee companies to promote responsible investing and protect long term shareholder returns through asset stewardship
- Firm wide proxy voting platform

Innovating through research

- Value add strategies based on core beta research
- Development of propriety strategies and indexes
- ESG screening tools & framework, thematic strategies and portfolio integration

Our Belief

Companies embracing ESG best practice have strong, effective, independent boards and are able to incorporate sustainability into their long term strategy.

ESG

- **Proprietary** ESG research and innovation driving multi asset classes solutions
- **Strong focus** on independent board leadership, financial impacts of climate change and other crucial ESG issues like gender diversity

Asset Stewardship

- **Alignment** of asset stewardship, portfolio management, research, technology and ESG solutions
- Commissioned the **Fearless Girl** statue and developed the **Gender Diversity Index**

30+ Years

of commitment to ESG investors

\$217B¹

assets under management in ESG

445² of the 1,265

companies we called on made positive progress on board gender diversity

Photo:
Sculpture by Kristen Visbal.

Source: State Street Global Advisors. ¹ Data as of June 30, 2019 and listed in USD.

² 423 companies added a female board member and 28 committed to add a female director.

Global Trading

18 year global desk in place

24 hour trading capabilities

30+ Traders (Equity & Fixed Income)

+18 year's average experience

\$2.5 Trillion dollars traded in 2018

3.3 Million tickets executed in 2018

What Differentiates Us from the Competition?

Spectrum of Trading Tools

- **Internal crossing network:** Use of security & unit level crossing when possible to minimize transactions costs
- **Algo Wheel:** Seeks to reward better performing algorithmic trading strategies and remove trader bias through a performance driven broker selection process

Trading Analytics Group (TCA)

- Cross asset class team performing transaction cost analysis, data and analytics reporting, as well as market research
- TCA results incorporated into Algo selection process
- Quarterly review of best execution and governance oversight framework

Connectivity & Expertise

- Regional trading desks with local expertise — coverage across 95 global markets
- Strong partnership between trading, portfolio management and research helps drive value-add strategies and routine implementation decisions

As of December 31, 2018. Updated Annually. Asset classes include equity, fixed income, futures and currency. Figures are in USD. Availability of internal crossing at SSGA may be affected by your asset class, vehicle type, jurisdiction, or other factors.

Industry Trends Q3 2019

Flows/Markets	<p>Several market shocks led to sharp dislocations and increased volatility throughout the quarter. Despite ongoing trade disputes and other shifting market internals across different asset classes, asset prices from quarter to quarter were little changed. Economic growth forecasts remain anemic, although consumer spending and labor markets remain constructive. Monetary policy support continues to re-emerge, along with talk of potential fiscal stimulus.</p>	
Smart Beta & Factor Investing	<p>Becoming a more common area of focus for assets owners of all sizes - 77%¹ of investors are either implementing or currently evaluating smart beta strategies. Investor preferences still vary; however, third party index solutions are still resonating. Thoughtful construction and implementation of proprietary solutions can be a marketplace differentiator.</p> <ul style="list-style-type: none"> Near term trends influenced by current market dynamics include; renewed interest in managed or low volatility strategies, as well as the quality factor. Longer term initiatives in Europe included smart beta and ESG integration. Multifactor strategy performance across the industry has generally been challenged due to over-weights in the value and size factors, which have largely underperformed in recent periods. 	
Self Indexing	<p>Self indexing remains an area of interest for asset managers and select investors. Policy benchmark alignment remains a headwind though with some institutional investors.</p> <ul style="list-style-type: none"> Benefits to self index include increased flexibility, lower explicit cost (i.e., licensing fees) and potentially lower implicit costs Boarder demand for index still fueling top three equity index providers (MSCI, FTSE, Russell and S&P Dow Jones). Although the collective 70% market share is down from ~80% in 2017, suggesting smaller, more specialized entrants gaining traction. 	
Asset Stewardship	<p>Stewardship moving from “nice to have” to “must have.” A recent institutional survey sited 80% of respondents expect stewardship demands on their index managers to increase overtime.²</p> <ul style="list-style-type: none"> Dedication of index managers coming under increased pressure as index strategies grow. Top three firms now account for 25% of all votes cast on the S&P500, making stewardship all that more important for index managers. Top priorities and engagement activities cited in recent annual stewardship reports include; governance structures, board/ executive compensation & diversity, environmental risks (i.e. climate) and capital management/ deployment 	
ESG	<p>Interest in ESG strategies whether for ‘purpose’ or ‘performance’ is growing across regions³. Consistency in data and materiality remain obstacles.</p> <ul style="list-style-type: none"> Bloomberg recently launched the Bloomberg SASB ESG Index series powered by SSGA’ R-factor ESG scoring methodology, which is aligned with the Sustainability Accounting Standards Board’s (SASB) market-informed materiality framework. 	
Noteworthy Global Index Events	<p>MSCI</p> <ul style="list-style-type: none"> Second planned increase in the 5% to 20% inclusion factor of China A shares was implemented in Aug, concluding in November with midcap stock also being added Second and final tranche of Saudi Arabia added to MSCI EM in Aug Argentina imposes capital controls in Sep, leading MSCI to reassess the feasibility of replication and status. Findings to be announced in Dec 	<p>FTSE</p> <ul style="list-style-type: none"> A 25% inclusion factor implemented via three steps between June 2019 and March 2020. Stocks include both large- and mid-cap stocks, as well ChiNext securities. Third tranche of Saudi Arabian equities added in Sep to FTSE EM with two more planned and the final in March 2020 Argentina officially pulled from the watchlist Kuwait added in September.

¹ FTSE Russell, 2018. ² DWS and Create-Research 2019’, ³ National Bureau of Economic Research, June 2019. Unless otherwise noted, all data as of September 2019.

Investment Process

Index Equity Management Techniques

Benchmark returns can be achieved through...

Replication

Hold all or the majority of securities in the index at approximately market cap weight

Typically applied to reasonable sized portfolios with minimal liquidity or accessibility constraints (US large cap, Developed markets)

Optimization

Construct a portfolio with the same risk & return characteristics of the index but with a smaller subset of securities

Typically applied to liquidity constrained portfolios (small cap, Emerging markets) or smaller sized portfolios tracking a broader index

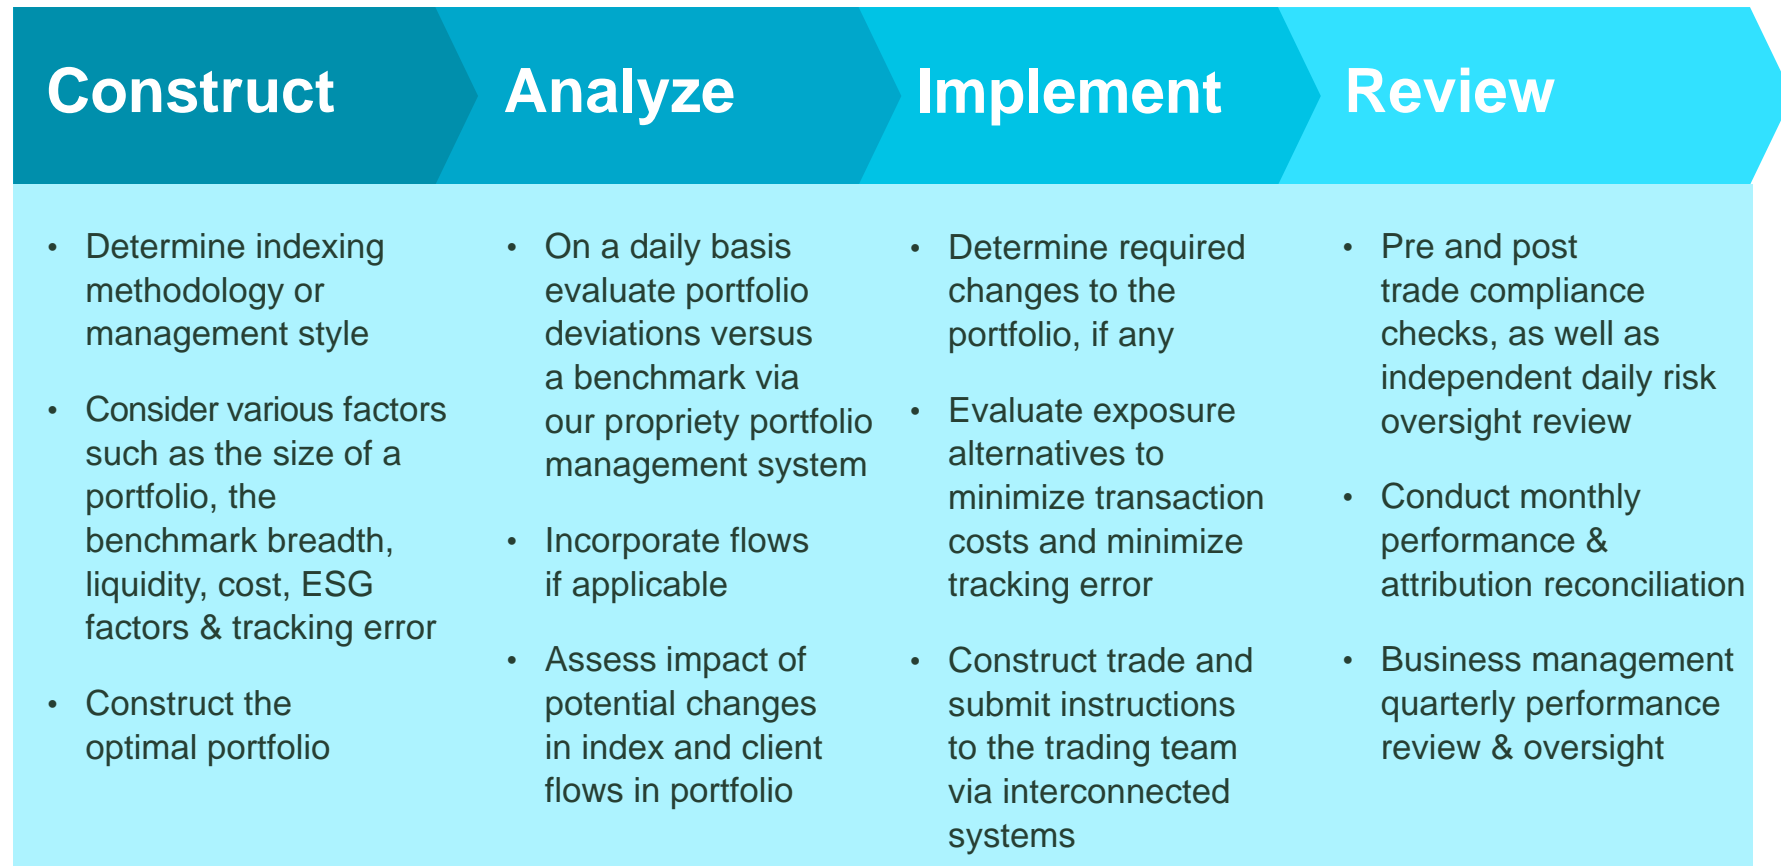

Also applicable to broad portfolios with restrictions or exclusions

The information contained above is for illustrative purposes only.

Investment Process

A tried and tested process marrying human insight and technology

Source: State Street Global Advisors.

Improving Risk Controls & Oversight Through Technology

Features of our portfolio management system:

- Full data integration with other State Street Global Advisors applications and risk/oversight teams
- Designed and customized to our process, workflow and portfolio universe
- Provides a comprehensive portfolio view for portfolio management, as well as risk and oversight
- Dedicated software development resources to ensure continuous development and improvements

How We Add Value

Why Choosing The Right Index Manager Matters?

Indexes make numerous assumptions, which can lead to mistracking (+/-), and wealth erosion if not managed with precision and skill	Index Assumptions	Reality
	No transaction costs	Effective implementation techniques can minimize implicit and explicit costs (i.e., internal crossing)
	All trades executed at market on close	Trading strategies can reduce turnover and improve execution
	Dividends reinvested at ex date — before cash received	Equitize cash with futures when possible to minimize cash drag
	Maximum foreign dividend withholding tax rate	Investors realize different withholding tax rates relative to the index, resulting in income via tax reclaims
	Assumed corporate action elections	Multiple options may exist presenting opportunities to add value
	Dividends are the only income source	Income from securities litigation payments or securities lending can help offset negative tracking*

* Other sources of tracking deviation may include but are not limited to transactions costs, taxes, cash drag, futures tracking versus the benchmark or securities mis-weights.

Adding Value Through Effective Implementation

Index Reconstitution

Pursue the best outcome for the client

Portfolio Rebalancing

Be pragmatic
It doesn't always make sense to trade

Index Events

Research corporate actions/events to assess impact fully and manage risk

Trading

Determine the most cost-efficient approach

Scrip Dividends

Look for the Premium Cash versus stock

Derivatives

Used to overlay cash and synthesize full exposure to equity markets

Stock Lending

Can help offset costs and potentially add value

Core Beta Research

Continuously look for opportunities to improve and evolve implementation

ESG integration/screening to our portfolios.

Research Guides Trading Decisions Around Index Rebalances

Historical Value Add and
Turnover Analysis

Rebalance Review &
Liquidity Analysis

Discussion and Definition
of Trading Strategies

Implementation

Global Organised Trading (GOT)
Results for Index Rebalances¹

2015*: \$70M+

2016*: \$11M+

2017*: \$48M+

2018*: \$57M+

Through thoughtful trading we
have been able to achieve
better trading prices relative
to index effective date

Source: State Street Global Advisors. As of December 31, 2018. Figures in USD and approximate. This represents the aggregate gain/loss for both base and special situations.

* This includes MSCI, FTSE and S&P events. Only 2017 includes other ad-hoc intra-quarter dates.

Portfolio Rebalancing: Be Pragmatic

Example: S&P Quarterly Rebalance March 2019

	S&P500 Index	S&P400 Index	S&P600 Index
Rebalance Turnover	0.84%	1.92%	1.84%
Traded	0.46% approx. <small>(Typical State Street Global Advisors S&P500 portfolio)</small>	1.50% <small>(Typical State Street Global Advisors S&P400 portfolio)</small>	1.41% <small>(Typical State Street Global Advisors S&P600 portfolio)</small>
Reduction in Turnover	45%	22%	23%

By monitoring ex-ante tracking closely, we can avoid trading some of the smaller names of a given index rebalance. This **reduces the overall turnover** of a portfolio and also **reduces the transaction costs** associated with it.

Source: State Street Global Advisors. For illustrative purposes only.

Internal Crossing: A Powerful Source of Cost Savings & Liquidity

	Total Value ⁵	In-kind ⁴ /Internal Crossing/ Unit Crossing	Estimated Cost Savings ⁶	Transaction Cost Savings ⁶
US Market Case Study¹ (2016–2018)	\$129.1 Billion	92.1% of the Total	0.06% of the Total	\$71.3M
Non-US Developed Case Study² (2016–2018)	\$24.1 Billion	85.5% of the Total	0.23% of the Total	\$47.4M
Emerging Markets Case Study³ (2016–2018)	\$17.6 Billion	59.1% of the Total	0.35% of the Total	\$36.4M

Availability of internal crossing at State Street Global Advisors may be affected by your asset class, vehicle type, jurisdiction, or other factors.

¹ Based on actual client order flow trading activity in the S&P 500[®] Defined Contribution Commingled Fund.

² Based on actual client order flow trading activity in the Thrice-Monthly EAFE ERISA Commingled Funds.

³ Based on actual client order flow trading activity in the Thrice-Monthly Emerging Markets ERISA Commingled Funds.

⁴ In-kind transfers are redemptions/contributions made via security transfers.

⁵ For calendar years 2016–2018. It is not known whether similar results have been achieved after 2018.

⁶ This represents estimated average savings across all aggregate trading over the period. These estimates are based on subjective judgments and assumptions and do not reflect the effect of unforeseen economic and market factors on decision making. There is no guarantee that a particular client transaction will experience the same level of savings.

In fact, savings could differ substantially. Any savings is contingent upon other activity taking place on a given transaction day. Had other funds been selected, different results of transaction cost savings may have been achieved. All figures are in USD.

Derivatives and Other Exposures

While the goal is to remain fully invested in stocks & invest locally but... it may not be possible or the most pragmatic approach

Index Futures

Portfolios hold some residual cash to either to accommodate daily cash flows or because of dividend accruals

Futures provide a cost-efficient and liquid way of gaining exposure to the underlying index while minimizing cash drag and trading costs

Other Exposures

Investing locally is preferred; however, accessibility and cost in some markets can presents challenges

ADRs/GDRs or swaps can be used in place of locally listed securities

Source: State Street Global Advisors.

Securities Lending: Can Help Offset Costs and Potentially More

Securities Lending

Act of loaning a security for a specified period of time to generate additional income

Program Overview

Leading securities lending provider since 1974

Managed through State Street Securities Finance (SSSF):

- Lendable assets of \$3.8T
- 140+ borrower relationships
- Scale & market presence is attractive for high quality borrowers
- Manages quality of borrowers & collateral diversification

Focus on income generation in a risk controlled manner

Global coverage across equities and fixed income

~358 dedicated employees in 30+ international markets

As of December 31, 2018. Figures in USD. Updated annually. Securities lending programs and the subsequent reinvestment of the posted collateral are subject to a number of risks, including the risk that the value of the investments held in the collateral may decline in value and may at any point be worth less than the original cost of that investment.

Internal Liquidity: A Powerful Cost Saving Resource

Total Order Flows 2016–2018 \$151.32B

90% of the S&P 500 Index Strategy's cash flows traded at **low or zero cost***

Source: State Street Global Advisors.

* For the 3 most recent calendar years as of the slide creation date, 2016–2018. Data based on the weighted average results (by order volume) of a one or more of SSGA's commingled funds participating in crossing activities. The figures above relate to the Total Order Flow which represents investor-initiated contributions and redemptions into and out of participating funds. There is no guarantee that a particular client transaction will experience the same level of low cost trading. Low cost trading percentages are calculated by subtracting agency trades from total trades and then dividing by total trades. Availability of internal crossing at SSGA may be affected by your asset class, vehicle type, jurisdiction, or other factors.

¹ Unit crosses are transactions where client contributions/redemptions in a participating fund are matched with offsetting client contributions/redemptions in the same fund.

² Internal crosses are equity transactions for one SSGA managed fund that are matched, where possible, with offsetting equity transactions from other eligible SSGA managed funds.

³ Agency refers to SSGA trading in the market with a program desk (non-Algo). Figures in USD

Index Change Analysis — S&P 500[®] Index

2019 YTD

- 19 additions/deletions so far in 2019
- 13 additions/deletions were due to corporate actions and spin offs, 6 were due to securities being more representative of the mid-cap index (lack of representation)
- S&P 500 now contains 505 positions (but still 500 companies) after the additions of T-Mobile US Inc, MarketAxess Holdings, IDEX Corp, Leidos Holdings Inc, CDW Corp and NVR Inc

As of September 30, 2019.

¹ Returns greater than one year are annualized. Returns represent past performance and are not a guarantee of future results. Current performance may differ from the performance shown. Returns shown are asset — weighted using Composite member market values, where the Composite member's return calculations are time-weighted and reflect the reinvestment of dividends and other income. ² These performance figures are provided gross of fees and expenses other than actual trading fees and expenses, and reflect all items of income, gain, and loss. ³ These performance figures (i) are provided net of actual trading, audit, custody, administrative and legal fees and expenses; (ii) beginning on 9/30/2014, adjusted quarterly to reflect the highest investment management fee on the actual fee schedule, inclusive of incentive fee, if any, of any account within the Composite ("Management Fee") at the relevant time; prior to 9/30/2014, adjusted for an assumed investment management fee, which is equal to or higher than the Management Fee (except in each case certain small accounts-subject to a minimum investment management fee-may have incurred an actual investment management fee higher than that fee assumed in calculating the performance shown above); and (iii) reflect all items of income, gain and loss. ⁴ Index returns are unmanaged and do not reflect the deduction of any fees or expenses. Index returns reflect all items of income and the reinvestment of dividends (net of withholding tax rates) and other income and are calculated in US dollars. It is not possible to invest directly in an index. Performance returns are calculated in US dollars. Calculation for value added returns may show rounding differences. The above information is considered supplemental to the GIPS presentation for this Composite, which can be found in the Appendix or was previously presented. A GIPS presentation is also available upon request. gP-EAFE

gPASP500
² 5 portfolios or less. ** Less than 3 years.
 Quarterly and YTD returns are not annualized.

Investment Objective: The Strategy seeks an investment return that approximates as closely as practicable, before expenses, the performance of its benchmark index (the "Index") over the long term.

Investment Strategy: The Strategy is managed using an "indexing" investment approach, by which SSGA attempts to approximate, before expenses, the performance of the Index over the long term. SSGA will typically attempt to invest in the equity securities comprising the Index, in approximately the same proportions as they are represented in the Index. Equity securities may include common stocks, preferred stocks, depository receipts, or other securities convertible into common stock. The Strategy may purchase securities in their initial public offerings ("IPOs"). In some cases, it may not be possible or practicable to purchase all of the securities comprising the Index, or to hold them in the same weightings as they represent in the Index. In those circumstances, SSGA may employ a sampling or optimization technique to construct the portfolio in question. From time to time securities are added to or removed from the Index. SSGA may sell securities that are represented in the Index, or purchase securities that are not yet represented in the Index, prior to or after their removal or addition to the Index. The Strategy will not use futures or other derivatives to create "notional" or "synthetic" index exposures or engage in other transactions involving the use of derivatives in lieu of investment directly in the securities making up the Index. The Strategy's return may not match the return of the Index.

Footnotes

Firm Definition: For the purpose of complying with the Global Investment Performance Standards (GIPS®), the firm ("SSGA—Global") is defined as all portfolios managed across the global offices of State Street Global Advisors (SSGA) and SSGA Funds Management, Inc., with the exception of Charitable Asset Management which is held out to the marketplace as a distinct business entity. Prior to January 2011, SSGA—Global excluded its wrap fee business and assets accounted for on a book value basis (global cash and stable value assets). Prior to July 2017, SSGA—Global excluded Fiduciary Advisory Solutions. In January 2011, SSGA acquired the Bank of Ireland Asset Management Limited (now known as SSGA Ireland Limited), a GIPS Compliant firm. On January 01, 2012 SSGA Ireland Limited assets were merged into SSGA-Global. In July 2016, SSGA acquired the asset management and advisory services business conducted by GE Asset Management ("GEAM"), a GIPS Compliant firm. On July 01, 2017 GEAM assets were merged into SSGA-Global.

Composite Description: The Composite seeks to achieve the Investment Objective described below using the Investment Strategy described below.

Compliance Statement: SSGA-Global claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with GIPS. SSGA—Global claims compliance with the GIPS standards from January 01, 2000. The period prior to January 01, 2000 (where shown) is not in compliance, as not all actual fee-paying portfolios are in a composite. SSGA-Global has been independently verified for the periods January 01, 2000 through December 31, 2017. GE Asset Management (GEAM) was not independently verified for the calendar year 2016 while transitioning into the firm. The verification report is available upon request. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation.

List Available: A complete list of the firm's composites and their descriptions is available upon request.

Currency: Performance is presented in USD.

Creation Date: The composite was created on January 01, 2009.

Benchmark Description: The benchmark for the composite is the S&P 500 Index. Index returns are unmanaged and do not reflect the deduction of any fees or expenses but include all items of income, gain, and loss.

Use of Subadvisors: This composite contains portfolios that were managed on a sub-advised basis for the period from September 01, 2002 to August 31, 2008.

Fees: Returns are expressed gross of management fees. The results do not reflect the deduction of investment management fees. Some members of this composite may accrue administration fees. The client's return will be reduced by the management fee. For example, if an annualized gross return of 10% was achieved over a 5-year period and a management fee of 1% per year was charged and deducted annually, then the resulting total return would be reduced from 61% to 54%.

Fee Schedule: Management fees are 0.030% of the first \$50,000,000; 0.020% of the next \$50,000,000; and 0.020% thereafter for a commingled fund; and 0.050% of the first \$50,000,000; 0.040% of the next \$50,000,000; and 0.020% thereafter for separately managed accounts. The minimum annual management fee for a separately managed accounts is \$175,000. Management fees may be adjusted based upon specific client requirements.

Derivatives Use: SSGA may use futures and other derivatives from time to time in the management of the Strategy generally as a temporary substitute for cash investments or for hedging purposes and not with the purpose of creating investment leverage.

Calculation Methodology: Additional information is available upon request regarding the firm's policies and procedures for calculating and reporting performance results as well as valuation procedures.

Annualized Returns: All returns for periods greater than one year have been annualized.

Withholding Taxes Differences: None.

Exchange Rates Differences Between Composite & Benchmark: None.

Minimum Asset Level for Inclusion: 0

Dispersion: Asset-Weighted standard deviation is calculated using the annual returns of the accounts that were included in the composite for all periods of the year and is not presented for periods with 5 or fewer accounts in the composite for the full year.

Significant Events: In May 2010, Lynn Blake assumed the role as global head of Index Equity following the retirement of Paul Brakke. In July 2014, on the departure of Maria Dwyer, Matt Steinaway was named interim Chief Risk Officer. Matt replaced Maria Dwyer, who was appointed to the leadership team of the Office of Regulatory Initiatives Oversight. In November 2014, David Sautnier was appointed as Chief Risk Officer for SSGA, replacing Matt Steinaway. Matt Steinaway resumed his position as Head of Global Cash Management. In March 2015, Timothy Corbett was appointed Head of Global Investment Risk replacing Fred Gjerstad who has since left the firm. In March 2015, Ronald O' Hanley was appointed CEO and President of State Street Global Advisors replacing Scott Powers who retired. In June 2015, Greg Ehret was named President continuing to report to Ron O'Hanley, chief executive officer of SSGA. In August 2015, Matt Steinaway was appointed as Chief Risk Officer for SSGA, replacing David Sautnier who has since left the firm. In December 2015, Ronald O' Hanley, Chief Executive Officer of SSGA, re-assumed the role of President of the company upon the departure of Greg Ehret. Steven Lipiner was appointed Chief Financial Officer replacing Keith Crawford who was appointed head of global mergers and acquisitions. On March 30, 2016, SSGA agreed to acquire GE Asset Management (GEAM). The transaction was finalized on July 01, 2016. In July 2016, Ralph Layman became Vice Chairman of SSGA. Jay Hooley retired as CEO of State Street Corporation at the end of 2018, succeeded by Ron O' Hanley who was also appointed President and COO. Cyrus Taraporevala became President and CEO of State Street Global Advisors.

Past and Future Performance: Historic performance is not necessarily indicative of actual future investment performance, which could differ substantially.

Appendix B: Important Disclosures

Important Disclosures

FOR INVESTMENT PROFESSIONAL USE ONLY.

Past performance is not an indicator of future results. Diversification does not ensure a profit or guarantee against loss.

Passively managed strategies seek to replicate the performance of a specified index. The strategy is passively managed and may underperform its benchmarks. An investment in the strategy is not appropriate for all investors and is not intended to be a complete investment program. Investing in the strategy involves risks, including the risk that investors may receive little or no return on the investment or that investors may lose part or even all of the investment.

Equity securities are volatile and can decline significantly in response to broad market and economic conditions.

Investments in emerging or developing markets may be more volatile and less liquid than investing in developed markets and may involve exposure to economic structures that are generally less diverse and mature and to political systems which have less stability than those of more developed countries.

Foreign investments involve greater risks than US investments, including political and economic risks and the risk of currency fluctuations. Investing in foreign domiciled securities may involve risk of capital loss from unfavorable fluctuation in currency values, withholding taxes, from differences in generally accepted accounting principles or from economic or political instability in other nations.

These investments may have difficulty in liquidating an investment position without taking a significant discount from current market value, which can be a significant problem with certain lightly traded securities.

Currency Risk is a form of risk that arises from the change in price of one currency against another. Whenever investors or companies have assets or business operations across national borders, they face currency risk if their positions are not hedged.

Companies with large market capitalizations go in and out of favor based on market and economic conditions. Larger companies tend to be less volatile than companies with smaller market capitalizations. In exchange for this potentially lower risk, the value of the security may not rise as much as companies with smaller market capitalizations.

Investments in mid-sized companies may involve greater risks than in those of larger, better known companies, but may be less volatile than investments in smaller companies.

Receive and File Investment Performance Results for the ATU, IBEW and Salaried Employee Retirement Plans for the Quarter Ended September 30, 2019 (AFSCME). (Adelman)

RECOMMENDED ACTION

Motion: Receive and File Investment Performance Results for the ATU, IBEW and Salaried Employee Retirement Plans for the Quarter Ended September 30, 2019 (AFSCME). (Adelman)

FISCAL IMPACT

None.

DISCUSSION

Pension funds are invested consistent with the Statement of Investment Objectives and Policy Guidelines adopted by each Retirement Board. Attached are the two investment performance reports prepared by the Boards' pension investment consultants. The first report is the Third Quarter 2019 Market Update (Attachment 1) and the second is the Investment Measurement Service Quarterly Review as of September 30, 2019 (Attachment 2). These reports provide a detailed analysis of the performance of each of the investment managers retained by the Retirement Boards to manage the Retirement Funds for the quarter ended September 30, 2019. The second report compares the performance of each investment manager with benchmark indices, other fund managers of similarly invested portfolios and other indices.

Investment Compliance Monitoring

In accordance with the Statement of Investment Objectives and Policy Guidelines for the Sacramento Regional Transit District Retirement Plans (Investment Policy), State Street Bank performs daily investment compliance monitoring on the Plans' three (3) actively managed funds. As of September 30, 2019, there were no compliance warnings or alerts to be reported; therefore, the investments are in compliance with the Investment Policy. The final attached report includes the monitoring summary (Attachment 3).

Economic Commentary

Third Quarter 2019

Quarterly Real GDP Growth

Inflation Year-Over-Year

Central bank policy front and center

- The Fed was alone on a path to normalize interest rates, with nine rate hikes in two years; euro zone sat out. Fed reversed course and adopted dovish tone in January. Rates held constant through Q2; cut rates twice in Q3, and most recently in October.

Rest of the global economy is slowing, but U.S. remains strong, labor market very tight, reaching the limits of full employment

- Solid Q1 GDP growth (3.2%) moderated in Q2 (2.0%), but held up surprisingly well in Q3 (1.9%), despite slowing global growth and trade uncertainty.
- Switch to dovish Fed policy boosted consumer and business confidence, and juiced stock market; drop in borrowing costs expected to sustain consumption growth and soften slowdown.
- Policy reversal simultaneously stoked fears of coming slowdown and fed a rally in bonds, which are having an “outlier” year.

Inflation remains stuck below 2% in U.S., weaker overseas

- Wage pressures in U.S. have yet to translate into headline inflation; low inflation gives Fed cover to cut rates.

Bloomberg TIPS:

U.S. Equity Performance

Defensive sectors prevailed

- Ongoing trade tension, earnings and interest rate uncertainty, and the global political landscape continued to drive investor unease.
- Utilities, Real Estate, and Consumer Staples were top performers in response to continued flight to quality.

Large caps posted modest gains

- Leading up to September, low-vol and momentum stocks had outperformed as investors shunned the cheapest quintile, more volatile stocks.
- Trend sharply reversed in early September as the 10-year Treasury yield rose from 1.46% to 1.73%; defensive stocks can be dependent upon yields falling.

Value and Growth mixed across capitalizations

- While value continues to trail growth year-to-date, it gained ground during September’s factor reversal, finishing the quarter essentially in line with growth within large cap stocks.

Non-U.S. Equity Performance

Trade war and no-deal Brexit fears turned non-U.S. markets negative

- U.K. declined on attempted suspension of Parliament and no-deal Brexit proclamations.
- Germany’s recession fears drove country to biggest annual decline in nine years.
- Hong Kong fell 11.9% as protests continued; Japan was bright spot as low rates remained unchanged and resolution to Japan/South Korea trade war looked more promising.

Defensive sectors prevailed

- Cyclical sectors trailed as investors were positioned defensively; Energy (-6.5%) was biggest laggard on oil price decline.
- Factor performance favored quality and low vol, reflecting cautious investor behavior.

Currencies declined vs. U.S. dollar

- Major developed market currencies declined vs. the dollar despite lowering of Fed funds rate; U.S. remains dominant provider of safe assets.

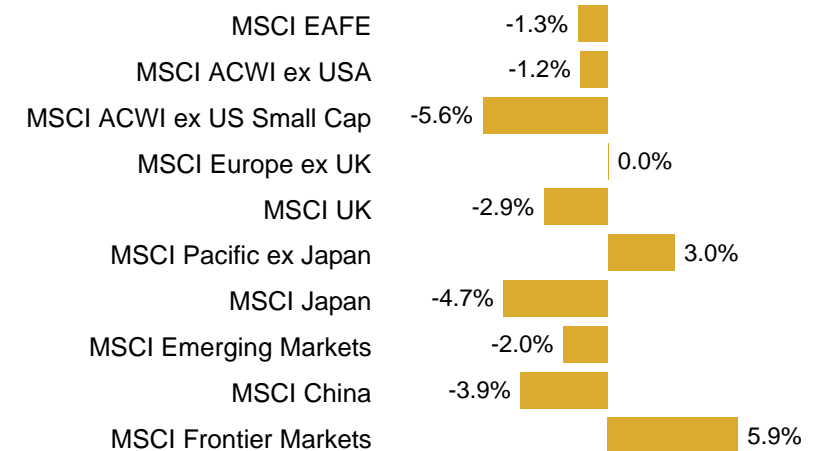

EM worst-performing region

- Global uncertainty weighed heavily on EM countries.
- EM currencies suffered from strong dollar.
- EM growth (-2.04%) outpaced EM value (-6.48%) given Tech sector spike (+5.63%).

U.S. Fixed Income Performance

Rates rallied on trade tensions and geopolitical uncertainty

- Treasuries returned 2.4% as rates fell across the yield curve.
- While 2- and 10-year key rates remained positive, spread between the 90-day and 10-year key rates remained inverted.
- Long Treasuries soared (+7.9%) as 30-year yields fell roughly 40 bps.
- Nominal Treasuries outperformed TIPS as inflation expectations continued to fall; 10-year breakeven spreads were 1.53% as of quarter-end, down from 1.69% as of June 30.

Investment Grade Corporate was quiet, but High Yield told two stories

- Investment grade corporate credit spreads were range-bound, but their yield advantage was enough to generate positive excess returns versus like-duration Treasuries.
- BB-rated corporates (+2.0%) outperformed CCC-rated corporates (-1.8%).
- BB and B-rated spreads narrowed slightly, but the rally in rates helped drive outperformance as a result of higher-quality bonds' greater sensitivity to interest rate movements.
- CCC-rated bond spreads widened significantly, representing some concern about deteriorating quality at the lower-end of the spectrum.

Yield Curve Flattens While Global Rates Diverge

U.S. Treasury Yield Curves

10-Year Global Government Bond Yields

Treasury yield curve has inverted from 90-day T-bill through the 10-year T-note

- Yields have fallen more than 100 bps on the long end from one year ago.
- Inverted yield curve has presaged most recessions in past 70 years.
- Yield curve inverted from 2- to 10-year notes in August, but has wavered through the end of September.

U.S. yields diverged further in 2017 as monetary policies fell out of sync

- U.S. tightened for two years while euro zone waited.
- U.S. has now paused and has reversed course with two rate cuts so far in 2019, one each in Q2 and Q3.
- Euro zone will skip tightening entirely in this cycle; U.S. spread remains very wide.

*Current quarter target = 35% Bloomberg Barclays Aggregate Index, 32% S&P 500 Index, 8% Russell 2000 Index, 14% MSCI EAFE Index, 5% MSCI EAFE Small Cap Index, and 6% MSCI Emerging Markets Index.

U.S. EQUITY

U.S. equity markets posted mixed results amid a market that saw 30-year Treasury yields hit historic lows and the most meaningful, albeit short-lived, factor rotation among equities since the Global Financial Crisis (GFC). Large cap (+1.4%) and mid cap stocks (+0.5%) posted modest gains for the quarter while small caps declined (Russell 2000: -2.4%). Ongoing U.S.-China trade tension, earnings and interest rate uncertainty, and the global political landscape continued to drive investor uncertainty.

Large Cap U.S. Equity (S&P 500: +1.7%; Russell 1000: +1.4%)

- Top sectors were in defensive areas including Utilities (+9.3%), Real Estate (+7.7%), and Consumer Staples (+6.1%) in response to investors' continued flight to quality.
- Energy, hurt by falling oil prices, fell 6.3%; Health Care lagged (-2.2%) amid discussions around price transparency and pricing reform by U.S. presidential candidates.
- Cyclical sector exposure has been volatile given uncertainty around the trade deal (and continued sideways movement of markets) along with slowed global growth.
- Up to September, momentum stocks (which have shifted to include many of the market's least volatile stocks) outperformed as investors shunned the cheapest quintile of value (and more volatile) stocks. This trend sharply reversed in early September as the 10-year Treasury yield rose from 1.46% to 1.73% and momentum stocks fell precipitously while value stocks traded up over the course of two days. The magnitude of the reversal gave a boost to value stocks across market capitalizations for the quarter.

Growth vs. Value (Russell 1000 Value: +1.4%, Russell 1000 Growth: +1.5%; Russell 2000 Value: -0.6%, Russell 2000 Growth: -4.2%)

- While value continues to trail growth year-to-date, it gained ground during September's factor reversal, finishing the quarter essentially in line with growth within large caps.
- Within small cap, value benefited as investors favored the cheapest 20% of small caps while the most expensive quintile within the Russell 2000 declined double digits.

S&P Sector Returns, Quarter Ended September 30, 2019

Source: Standard & Poor's

NON-U.S./GLOBAL EQUITY

Global equity markets turned negative in the third quarter. After more modest positive results in the second quarter, fears over continued trade war impacts, a no-deal Brexit, and a potential global slowdown impacted investor behavior. Given this backdrop, more defensive areas of the market outperformed.

Global/Non-U.S. Developed (MSCI EAFE: -1.1%; MSCI World ex USA: -0.9%; MSCI ACWI ex USA: -1.8%; MSCI Hong Kong: -11.9%; MSCI Japan: +3.1%)

- Boris Johnson's attempted suspension of Parliament and no-deal Brexit proclamations weighed on U.K. stocks (-2.5%).
- Germany (-4.0%) experienced recession fears; industrial production dropped 1.5% in June from the prior month, while the estimate was -0.5%.
- Hong Kong protests proved to be a headwind as the market fell -11.9% over the three-month period.
- Japan was one of the few bright spots within developed markets as low short-term interest rates remain unchanged and a resolution to the Japan/South Korea trade war looked more promising.
- Cyclical sectors trailed as investors were positioned defensively; Energy (-6.5%) had the worst performance.
- For the quarter, factor performance reflected cautious investor behavior as quality and low volatility did well. However, the month of September saw a brief recovery in value across all markets as trade talks improved and central banks eased.

Emerging Markets (MSCI Emerging Markets Index: -4.2%)

- Emerging markets fared worst among global markets; uncertainty weighed heavily on these volatile countries.
- Though most emerging market countries fell during the quarter, Turkey (+11.7%) had strong results as its central bank cut rates two times in less than two months.
- Factor performance in emerging markets favored quality and price momentum as investors moved toward safe assets.

Non-U.S. Small Cap (MSCI World ex USA Small Cap: -0.3%; MSCI EM Small Cap: -4.6%; MSCI ACWI ex USA Small Cap: -1.2%)

- Small cap marginally outperformed large cap, both in developed and all country ex-U.S. markets; despite overall defensive posturing, idiosyncratic businesses pushed past global market issues.
- Japan (+4.0%) helped drive developed returns as small cap companies also benefited from low rates and resolved trade tensions; Hong Kong (-7.6%) detracted as local businesses were hurt by the protests.

FIXED INCOME

The Federal Open Market Committee (FOMC) cut short-term interest rates by 25 basis points twice in the third quarter amid an economic backdrop that has been supported by strong consumer spending and a solid labor market, but challenged by weakening manufacturing data and business investment. The Fed chair stated that the FOMC would act as “appropriate to sustain the expansion,” and the European Central Bank and other central banks around the world also moved in the direction of easing monetary policy. Yields fell in the U.S. and abroad given global growth headwinds fueled by mounting trade tensions as well as geopolitical uncertainty.

U.S. Fixed Income (Bloomberg Barclays US Aggregate Bond Index: +2.3%)

- Treasuries returned 2.4% as rates fell across the yield curve.
- While the widely monitored 2- and 10-year key rates remained positive, the spread between the 3-month and 10-year key rates remained inverted.
- Long Treasuries soared (+7.9%) as 30-year yields fell roughly 40 bps.
- Nominal Treasuries outperformed TIPS as inflation expectations continued to fall; 10-year breakeven spreads were 1.53% as of quarter-end, down from 1.69% as of June 30. The 10-year real yield dipped briefly into negative territory in early September.

Investment Grade Corporates (Bloomberg Barclays Corporate: +3.1%)

- Investment grade corporate credit spreads were range-bound, but their yield advantage was enough to generate positive excess returns versus like-duration Treasuries.
- Issuance in the corporate bond market was \$320 billion in the quarter, \$50 billion higher than a year ago; demand remained solid. BBB-rated corporates (+3.1%) modestly outperformed A-rated or higher corporates (+3.0%).

High Yield (Bloomberg Barclays Corporate High Yield: +1.3%)

- BB-rated corporates (+2.0%) outperformed CCC-rated corporates (-1.8%). BB- and B-rated spreads narrowed slightly, but the rally in rates helped drive outperformance as a result of higher quality bonds’ greater sensitivity to interest rate movements.
- CCC-rated bond spreads widened significantly, representing some concern about deteriorating quality at the lower-end of the spectrum.

Leveraged Loans (CS Leveraged Loans: +0.9%)

- Bank loans, which have floating rate coupons, underperformed high yield bonds as rates rallied and investors worried about deteriorating credit quality.
- CLO issuance continued to exceed expectations, providing positive technical support to the leveraged loan market.

U.S. Fixed Income: Quarterly Returns

U.S. Fixed Income: One-Year Returns

U.S. Treasury Yield Curves

Sources: Bloomberg, Bloomberg Barclays, Credit Suisse

NON-U.S. FIXED INCOME

Global Fixed Income (Bloomberg Barclays Global Aggregate (unhedged): +0.7%; (hedged): +2.6%)

- Developed market sovereign bond yields rallied, pushing European sovereigns further into negative territory as the ECB reduced its deposit rate and announced a new bond purchasing stimulus program.
- Negative yielding debt totals nearly \$17 trillion, a record high.
- The U.S. dollar was up 3.4% versus a basket of trade partner currencies and up 4.3% vs the beleaguered euro.

US\$ EMD (JPM EMBI Global Diversified: +1.5%), **Local Currency EMD** (JPM GBI-EM Global Diversified: -0.8%)

- Broadly, emerging market currencies depreciated versus the U.S. dollar, hampering local currency returns.
- Within the dollar-denominated benchmark, Argentina (-42%) and Venezuela (-51%) were among the few to post negative returns. Conversely, returns in the local debt benchmark were more mixed with Turkey (+19%) and Argentina (-60%) being outliers.

Quarterly Total Fund Relative Attribution - September 30, 2019

The following analysis approaches Total Fund Attribution from the perspective of relative return. Relative return attribution separates and quantifies the sources of total fund excess return relative to its target. This excess return is separated into two relative attribution effects: Asset Allocation Effect and Manager Selection Effect. The Asset Allocation Effect represents the excess return due to the actual total fund asset allocation differing from the target asset allocation. Manager Selection Effect represents the total fund impact of the individual managers excess returns relative to their benchmarks.

Current Holdings Based Style Analysis Domestic Equity As of September 30, 2019

This page analyzes the current investment style of a portfolio utilizing a detailed holdings-based style analysis to determine actual exposures to various market capitalization and style segments of the domestic equity market. The market is segmented quarterly by capitalization and style. The capitalization segments are dictated by capitalization decile breakpoints. The style segments are determined using the "Combined Z Score", based on the eight fundamental factors used in the MSCI stock style scoring system. The upper-left style map illustrates the current market capitalization and style score of the portfolio relative to indices and/or peers. The upper-right style exposure matrix displays the current portfolio and index weights and stock counts (in parentheses) in each capitalization/style segment of the market. The middle chart illustrates the total exposures and stock counts in the three style segments, with a legend showing the total growth, value, and "combined Z" (growth - value) scores. The bottom chart exhibits the sector weights as well as the style weights within each sector.

Historical Holdings Based Style Analysis

Large Cap

For Five Years Ended September 30, 2019

This page analyzes the historical investment style of a portfolio utilizing a detailed holdings-based style analysis to determine average actual exposures to various market capitalization and style segments of the domestic equity market. The market is segmented quarterly by capitalization and style. The capitalization segments are dictated by capitalization decile breakpoints. The style segments are determined using the "Combined Z Score", based on the eight fundamental factors used in the MSCI stock style scoring system. The upper-left style map illustrates the average historical market capitalization and style score of the portfolio relative to indices and/or peers. The upper-right style exposure matrix displays the average historical portfolio and index weights and stock counts (in parentheses) in each capitalization/style segment of the market. The next two style exposure charts illustrate the actual quarterly cap/style and style only segment exposures of the portfolio through history.

SSgA S&P 500 Equity Characteristics Analysis Summary

Portfolio Characteristics

This graph compares the manager's portfolio characteristics with the range of characteristics for the portfolios which make up the manager's style group. This analysis illustrates whether the manager's current holdings are consistent with other managers employing the same style.

Portfolio Characteristics Percentile Rankings Rankings Against Callan Large Cap Core as of September 30, 2019

Sector Weights

The graph below contrasts the manager's sector weights with those of the benchmark and median sector weights across the members of the peer group. The magnitude of sector weight differences from the index and the manager's sector diversification are also shown. Diversification by number and concentration of holdings are also compared to the benchmark and peer group. Issue Diversification represents by count, and Diversification Ratio by percent, the number of holdings that account for half of the portfolio's market value.

Atlanta Capital Period Ended September 30, 2019

Investment Philosophy

Atlanta believes that high quality companies produce consistently increasing earnings and dividends, thereby providing attractive returns with moderate risk over the long-term. Returns prior to 6/30/2010 are linked to a composite history.

Quarterly Summary and Highlights

- Atlanta Capital's portfolio posted a 2.80% return for the quarter placing it in the 1 percentile of the Callan Small Capitalization group for the quarter and in the 3 percentile for the last year.
- Atlanta Capital's portfolio outperformed the Russell 2000 Index by 5.20% for the quarter and outperformed the Russell 2000 Index for the year by 13.65%.

Atlanta Capital Equity Characteristics Analysis Summary

Portfolio Characteristics

This graph compares the manager's portfolio characteristics with the range of characteristics for the portfolios which make up the manager's style group. This analysis illustrates whether the manager's current holdings are consistent with other managers employing the same style.

Portfolio Characteristics Percentile Rankings Rankings Against Callan Small Capitalization as of September 30, 2019

Sector Weights

The graph below contrasts the manager's sector weights with those of the benchmark and median sector weights across the members of the peer group. The magnitude of sector weight differences from the index and the manager's sector diversification are also shown. Diversification by number and concentration of holdings are also compared to the benchmark and peer group. Issue Diversification represents by count, and Diversification Ratio by percent, the number of holdings that account for half of the portfolio's market value.

Current Holdings Based Style Analysis

Atlanta Capital

As of September 30, 2019

This page analyzes the current investment style of a portfolio utilizing a detailed holdings-based style analysis to determine actual exposures to various market capitalization and style segments of the domestic equity market. The market is segmented quarterly by capitalization and style. The capitalization segments are dictated by capitalization decile breakpoints. The style segments are determined using the "Combined Z Score", based on the eight fundamental factors used in the MSCI stock style scoring system. The upper-left style map illustrates the current market capitalization and style score of the portfolio relative to indices and/or peers. The upper-right style exposure matrix displays the current portfolio and index weights and stock counts (in parentheses) in each capitalization/style segment of the market. The middle chart illustrates the total exposures and stock counts in the three style segments, with a legend showing the total growth, value, and "combined Z" (growth - value) scores. The bottom chart exhibits the sector weights as well as the style weights within each sector.

Country Allocation

International Equity VS Intl Eq - Benchmark Characteristics

Country Allocation

The chart below contrasts the portfolio's country allocation with that of the index as of September 30, 2019. This chart is useful because large deviations in country allocation relative to the index are often good predictors of tracking error in the subsequent quarter. To the extent that the portfolio allocation is similar to the index, the portfolio should experience more "index-like" performance. In order to illustrate the performance effect on the portfolio and index of these country allocations, the individual index country returns are also shown.

Pyrford

Period Ended September 30, 2019

Investment Philosophy

Pyrford's investment strategy is based on a value-driven, absolute return approach, with both top-down and bottom-up elements. At the country level they seek to invest in countries that offer an attractive market valuation relative to their long-term prospects. At the stock level they identify companies that offer excellent value relative to in-house forecasts of long-term (5 years) earnings growth. This approach is characterized by low absolute volatility and downside protection. Returns prior to 6/30/2017 are linked to a composite history.

Quarterly Summary and Highlights

- Pyrford's portfolio posted a (0.89)% return for the quarter placing it in the 37 percentile of the Callan Non-US Developed Core Equity group for the quarter and in the 12 percentile for the last year.
- Pyrford's portfolio outperformed the MSCI EAFE Index by 0.18% for the quarter and outperformed the MSCI EAFE Index for the year by 3.01%.

AQR Equity Characteristics Analysis Summary

Portfolio Characteristics

This graph compares the manager's portfolio characteristics with the range of characteristics for the portfolios which make up the manager's style group. This analysis illustrates whether the manager's current holdings are consistent with other managers employing the same style.

Portfolio Characteristics Percentile Rankings Rankings Against Callan International Small Cap as of September 30, 2019

Sector Weights

The graph below contrasts the manager's sector weights with those of the benchmark and median sector weights across the members of the peer group. The magnitude of sector weight differences from the index and the manager's sector diversification are also shown. Diversification by number and concentration of holdings are also compared to the benchmark and peer group. Issue Diversification represents by count, and Diversification Ratio by percent, the number of holdings that account for half of the portfolio's market value.

Current Holdings Based Style Analysis

AQR

As of September 30, 2019

This page analyzes the current investment style of a portfolio utilizing a detailed holdings-based style analysis to determine actual exposures to various regional and style segments of the international/global equity market. The market is segmented quarterly by region and style. The style segments are determined using the "Combined Z Score", based on the eight fundamental factors used in the MSCI stock style scoring system. The upper-left chart illustrates the current market capitalization and style score of the portfolio relative to indices and/or peers. The upper-right style exposure matrix displays the current portfolio and index weights and stock counts (in parentheses) in each region/style segment of the market. The middle chart illustrates the total exposures and stock counts in the three style segments, with a legend showing the total growth, value, and "combined Z" (growth - value) scores. The bottom chart exhibits the sector weights as well as the style weights within each sector.

Country Allocation AQR VS MSCI EAFE Small Cap Index

Country Allocation

The chart below contrasts the portfolio's country allocation with that of the index as of September 30, 2019. This chart is useful because large deviations in country allocation relative to the index are often good predictors of tracking error in the subsequent quarter. To the extent that the portfolio allocation is similar to the index, the portfolio should experience more "index-like" performance. In order to illustrate the performance effect on the portfolio and index of these country allocations, the individual index country returns are also shown.

Metropolitan West Period Ended September 30, 2019

Investment Philosophy

Metropolitan West Asset Management (MWAM) attempts to add value by limiting duration, managing the yield curve, rotating among bond market sectors and using proprietary quantitative valuation techniques.

Quarterly Summary and Highlights

- Metropolitan West's portfolio posted a 3.16% return for the quarter placing it in the 1 percentile of the Callan Core Plus Fixed Income group for the quarter and in the 5 percentile for the last year.
- Metropolitan West's portfolio outperformed the Bloomberg Aggregate Index by 0.89% for the quarter and outperformed the Bloomberg Aggregate Index for the year by 1.60%.

Quarterly Asset Growth

Beginning Market Value	\$106,435,396
Net New Investment	\$0
Investment Gains/(Losses)	\$3,358,810
Ending Market Value	\$109,794,206

Metropolitan West Return Analysis Summary

Return Analysis

The graphs below analyze the manager's return on both a risk-adjusted and unadjusted basis. The first chart illustrates the manager's ranking over different periods versus the appropriate style group. The second chart shows the historical quarterly and cumulative manager returns versus the appropriate market benchmark. The last chart illustrates the manager's ranking relative to their style using various risk-adjusted return measures.

Metropolitan West Risk Analysis Summary

Risk Analysis

The graphs below analyze the risk or variation of a manager's return pattern. The first scatter chart illustrates the relationship, called Excess Return Ratio, between excess return and tracking error relative to the benchmark. The second chart shows tracking error patterns versus the benchmark over time. The last two charts show the ranking of the manager's risk statistics versus the peer group.

Metropolitan West Bond Characteristics Analysis Summary

Portfolio Characteristics

This graph compares the manager's portfolio characteristics with the range of characteristics for the portfolios which make up the manager's style group. This analysis illustrates whether the manager's current holdings are consistent with other managers employing the same style.

Fixed Income Portfolio Characteristics Rankings Against Callan Core Plus Fixed Income as of September 30, 2019

Sector Allocation and Quality Ratings

The first graph compares the manager's sector allocation with the average allocation across all the members of the manager's style. The second graph compares the manager's weighted average quality rating with the range of quality ratings for the style.

Metropolitan West Portfolio Characteristics Summary As of September 30, 2019

Portfolio Structure Comparison

The charts below compare the structure of the portfolio to that of the index from the three perspectives that have the greatest influence on return. The first chart compares the two portfolios across sectors. The second chart compares the duration distribution. The last chart compares the distribution across quality ratings.

Duration Distribution

Quality Distribution

Risk/Reward Statistics

The risk statistics used in this report examine performance characteristics of a manager or a portfolio relative to a benchmark (market indicator) which assumes to represent overall movements in the asset class being considered. The main unit of analysis is the excess return, which is the portfolio return minus the return on a risk free asset (3 month T-Bill).

Alpha measures a portfolio's return in excess of the market return adjusted for risk. It is a measure of the manager's contribution to performance with reference to security selection. A positive alpha indicates that a portfolio was positively rewarded for the residual risk which was taken for that level of market exposure.

Beta measures the sensitivity of rates of portfolio returns to movements in the market index. A portfolio's beta measures the expected change in return per 1% change in the return on the market. If a beta of a portfolio is 1.5, a 1 percent increase in the return on the market will result, on average, in a 1.5 percent increase in the return on the portfolio. The converse would also be true.

Downside Risk stems from the desire to differentiate between "good risk" (upside volatility) and "bad risk" (downside volatility). Whereas standard deviation punishes both upside and downside volatility, downside risk measures only the standard deviation of returns below the target. Returns above the target are assigned a deviation of zero. Both the frequency and magnitude of underperformance affect the amount of downside risk.

Excess Return Ratio is a measure of risk adjusted relative return. This ratio captures the amount of active management performance (value added relative to an index) per unit of active management risk (tracking error against the index.) It is calculated by dividing the manager's annualized cumulative excess return relative to the index by the standard deviation of the individual quarterly excess returns. The Excess Return Ratio can be interpreted as the manager's active risk/reward tradeoff for diverging from the index when the index is mandated to be the "riskless" market position.

Information Ratio measures the manager's market risk-adjusted excess return per unit of residual risk relative to a benchmark. It is computed by dividing alpha by the residual risk over a given time period. Assuming all other factors being equal, managers with lower residual risk achieve higher values in the information ratio. Managers with higher information ratios will add value relative to the benchmark more reliably and consistently.

R-Squared indicates the extent to which the variability of the portfolio returns are explained by market action. It can also be thought of as measuring the diversification relative to the appropriate benchmark. An r-squared value of .75 indicates that 75% of the fluctuation in a portfolio return is explained by market action. An r-squared of 1.0 indicates that a portfolio's returns are entirely related to the market and it is not influenced by other factors. An r-squared of zero indicates that no relationship exists between the portfolio's return and the market.

Relative Standard Deviation is a simple measure of a manager's risk (volatility) relative to a benchmark. It is calculated by dividing the manager's standard deviation of returns by the benchmark's standard deviation of returns. A relative standard deviation of 1.20, for example, means the manager has exhibited 20% more risk than the benchmark over that time period. A ratio of .80 would imply 20% less risk. This ratio is especially useful when analyzing the risk of investment grade fixed-income products where actual historical durations are not available. By using this relative risk measure over rolling time periods one can illustrate the "implied" historical duration patterns of the portfolio versus the benchmark.

Residual Portfolio Risk is the unsystematic risk of a fund, the portion of the total risk unique to the fund (manager) itself and not related to the overall market. This reflects the "bets" which the manager places in that particular asset market. These bets may reflect emphasis in particular sectors, maturities (for bonds), or other issue specific factors which the manager considers a good investment opportunity. Diversification of the portfolio will reduce or eliminate the residual risk of that portfolio.

Risk/Reward Statistics

Rising Declining Periods refer to the sub-asset class cycles vis-a-vis the broader asset class. This is determined by evaluating the cumulative relative sub-asset class index performance to that of the broader asset class index. For example, to determine the Growth Style cycle, the S&P 500 Growth Index (sub-asset class) performance is compared to that of the S&P 500 Index (broader asset class).

Sharpe Ratio is a commonly used measure of risk-adjusted return. It is calculated by subtracting the "risk-free" return (usually 3 Month Treasury Bill) from the portfolio return and dividing the resulting "excess return" by the portfolio's risk level (standard deviation). The result is a measure of return gained per unit of risk taken.

Sortino Ratio is a downside risk-adjusted measure of value-added. It measures excess return over a benchmark divided by downside risk. The natural appeal is that it identifies value-added per unit of truly bad risk. The danger of interpretation, however, lies in these two areas: (1) the statistical significance of the denominator, and (2) its reliance on the persistence of skewness in return distributions.

Standard Deviation is a statistical measure of portfolio risk. It reflects the average deviation of the observations from their sample mean. Standard deviation is used as an estimate of risk since it measures how wide the range of returns typically is. The wider the typical range of returns, the higher the standard deviation of returns, and the higher the portfolio risk. If returns are normally distributed (ie. has a bell shaped curve distribution) then approximately 2/3 of the returns would occur within plus or minus one standard deviation from the sample mean.

Total Portfolio Risk is a measure of the volatility of the quarterly excess returns of an asset. Total risk is composed of two measures of risk: market (non-diversifiable or systematic) risk and residual (diversifiable or unsystematic) risk. The purpose of portfolio diversification is to reduce the residual risk of the portfolio.

Tracking Error is a statistical measure of a portfolio's risk relative to an index. It reflects the standard deviation of a portfolio's individual quarterly or monthly returns from the index's returns. Typically, the lower the Tracking Error, the more "index-like" the portfolio.

Treynor Ratio represents the portfolio's average excess return over a specified period divided by the beta relative to its benchmark over that same period. This measure reflects the reward over the risk-free rate relative to the systematic risk assumed.

Note: Alpha, Total Risk, and Residual Risk are annualized.

Research and Educational Programs

The Callan Institute provides research to update clients on the latest industry trends and carefully structured educational programs to enhance the knowledge of industry professionals. Visit www.callan.com/library to see all of our publications, and www.callan.com/blog to view our blog “Perspectives.” For more information contact Barb Gerraty at 415-274-3093 / institute@callan.com.

New Research from Callan’s Experts

[DTS Offers Some Key Advantages for Evaluating Fixed Income Portfolios](#)

This paper describes duration times spread (DTS), which measures systematic credit-spread risk exposure. DTS estimates the return of any bond, by percentage, if its spread were to change from the current level, all else equal. DTS offers several advantages for monitoring risk in credit portfolios over other methods.

[2019 ESG Survey](#) | Callan’s seventh annual survey assessing the status of environmental, social, and governance (ESG) investing in the U.S. institutional investment market.

[Callan’s DC Index in Detail](#) | A video about the Callan DC Index™: why we started it, what it measures, and how it can benefit defined contribution plan sponsors.

[DC Plan Hacks: Tips for an Efficient Design](#)

plan sponsors should regularly evaluate their plans to make sure they serve the organization’s

benefits philosophy. When evaluating changes, the sponsor should consider its demographics, cost of benefits, vendor capabilities, impact on nondiscrimination testing, communication capabilities, and legal requirements.

[2019 June Workshop Summary: In the Age of Illiquidity](#) | For many nonprofits and defined benefit plans, the shift to higher-returning but less liquid asset classes has myriad implications. This summary discusses how consultants, institutional investors, and investment managers can work together to identify solutions tailored to each plan.

[The Keys to Unlocking Private Equity Portfolio Assessment](#)

Private equity performance evaluation has some unique considerations, so return calculations and benchmarking methodologies differ from public securities. Closed-end private equity vehicles are assessed using ratio analyses and internal rate of return (IRR) measures. Using performance metrics, private equity portfolios can be evaluated at the partnership level, at the vintage year level, and then at the total portfolio level.

[Survivorship Bias and the Walking Dead](#)

Survivorship bias, the predisposition to evaluate a data set by focusing on the “survivors” rather than also examining the record of non-survivors, is important to understand for hedge fund peer groups, which tend to have a relatively large number of constituents that disappear. Using a proprietary approach, Callan is able to adjust peer group comparisons for survivorship bias. This better-informed perspective enables a more honest assessment in considering performance relative to other opportunities.

Quarterly Periodicals

[Private Equity Trends](#) | A newsletter on private equity activity, covering both the fundraising cycle and performance over time.

[Market Pulse Flipbook](#) | A market reference guide covering trends in the U.S. economy, developments for institutional investors, and the latest data for U.S. and non-U.S. equities and fixed income, alternatives, and defined contribution plans.

[Active vs. Passive Charts](#) | This series of charts compares active managers alongside relevant benchmarks over the long term.

[Capital Market Review](#) | A newsletter providing analysis and a broad overview of the economy and public and private market activity each quarter across a wide range of asset classes.

Events

The Center for Investment Training Educational Sessions

The Center for Investment Training, better known as the “Callan College,” provides a foundation of knowledge for industry professionals who are involved in the investment decision-making process. It was founded in 1994 to provide clients and non-clients alike with basic- to intermediate-level instruction.

Introduction to Investments

April 21-22, 2020

July 21-22, 2020

This program familiarizes institutional investor trustees and staff and asset management advisers with basic investment theory, terminology, and practices. It lasts one-and-a-half days and is designed for individuals who have less than two years of experience with asset-management oversight and/or support responsibilities. Tuition for the Introductory “Callan College” session is \$2,350 per person. Tuition includes instruction, all materials, breakfast and lunch on each day, and dinner on the first evening with the instructors.

Education: By the Numbers

525 Attendees (on average) of the Institute's annual National Conference

50+ Unique pieces of research the Institute generates each year

3,700 Total attendees of the “Callan College” since 1994

1980 Year the Callan Institute was founded

“Research is the foundation of all we do at Callan, and sharing our best thinking with the investment community is our way of helping to foster dialogue to raise the bar across the industry.”

Greg Allen, CEO and Chief Research Officer

List of Callan's Investment Manager Clients

Confidential – For Callan Client Use Only

Callan takes its fiduciary and disclosure responsibilities to clients very seriously. We recognize that there are numerous potential conflicts of interest encountered in the investment consulting industry and that it is our responsibility to manage those conflicts effectively and in the best interest of our clients. At Callan, we employ a robust process to identify, manage, monitor and disclose potential conflicts on an on-going basis.

The list below is an important component of our conflicts management and disclosure process. It identifies those investment managers that pay Callan fees for educational, consulting, software, database or reporting products and services. We update the list quarterly because we believe that our fund sponsor clients should know the investment managers that do business with Callan, particularly those investment manager clients that the fund sponsor clients may be using or considering using. Please note that if an investment manager receives a product or service on a complimentary basis (e.g. attending an educational event), they are not included in the list below. Callan is committed to ensuring that we do not consider an investment manager's business relationship with Callan, or lack thereof, in performing evaluations for or making suggestions or recommendations to its other clients. Please refer to Callan's ADV Part 2A for a more detailed description of the services and products that Callan makes available to investment manager clients through our Institutional Consulting Group, Independent Adviser Group and Fund Sponsor Consulting Group. Due to the complex corporate and organizational ownership structures of many investment management firms, parent and affiliate firm relationships are not indicated on our list.

Fund sponsor clients may request a copy of the most currently available list at any time. Fund sponsor clients may also request specific information regarding the fees paid to Callan by particular fund manager clients. Per company policy, information requests regarding fees are handled exclusively by Callan's Compliance Department.

Subject: Emerging Markets Analysis and review of Dimensional Fund Advisors Investment Manager Performance (AFSCME). (Adelman)

ISSUE

Emerging Markets Analysis and review of Dimensional Fund Advisors (DFA) Investment Manager Performance (AFSCME). (Adelman)

RECOMMENDED ACTION

Information only.

FISCAL IMPACT

None.

DISCUSSION

At the September 11, 2019 Quarterly Retirement Board meeting, DFA, the Retirement Boards' International Emerging Markets fund manager, presented performance results for the quarter ended June 30, 2019. Based on the performance results and overall Emerging Markets asset class performance, the Retirement Boards expressed an interest in evaluating the Emerging Markets asset class and DFA's performance within that class, with the potential of placing DFA on a fund manager "watch" list. The Boards requested that Callan LLC (Callan) provide them with a presentation on the status of the International Emerging Markets asset class, and an analysis of DFA's performance.

Attachment 1 is the Emerging Markets review materials, provided by Callan.

Emerging Markets Equity

Introduction and Overview

Population Centers

- World Population = 7.743 billion
- United States Population = 329 million (~4% of world population but ~55% of MSCI All Country World Investable Market Index)
- Significant Emerging Markets population centers = China (1.4 billion), India (1.4 billion), Indonesia (271 million), Brazil (212 million), Pakistan (218 million), Nigeria (203 million), and Russia (146 million)

Source: mapsharing.org, worldometer.com, MSCI/Callan PEP

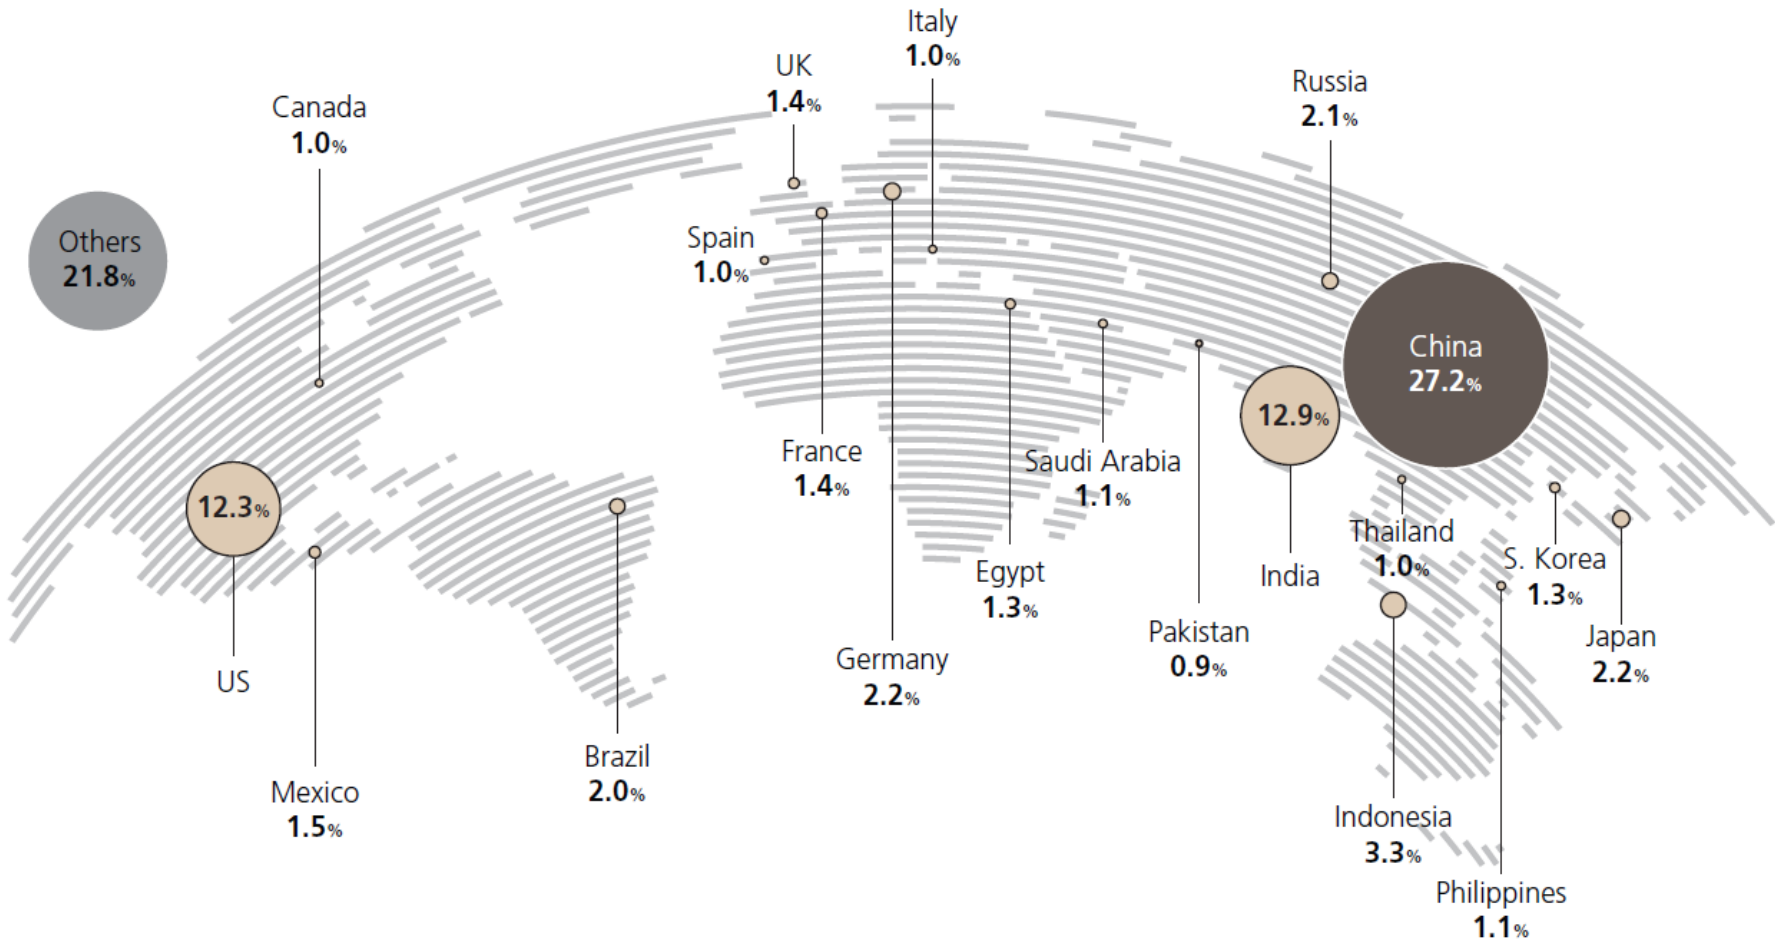

Demographic Trends

- World Population is headed for 9 billion in 2050.
- China and India account for much of this growth.
- China's population is expected to peak around 2025.

Source: Richard Hokenson, United Nations

GDP Growth

- Economic growth is stronger outside of developed markets.

Source: IMF, World Economic Outlook, January 2018

The Global Opportunity Set is Vast

Number of Stocks & Market Cap in MSCI All Country World Investable Market Index (MSCI ACWI IMI)

- 11% of market capitalization resides in emerging markets.
- Nearly one-third of the global all-cap universe resides in emerging markets (stock count).

30-Year Cumulative Returns

Developed and Emerging Markets Equities

Cumulative Returns for 30 Years Ended September 30, 2019

- Emerging markets equities have substantially outperformed developed markets equities outside of the U.S. over the last 30 years.
- U.S. equities have outperformed non-U.S. equities including emerging markets.
- The MSCI Emerging Markets Gross Index assumes dividends are re-invested without accounting for taxes. The Gross index is used because it has the longest return history.

30-Year Return and Risk

Non-U.S. Developed and Emerging Markets Equities

Scatter Chart

for 30 Years Ended September 30, 2019

Statistics

for 30 Years Ended September 30, 2019

	Returns	Standard Deviation	Sharpe Ratio
MSCI World ex US Index	4.54	17.75	0.09
MSCI Emerging Markets Index (Gross)	8.24	24.95	0.21

- Greater returns for emerging markets equities have come with higher volatility.
- Investors in emerging markets equities have been compensated for the additional risk taken relative to developed equities as evidenced by the higher Sharpe Ratio.

Rolling 7-Year Relative Returns

Non-U.S. Developed and Emerging Markets Equities

Rolling 28 Quarter Relative Returns Relative To MSCI:World ex US Index
for 23 Years Ended September 30, 2019

- Higher volatility means investors in emerging markets equities need to be patient to capture the return premium over developed non-U.S. equities.
- There can be prolonged periods when emerging markets equities underperform.

Callan

Emerging Markets Equity

Active vs. Passive Management

Active vs. Passive Management

Returns for Periods Ended September 30, 2019
Group: Callan Emerging Broad

	Last Year	Last 3 Years	Last 5 Years	Last 10 Years	Last 20 Years	Last 25 Years
10th Percentile	7.15	9.53	6.27	6.83	11.95	8.70
25th Percentile	3.88	8.35	5.11	6.18	10.82	8.22
Median	1.85	7.08	3.92	5.14	9.54	6.98
75th Percentile	(1.80)	5.61	2.34	4.13	8.82	6.41
90th Percentile	(4.33)	4.63	1.66	3.61	8.31	5.42

MSCI Em. Mkts Index (Gross) • A (1.62) 6.38 2.71 3.73 7.64 4.88

- Callan believes in active management in emerging markets equity.
- The average active emerging markets manager historically has outperformed the broad emerging markets benchmark.
- Less developed countries and stocks have not been researched as frequently, which has created inefficiencies.
- Also, some factors are more influential when valuing an international stock versus a U.S. stock including country specific inflation, currency, political and currency risks.
- These factors allow for investment managers to have more significant differentiation of opinions on stocks.

Active vs. Passive Management

Emerging Markets Equity

Investment Manager Evaluation

DFA Emerging Markets All Cap Core Strategy

Investment Process

- All DFA products are team managed and start at the total investable universe for that asset class.
- The firm's stock selection model is quantitative (and transparent) and emphasizes three main factors:
 1. Company size (small cap premium)
 2. Relative price (value premium)
 3. Expected profitability (profitability premium)
- DFA also has strict country selection criteria to ensure that each emerging market has adequate market liquidity, a commitment to free markets, a good legal system, and equal treatment of foreign investors; as well as other requirements. Those that don't meet these standards are screened out.
- All strategies are then refined by Asset Class Exclusions (permanent): REITs, highly regulated utilities; Pricing Exclusions (temporary): recent IPOs, share classes with foreign restriction, extreme financial distress/bankruptcy, merger; and Trading Exclusions: insufficient liquidity, limited operating history, insufficient float and/or listing requirements.
- After accounting for all the exclusions, DFA will essentially buy the remaining equities in that universe at their desired weightings.

Risk/Reward Chart
for 10 Years Ended September 30, 2019

Fund inception date: April 2005

Number of stocks: approximately 4,700

Annual Turnover: approximately 5%

DFA Emerging Markets All Cap Core Strategy

Enhancements to the Investment Process

- DFA recently augmented the process to further optimize return generation and portfolio construction with the following:
 - August 2019 – exclusion of high asset growth small cap companies
 - These are companies exhibiting high levels of debt financing, equity financing, or growth in retained earnings.
 - *DFA has determined that companies with high investment (asset growth) can lead to lower returns.*
 - The restriction is limited to 5% and implementation is expected to be fully executed in 6-12 months
 - October 2019 – elimination of 17.5% country cap for its emerging markets strategies
 - Country allocation will be within 5% relative to the MSCI Emerging Markets Index.
 - Implementation is expected to be completed in 6-9 months.
- Portfolio characteristics and risk/return profile of the strategy are expected to be consistent with historical norms given the incremental nature of the enhancements.

DFA Emerging Markets All Cap Core Strategy

Performance

Returns for Periods Ended September 30, 2019
Group: Callan Emerging Markets Equity Mut Funds

- DFA Emerging Markets All Cap Core strategy has a track record of generating excess return relative to the MSCI Emerging Markets Index.
 - Fund outperformed the benchmark six out of the past 10 calendar years.
 - Performance is expected to normalize as value and small cap factors recover.

DFA Emerging Markets All Cap Core Strategy

Country Weights

Callan

Emerging Markets Equity

Conclusions

Conclusions

Callan believes in long-term strategic investing in emerging markets and have the following observations:

- Emerging markets equity has outperformed non-U.S. developed market equity over time and has been compensated for the higher volatility. An exposure to emerging markets equity is expected help meet long-term return objectives.
- Active managers have a history of beating the benchmark after fees. Additional risk factors allow opportunity for successful stock picking.
- Data provides no evidence of a style premium in emerging markets equity. Value and growth can go through long cycles, but, since inception, the style indices have similar cumulative performance.
 - Value implementation can be supported but requires patience.
 - Over the last decade, the index composition has changed by country and sector and is more heavily weighted to growth sectors. Macro factors such as population growth, higher GDP, and a growing middle class provide support that growth will continue to be an important factor in emerging markets.
- DFA is a systematic manager that harnesses small cap, value, and profitability risk premiums to generate returns.
 - DFA recently added a high asset growth small cap exclusionary factor and eliminated its country cap of 17.5% to enhance the process.
- Callan maintains a positive view on DFA and supports the strategy for appropriate client searches. Performance is expected to recover as value and small cap factors cycle back in favor.

Callan

Appendix: Emerging Markets Equity

Style Investing

Emerging Markets Equity Style Investing

Cumulative Returns for 21 1/2 Years Ended September 30, 2019

- Eugene Fama and Kenneth French (economics professors at the University of Chicago Booth School of Business) evaluated style investing in emerging markets equity and found evidence of a value premium during the sample period of 1987 – 1995. They examined relative metrics during the period using data from the International Finance Corporation.
- The emerging markets style return history is short and lacks the necessary empirical evidence to conclude that one style will outperform the other over the long term.

Emerging Markets Equity Style Investing

Rolling 3-Year Relative Returns

Rolling 12 Quarter Relative Returns Relative To MSCI:EM Gross
for 18 1/2 Years Ended September 30, 2019

- Return deviations of the style indices from the broad index rarely exceed 4.0% and are inside 3.5% over the last decade. The relative performances of growth and value are twice this size by definition implying that investors with a style bias need to be patient.
- Rolling 3-year returns of the value index beat the growth index from the end of 2002 – to the middle of 2012. This minimizes what has seemed like a long period of underperformance for value in the current cycle.

Emerging Markets Equity Style Investing

Standard Deviation

Rolling 12 Quarter Standard Deviation
for 18 1/2 Years Ended September 30, 2019

- Risk history for emerging markets style indices is short and there is no definitive reason to believe that one style would be substantially more risky than the other over the long term.
- The absolute risk differences are narrow and the average risks differ by 110 basis points over the available historical data.

Emerging Markets Equity Returns

Growth vs. Value Correlations

Rolling 12 Quarter Correlation Relative To MSCI:EM Growth Gross
for 18 1/2 Years Ended September 30, 2019

- Emerging markets growth and value are highly correlated. The characteristics of emerging markets overall overwhelm the distinctions between growth and value.
- While still highly positively correlated, value and growth have become less correlated in the last few years.
- As a point of reference, the Russell 1000 growth and value indices have an average correlation of 0.82 over the same time period.

STAFF REPORT

DATE: March 11, 2020

TO: Boards of Directors of Sacramento Regional Transit District Retirement Plans (AEA, AFSCME and MCEG)

FROM: Valerie Weekly, Manager, Pension and Retirement Services

SUBJ: **ACCEPT THE SALARIED RETIREMENT PLAN ACTUARIAL VALUATION AND APPROVE THE ACTUARIALLY DETERMINED CONTRIBUTION RATE FOR FISCAL YEAR 2021**

RECOMMENDATION

Adopt Resolution No. 20-03___, Accept the Salaried Employees' Retirement Plan Actuarial Valuation and Approve the Actuarially Determined Contribution (ADC) rate for Fiscal Year 2021.

FISCAL IMPACT

No fiscal impact to the Retirement Plan.

The overall fiscal impact of this change to the Sacramento Regional Transit District Fiscal Year 2021 budget is estimated to be an increase in pension expense of approximately \$809,551.

DISCUSSION

Cheiron, Inc., the Retirement Plans' actuary, has completed the Actuarial Valuation for the Salaried Employees' Retirement Plan as of June 30, 2019 (Exhibit A). The purpose of the annual Actuarial Valuation is to compute the annual actuarially determined contribution rate required to fund the Plan according to actuarial principles and to present items required for disclosure under Statement No. 67 of the Governmental Accounting Standards Board (GASB).

At the Retirement Board's February 26, 2020 special meeting, Cheiron presented the preliminary actuarial valuation results to the Boards for review and discussion. If accepted, the Board can anticipate an increase in the SacRT contribution rate from 35.41% to 37.03% for Classic members. The SacRT contribution rate for PEPRA members is expected to increase to 31.28%, and the employee contribution rate for PEPRA members is expected to remain at 5.75%. The overall fiscal impact of this change to the SacRT Fiscal Year 2021 budget is estimated to be an increase in pension expense of approximately \$809,551.

Adopted by the Board of Directors for the Retirement Plan for AFSCME Employees on this date:

March 11, 2020

ACCEPT THE SALARIED RETIREMENT PLAN ACTUARIAL VALUATION AND APPROVE THE ACTUARIALLY DETERMINED CONTRIBUTION RATE FOR FISCAL YEAR 2021

BE IT HEREBY RESOLVED BY THE RETIREMENT BOARD OF DIRECTORS FOR THE RETIREMENT PLAN FOR AFSCME EMPLOYEES AS FOLLOWS:

THAT, the Retirement Board hereby accepts the Salaried Plan valuation report and approves the actuarially determined contribution rate for fiscal year 2021.

THAT, the Retirement Board hereby establishes the Actuarially Determined Employer Contribution Rate for the Salaried Employees' Retirement Plan at 37.03% of the payroll for eligible Salaried employees who are Classic members, and 31.28% for eligible Salaried employees who are PEPRA members, on a monthly basis, effective July 1, 2020.

Retirement Boards of
Sacramento Regional Transit District
2830 G Street
Sacramento, CA 95816

Dear Members of the Boards:

At your request, we have conducted an actuarial valuation of the Retirement Plan for Salaried Employees of the Sacramento Regional Transit District Employees (SacRT, the Fund, the Plan) as of July 1, 2019. This report contains information on the Plan's assets and liabilities. This report also discloses employer contribution levels. Your attention is called to the Foreword in which we refer to the general approach employed in the preparation of this report.

The purpose of this report is to present the results of the annual actuarial valuation of the Plan. This report is for the use of the Retirement Boards and the auditors in preparing financial reports in accordance with applicable law and accounting requirements. Any other user of this report is not an intended user and is considered a third party.

This report was prepared solely for the Retirement Boards for the purposes described herein, and for the use by the plan auditor in completing an audit related to the matters herein. It is not intended to benefit any third party, and Cheiron assumes no duty or liability to any such party.

This report and its contents have been prepared in accordance with generally recognized and accepted actuarial principles and practices and our understanding of the Code of Professional Conduct and applicable Actuarial Standards of Practice set out by the Actuarial Standards Board as well as applicable laws and regulations. Furthermore, as credentialed actuaries, we meet the Qualification Standards of the American Academy of Actuaries to render the opinion contained in this report. This report does not address any contractual or legal issues. We are not attorneys and our firm does not provide any legal services or advice.

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

FOREWORD

Cheiron has performed the actuarial valuation of the Retirement Plan for Sacramento Regional Transit District Employees (SacRT, the Fund, the Plan) as of July 1, 2019. The valuation is organized as follows:

- In Section I, the **Executive Summary**, we describe the purpose of an actuarial valuation, summarize the key results found in this valuation, and disclose important trends.
- In Section II, **Disclosures Related to Risk**, we review the primary risks facing the District, and quantify these using various risk and maturity measures.
- The **Main Body** of the report presents details on the Plan's
 - Section III – Assets
 - Section IV – Liabilities
 - Section V – Contributions
- In the **Appendices**, we conclude our report with detailed information describing plan membership (Appendix A), actuarial assumptions and methods employed in the valuation (Appendix B), a summary of pertinent plan provisions (Appendix C), and a glossary of key actuarial terms (Appendix D).

Future results may differ significantly from the results of the current valuation presented in this report due to such factors as the following: plan experience differing from that anticipated by the assumptions; changes in assumptions; and, changes in plan provisions or applicable law.

In preparing our report, we relied on information (some oral and some written) supplied by the District's staff. This information includes, but is not limited to, plan provisions, employee data, and financial information. We performed an informal examination of the obvious characteristics of the data for reasonableness and consistency in accordance with Actuarial Standard of Practice No. 23.

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

SECTION I – EXECUTIVE SUMMARY

The primary purpose of the actuarial valuation and this report is to measure, describe, and identify the following as of the valuation date:

- The financial condition of the Plan,
- Past and expected trends in the financial progress of the Plan,
- Employer and member contribution rates for Plan Year 2020-2021, and
- An assessment and disclosure of key risks.

The information required under GASB Statements (Nos. 67 and 68) is included in a separate report, with the report for the Fiscal Year Ending June 30, 2019 provided to the Boards in September 2019.

In the balance of this Executive Summary, we present (A) the basis upon which this year's valuation was completed, (B) the key findings of this valuation including a summary of all key financial results, (C) changes in Plan cost, (D) an examination of the historical trends, and (E) the projected financial outlook for the Plan.

A. Valuation Basis

This valuation determines the employer and PEPRAs member contributions for the plan year.

The Plan's funding policy is for the District to contribute an amount equal to the sum of:

- The normal cost under the Entry Age Normal Cost Method, net of any contributions by the members,
- Amortization of the Unfunded Actuarial Liability, and
- The Plan's expected administrative expenses.

This valuation was prepared based on the plan provisions shown in Appendix C. There have been no changes in plan provisions since the prior valuation.

A summary of the assumptions and methods used in the current valuation are shown in Appendix B. There have been no changes to assumptions or methods since the prior valuation.

SECTION I – EXECUTIVE SUMMARY

B. Key Findings of this Valuation

The key results of the July 1, 2019 actuarial valuation are as follows:

- The actuarially determined employer contribution rate increased from 35.41% of payroll last year to 37.03% of payroll for the current valuation. Last year's rate reflected an adjustment for the second year of the three-year phase-in of the impact of changes to the economic assumptions adopted for the July 1, 2017 valuation. As of the July 1, 2019 valuation, the 2017 assumption changes are fully phased-in, increasing the rate by 0.57% from the prior year to 35.98%.
- The Plan's funded ratio, the ratio of actuarial assets over Actuarial Liability, remained level at 64.8% as of July 1, 2019. However, the unfunded liability increased as a dollar amount. As a point of comparison, a funding ratio of 60.5% or more is required just to fund the liabilities of the inactive members: retired, disabled, terminated with vested benefits, and their beneficiaries. This ratio is sometimes referred to as the Inactive Funded Ratio.
- The Unfunded Actuarial Liability (UAL) is the excess of the Plan's Actuarial Liability over the Actuarial Value of Assets. The Plan experienced an increase in the UAL from \$51,165,986 to \$54,167,658 as of July 1, 2019. This increase in the UAL was primarily due to losses on the actuarial value of assets and liabilities.
- During the year ended June 30, 2019, the return on Plan assets was 6.05% on a market value basis net of investment expenses, as compared to the 7.25% assumption. This resulted in a market value loss on investments of \$1,117,558. The Actuarial Value of Assets recognizes 20% of the difference between the expected and actual return on the Market Value of Assets (MVA). This method of smoothing the asset gains and losses returned 5.71% on the smoothed value of assets, an actuarial asset loss of \$1,451,131.
- The Actuarial Value of Assets is currently 100.7% of the market value. Since actuarial assets are above market assets, there are unrecognized investment losses (approximately \$0.7 million) that will be reflected in the smoothed value in future years.
- The Plan experienced a liability loss of \$2,611,134 due primarily to larger than expected salary increases for AFSC continuing actives. Combining the liability loss and the asset loss, the Plan experienced a total loss of \$4,062,265.
- There were 23 new hires and rehires since July 1, 2018 and the total active population increased by seven. Total projected payroll increased 4.82% from \$24,474,636 to \$25,654,432 for 2019-2020.
- During the year, \$343,707 of assets and \$474,438 of liabilities were transferred from ATU to the Salaried plan for active Salaried plan members with prior ATU service.

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

SECTION I – EXECUTIVE SUMMARY

- The impact of PEPRA continued to lower the employer cost. As more PEPRA members are hired, the average normal cost rate declines, because PEPRA members have lower benefits than the non-PEPRA members do.

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

SECTION I – EXECUTIVE SUMMARY

Table I-1 summarizes the key results of the valuation with respect to membership, assets and liabilities, and contributions. The results are presented and compared for both the current and prior plan year.

Table I-1			
Summary of Principal Plan Results			
Valuation Date	July 1, 2018	July 1, 2019	% Change
<u>Participant Counts</u>			
Active Participants	226	233	3.10%

SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

SECTION I – EXECUTIVE SUMMARY

C. Changes in Plan Cost

Table I-2 summarizes the impact of actuarial experience and changes in benefits on Plan cost.

Table I-2 Employer Contribution Reconciliation				
Item	Total	Normal Cost	UAL Amortization	Admin Expense
FYE 2020 Employer Contribution Rate	35.41%			
Change due to phase-in	0.57%			
FYE 2020 Actuarial Contribution Rate	35.98%	14.88%	19.85%	1.25%
Change due to asset losses	0.58%	0.00%	0.58%	0.00%
Change due to PEPRAs	-0.56%	-0.56%	0.00%	0.00%
Change due to ATU Transfer	0.02%	-0.03%	0.05%	0.00%
Change due to demographic losses	1.34%	0.31%	1.03%	0.00%
Change due to amortization payroll	-0.39%	0.00%	-0.37%	-0.02%
Change due to contribution shortfall	<u>0.06%</u>	<u>0.00%</u>	<u>0.06%</u>	<u>0.00%</u>
FYE 2021 Employer Contribution Rate	37.03%	14.60%	21.20%	1.23%

An analysis of the cost changes from the prior valuation reveals the following:

- The contribution rate in the prior valuation was less than the actuarially determined contribution rate, due to the phase-in of the 2017 assumption changes.

As part of the July 1, 2017 valuation, the Board elected to phase-in the impact of the assumption changes (including a reduction in the discount rate from 7.50% to 7.25%) over a three-year period. The total increase in the actuarial cost from the assumption changes was 1.70% of pay, with the remaining one-third (or 0.57% of pay) now fully reflected in the required contribution as shown above.

- Asset experience produced an investment loss on an actuarial basis.

The actuarial return on assets was 5.71%, less than the assumed rate of 7.25%. This resulted in an increase in the contribution rate by 0.58% of payroll.

The Market Value of Assets is lower than the actuarial value; there are approximately \$0.7 million in deferred asset losses.

- Demographic experience resulted in a net increase in cost.

The demographic experience of the Plan – rates of retirement, death, disability, and termination – was somewhat different than predicted by the actuarial assumptions in aggregate, causing an actuarial loss that increased the contribution rate by 1.34% of payroll. In particular, there were losses caused by larger salary increases than expected

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

SECTION I – EXECUTIVE SUMMARY

for returning members, specifically AFSC members whose average salaries increased by 12.8%.

This was offset by the fact that the employer portion of the normal cost for the new hires under the PEPRA benefit formula is lower than the normal cost for the non-PEPRA membership. The impact of PEPRA resulted in a decrease in the employer normal cost rate of 0.56% of payroll.

The net impact on the contribution rate from changes in demographics was an increase of 0.78% of payroll.

- Overall payroll growth was greater than expected.

Greater than expected growth in the projected payroll decreased the contribution rate by 0.39% of pay, since it results in the Plan's Unfunded Actuarial Liability and administrative expenses being spread over a larger payroll base.

- Contributions fell short of the actuarially determined cost.

Actual contributions were less than the total actuarially determined cost, which resulted in an increase in the contribution rate by 0.06%. This was primarily due to the 12-month delay in the implementation of the contribution rates and the impact of the phase-in of the assumption changes.

- Salaried members with prior ATU service had the liabilities and assets associated with their ATU service transferred into the Salaried plan.

As a result of an arbitration agreement, the assets and liabilities associated with Salaried members with prior ATU service (but who did not become vested in the ATU plan) were transferred from the ATU plan into the Salaried plan. The transferred liabilities (\$474,438) exceeded the assets (\$343,707) transferred, partly due to the Salaried plan granting full service credit for part-time service. As a result the employer contribution rate increased by 0.02% of payroll.

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

SECTION I – EXECUTIVE SUMMARY

Historical Trends

Despite the fact that for most retirement plans the greatest attention is given to the current valuation results and in particular, the size of the current Unfunded Actuarial Liability and the employer contribution, it is important to remember that each valuation is merely a snapshot in the long-term progress of a pension fund. It is more important to judge a current year’s valuation result relative to historical trends, as well as trends expected into the future.

Assets and Liabilities

The chart compares the Market Value of Assets (MVA) and Actuarial Value of Assets (AVA) to the Actuarial Liabilities. The percentage shown in the chart below the graph is the ratio of the Actuarial Value of Assets to the Actuarial Liability (the funded ratio). The funded ratio decreased from 58.7% in 2010 to 54.1% in 2011 as the investment losses from 2008 were recognized in the smoothed value of assets, and then increased to 65.0% in 2016 primarily as a result of the recovery in the investment markets. The funded ratio has remained relatively flat since that time.

RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019

SECTION I – EXECUTIVE SUMMARY

Contribution Trends

In the following chart, we present the historical trends for the Plan’s actuarially determined contribution rates (excluding the impact of any phase-in of assumption changes.) Contribution rates increased from 2010 through 2013 as losses from the 2009 Fiscal Year were recognized and assumptions were changed. Contribution rates remained relatively stable from 2013 to 2016, with an increase in 2017 due to the change in assumptions as well as a decrease in projected payroll. The contribution rate rose again in 2019 primarily due to larger than anticipated salary increases for continuing actives.

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

SECTION I – EXECUTIVE SUMMARY

Gains and Losses

The following chart presents the pattern of annual gains and losses for the overall Plan, broken into the investment and liability components. The investment gains and losses represent the changes on a smoothed basis (i.e., based on the Actuarial Value of Assets). The chart does not include any changes in the Plan’s assets and liabilities attributable to changes to actuarial methods, assumptions, or plan benefit changes. The Plan has experienced demographic losses from 2016 through 2019 primarily due to lower mortality rates than expected among retirees, and larger salary increase than expected for returning members.

Experience Gains and Losses

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

SECTION I – EXECUTIVE SUMMARY

D. Future Expected Financial Trends

The analysis of projected financial trends is perhaps the most important component of this valuation. In this section, we present our assessment of the implications of the July 1, 2019 valuation results in terms of benefit security (assets over liabilities) and contribution levels. All the projections in this section are based on the assumption that the Plan will exactly achieve the 7.25% assumption each year, which is clearly an impossibility. We have also assumed future salary increases of 3.00% per year.

Projection of Employer Contributions 7.25% return each year

The contribution rate graph shows that the District’s contributions are expected to decrease slightly over the next eleven years since the employer-paid portion of the normal cost decreases as PEPR membership increases. The employer contribution rate is expected to decline substantially in FYE 2033, once the current unfunded liability is fully amortized.

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

SECTION I – EXECUTIVE SUMMARY

The dollar actuarial cost is expected to be approximately \$9.8 million in 2020-2021, growing as pay increases to around \$11.6 million in 2031-32, then dropping significantly the following years when the unfunded liability amortization payment disappears, at which point the cost will approach the level of the employer’s share of the normal cost and administrative expenses.

Note that the graph on the prior page does not forecast any actuarial gains or losses or changes to the assumptions or funding policy. Even relatively modest losses relative to the 7.25% assumed return could push the employer contribution above 40% of pay or higher over the next five to 10 years.

The following graph shows the projection of assets and liabilities assuming that assets will earn the 7.25% assumption each year during the projection period. The graph shows that the funded status is expected increase over the next 13 years as the current unfunded liability is fully amortized, assuming the actuarial assumptions are achieved. However, as above, it is primarily the actual return on Plan assets that will determine the future funding status and contribution rate to the Plan.

Projection of Assets and Liabilities 7.25% return each year

SECTION II – DISCLOSURES RELATED TO RISK

Actuarial valuations are based on a set of assumptions about future economic and demographic experience. These assumptions represent a reasonable estimate of future experience, but actual future experience will undoubtedly be different and may vary significantly.

A new Actuarial Standard of Practice (ASOP 51) has been issued which requires actuaries to identify and assess risks that “may reasonably be anticipated to significantly affect the plan’s future financial condition.” This section of the report is intended to identify the primary risks to the Plan, provide some background information about those risks, and provide an assessment of those risks.

Identification of Risks

The fundamental risk to a pension plan is that the contributions needed to pay the benefits become unaffordable. Even in the case that the Plan remains affordable, the contributions needed to support the Plan may differ significantly from expectations. While there are a number of factors that could lead to contribution amounts deviating from expectations, we believe the primary risks are:

- Investment risk,
- Assumption change risk,
- Longevity and other demographic risk, and
- Contribution risk.

Other risks that we have not identified may also turn out to be important.

Investment Risk is the potential for investment returns to be different than expected. Lower investment returns than anticipated will increase the Unfunded Actuarial Liability necessitating higher contributions in the future unless there are other gains that offset these investment losses. The potential volatility of future investment returns is determined by the Plan’s asset allocation and the affordability of the investment risk is determined by the amount of assets invested relative to the size of the plan sponsor or other contribution base.

Assumption change risk is the potential for the environment to change such that future valuation assumptions are different than the current assumptions. For example, declines in interest rates over the last three decades resulted in higher investment returns for fixed-income investments, but lower expected future returns necessitating either a change in investment policy, a reduction in discount rate, or some combination of the two. Assumption change risk is an extension of the other risks identified, but rather than capturing the risk as it is experienced, it captures the cost of recognizing a change in environment when the current assumption is no longer reasonable.

Longevity and other demographic risks are the potential for mortality or other demographic experience to be different than expected. Generally, longevity and other demographic risks emerge slowly over time and are often dwarfed by other changes, particularly those due to investment returns. However, for this plan there have been substantial liability losses over the

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

SECTION II – DISCLOSURES RELATED TO RISK

last four years, driven by lower than expected mortality rates and higher than expected pay increases for continuing active members.

Contribution risk is the potential for actual future contributions to deviate from expected future contributions. There are different sources of contribution risk ranging from the sponsor choosing to not make contributions in accordance with the funding policy to material changes in the contribution base (e.g., covered employees, covered payroll, sponsor revenue) that affect the amount of contributions the Plan can collect.

The chart below shows the components contributing to the Unfunded Actuarial Liability (UAL) from June 30, 2009 through June 30, 2019. Over the last 10 years, the UAL has increased by approximately \$21.4 million. The assumption changes (purple bar) resulting in a total UAL increase of \$9.7 million is the largest source of UAL growth, followed closely by liability losses (\$8.1 million, gray bar) and net investment losses (\$6.0 million, gold bar). Contributions below the “tread-water” level (red bar) have also increased the UAL by \$1.8 million. Method changes (teal bar) have decreased the UAL by \$4.2 million since June 30, 2009.

Chart II-1

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

SECTION II – DISCLOSURES RELATED TO RISK

Chart II-2 below details the annual sources of the UAL change (colored bars) for each valuation year. The net UAL change for each year is represented by the blue diamonds.

Chart II-2

The impact of all assumption changes is represented by the purple bars. In 2011 and 2015, there were experience studies performed, which resulted in significant increases in liabilities in 2011, primarily due to changes in the mortality assumptions and reductions in the discount rate. The experience study in 2015 resulted in a slight reduction in the liabilities. The return assumption was reduced again in 2014 and 2017. In 2012, the liabilities decreased due to the actuarial method change from Entry-Age-to-Decrement to Entry Age Actuarial Cost method.

On the liability side (gray bars), the System has experienced offsetting gains and losses, increasing the UAL by approximately \$8.1 million over the 10-year period resulting from, participants retiring, terminating, becoming disabled and dying at rates different from the actuarial assumptions as well as unexpected changes in salaries. Most of this type of activity is normal in the course of Plan experience. However, the Plan has recently experienced some significant liability losses, which indicates the potential need to update some of the assumptions, in particular the mortality assumptions for retirees. We will be reviewing this assumption and all others as part of an experience study in conjunction with the next actuarial valuation.

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

SECTION II – DISCLOSURES RELATED TO RISK

Each year the UAL is expected to increase for benefits earned in the current year (the normal cost), administrative expenses, and interest on the UAL. This expected increase is referred to as the tread water level. If contributions are greater than the tread water level, the UAL is expected to decrease. Conversely, if contributions are less than the tread water level, the UAL is expected to increase. The amortization policy (as well as the contribution-timing lag) can impact whether or not the contributions exceed the tread water level. The shortening of the amortization period has resulted in UAL reductions from contributions over the last several years, except in 2018, where the shortfall was due to the phase-in of the 2017 assumption change impact.

While the net investment gains and losses have not been the largest driver of UAL changes over the past 10 years, the year-to-year investment volatility can have a large impact on the UAL and is unpredictable. For example, the actuarial investment gain in 2014 was \$2.7 million compared to the \$1.5 million actuarial loss in this valuation.

Table II-1 below shows the same information as Chart II-2, but the annual source of the UAL change is shown numerically instead of a graph format.

Table II-1 Unfunded Actuarial Liability (UAL) Change by Source						
Valuation Year	Assumption Changes	Method Changes	Contributions	Investment Experience	Liability Experience	Total UAL Change
2010	0	0	913,236	2,985,441	(800,735)	3,097,942
2011	6,448,866	0	1,139,337	1,428,824	(602,196)	8,414,831
2012	0	(4,417,135)	158,728	2,883,165	1,623,268	248,026
2013	0	181,918	127,112	467,927	1,299,355	2,076,312
2014	933,160	0	5,520	(2,704,686)	(323,933)	(2,089,939)
2015	(757,047)	0	(562,761)	(1,662,717)	(541,993)	(3,573,905)
2016	0	0	(614,979)	917,324	1,775,915	2,061,205
2017	3,108,901	0	(229,830)	(85,065)	1,495,305	4,289,311
2018	(18,542)	0	1,958,532	321,313	1,603,565	3,864,868
2019	0	0	(1,060,592)	1,451,131	2,611,134	3,001,672
Total	\$ 9,715,338	\$ (4,235,217)	\$ 1,834,303	\$ 6,002,657	\$ 8,139,685	\$ 21,390,323

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

SECTION II – DISCLOSURES RELATED TO RISK

Plan Maturity Measures

The future financial condition of a mature pension plan is more sensitive to each of the risks identified above than a less mature plan. Before assessing each of these risks, it is important to understand the maturity of the plan compared to other plans and how the maturity has changed over time.

Plan maturity can be measured in a variety of ways, but they all get at one basic dynamic – the larger the plan is compared to the contribution or revenue base that supports it; the more sensitive the plan will be to risk. The measures on the next page have been selected as the most important in understanding the primary risks identified for the plan.

Inactives per Active (Support Ratio)

One simple measure of plan maturity is the ratio of the number of inactive members (those receiving benefits or inactives – those entitled to a deferred benefit) to the number of active members. The Support Ratio is expected to increase gradually as a plan matures. The chart below shows the Support Ratio remaining fairly level from 2010 to 2015 as the number of active members increased and the number of retirees also increased. However, the Support Ratio increased rapidly from 2015 to 2019 as the active population declined while the retiree population grew.

RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019

SECTION II – DISCLOSURES RELATED TO RISK

Leverage Ratios

Leverage or volatility ratios measure the size of the plan compared to its revenue base more directly. The asset leverage ratio is simply the market value of assets to active member payroll and indicates the sensitivity of the Plan to investment returns. The liability leverage ratio is the Plan's Actuarial Liability to active member payroll and indicates the sensitivity of the Plan to assumption changes or demographic experience.

The Plan assets are currently close to four times covered payroll. As the Plan becomes better funded, the asset leverage ratio will increase, and if it was 100% funded, the asset leverage ratio would be about six and equal the Actuarial Liability (AL) leverage ratio. Although both of these ratios are lower than those of many other public plans, the increase in the asset leverage ratio expected to accompany an improvement in the Plan's funding still represents a substantial increase in the volatility of the contributions.

An asset leverage ratio of 3.9 means that if the Plan's assets lose 10% of their value (a 17.25% actuarial loss compared to the expected return of 7.25%), the loss is about 67% of payroll (3.9 x 17.25%). Based on the current amortization policy, the contribution rate would ultimately increase by approximately 6.7% of payroll, after deferred asset losses are fully recognized. The same investment loss if the Plan were 100% funded would be around 104% of payroll and an ultimate contribution rate increase of about 10.4% of payroll, if amortized over 13 years.

The chart below shows the historical leverage ratios of the Plan. Both leverage ratios have gradually increased since 2010.

SECTION II – DISCLOSURES RELATED TO RISK

Assessing Costs and Risks

Sensitivity to Investment Returns

The chart below compares assets to the present value of all projected future benefits discounted at the current expected rate of return and at an investment return 100 basis points above and below the expected rate of return. The present value of future benefits is shown as a bar with the portion attributable to past service in dark blue (Actuarial Liability) and the portion attributable to future service in teal (Present Value of Future Normal Costs). The Market Value of Assets is shown by the gold line.

If investments return 7.25% annually, the Plan would need approximately \$187 million in assets today to pay all projected benefits compared to current assets of \$99 million. If investment returns are only 6.25%, the Plan would need approximately \$215 million in assets today, and if investment returns are 8.25%, the Plan would need approximately \$164 million in assets today.

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

SECTION II – DISCLOSURES RELATED TO RISK

Stochastic Projections

Stochastic projections serve to show the range of probable outcomes of various measurements. The chart below and on the following page show the projected range of the employer contribution rate and of the funded ratio on an Actuarial Value of Assets basis. The range in both scenarios is driven by the volatility of investment returns (assumed to be based on a 12% standard deviation of annual returns).

Stochastic Projection of Employer Contributions as a Percent of Pay

The stochastic projection of employer contributions as a percent of pay shows the probable range of future contribution rates. The baseline contribution rate (black line), which is based on the median of the simulations using an average return of 7.25%, aligns closely with the projections discussed in subsection D of the Executive Summary of this report for the first 10 years, but then shows a more gradual decline until reaching the level of the normal cost over the next three years. In the most pessimistic scenario shown, the 95th percentile, the projected employer contribution rate is about 150% of pay in 2032. Conversely, the most optimistic scenario shown, the 5th percentile, the projected employer contribution falls below 10% starting in 2031. We note that these projections set the employer contribution to not fall below the normal cost, as required under PEPRA.

We also note that the extreme level of volatility in the contribution rates towards the end of the projection period is driven by the declining amortization period. If the Board takes action to modify the amortization period – either by freezing/restarting the amortization schedule, or

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

SECTION II – DISCLOSURES RELATED TO RISK

moving towards a layered amortization policy wherein changes in the UAL are amortized over individual fixed/closed periods based on when the change occurs – the volatility in rates could be reduced significantly.

For example, the chart below shows the projected contributions rates under two different amortization policies: the black/gray bars represent a layered amortization policy, where each future year’s gain or loss is amortized over a closed 20-year period. The colored bars represent the projected costs under the current closed 13-year amortization policy (matching the projections shown in the chart on the prior page). As can clearly be seen, the expected impact of the change in amortization policy is a significant reduction in the volatility of contribution rates in future years. We encourage the Board to consider modifications to the funding policy within the next few years.

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

SECTION II – DISCLOSURES RELATED TO RISK

Stochastic Projection of Funded Ratio on an Actuarial Value of Assets Basis

The graph above shows the projection of the funded ratio based on the actuarial value of assets. It is based on the same layered amortization policy described above, where the current UAL is paid off over 13 years, and all future gains or losses are amortized over a new closed 20-year period. While the baseline-funded ratio (black line) is projected to be 100% at the end of the period shown here, there is a wide range of potential outcomes. Good investment returns have the likelihood of bringing the funded ratio well over 100%.

Under both the current funding policy of the Plan or under a layered amortization approach, even in scenarios with unfavorable investment returns the Plan is projected to remain close to 60% funded on an actuarial value of assets basis, as long as the actuarially determined contributions continue to be made.

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

SECTION II – DISCLOSURES RELATED TO RISK

Contribution Risk

While investment returns are typically the dominant factor in volatility, contribution rates can also be sensitive to future salary increases and the hiring of new members. When member payroll growth stagnates or even declines, the dollar level of contributions made to the Plan also stagnates or declines since contributions are based on payroll levels, though this will generally only present a funding issue if there is an extended period of payroll reductions.

There is also a risk of the contribution rate increasing even higher when payroll decreases since the Plan's funding policy amortizes the UAL as a level percentage of pay. This means that the UAL payments increase at the assumed payroll growth rate of 3.00%, so that the payment is expected to remain constant as a percentage of payroll. If payroll growth is less than the expected 3.00% or there is a decline in payroll, the UAL payments are spread over a smaller payroll base and the contribution rate as a percentage of pay increases, making the Plan less affordable for those sponsors with declining payroll bases.

For example, the UAL Amortization rate as of June 30, 2019 for the FYE 2021 is 21.20%. If the projected payroll for FYE 2021 were 3.00% lower, all else being equal, the UAL Amortization rate would increase to 21.83%.

More Detailed Assessment

While a more detailed assessment is always valuable to enhance the understanding of the risks identified above, we believe the scenarios illustrated above cover the primary risks facing the Plan at this time. We would be happy to provide the Board with a more in-depth analysis at their request.

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

SECTION III – ASSETS

Pension Plan assets play a key role in the financial operation of the Plan and in the decisions the Board may make with respect to future deployment of those assets. The level of assets, the allocation of assets among asset classes, and the methodology used to measure assets will likely impact benefit levels, employer contributions, and the ultimate security of participants’ benefits.

In this section, we present detailed information on Plan assets including:

- **Disclosure** of Plan assets as of June 30, 2018 and June 30, 2019
- Statement of the **changes** in market values during the year
- Development of the **Actuarial Value of Assets**

Disclosure

There are two types of asset values disclosed in the valuation, the Market Value of Assets and the Actuarial Value of Assets. The market value represents “snap-shot” or “cash-out” values, which provide the principal basis for measuring financial performance from one year to the next. Market values, however, can fluctuate widely with corresponding swings in the marketplace. As a result, market values are usually not as suitable for long-range planning as are the Actuarial Value of Assets, which reflect smoothing of annual investment returns.

Table III-1 discloses and compares each component of the market asset value as of June 30, 2018 and June 30, 2019.

Table III-1			
Statement of Assets at Market Value			
June 30,			
Investments		2018	2019
Cash and Cash Equivalents	\$	4,395,496	\$ 3,480,047
Equity Securities		61,849,056	64,883,704

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

SECTION III – ASSETS

Changes in Market Value

The components of asset change are:

- Contributions (employer and employee)
- Benefit payments
- Expenses (investment and administrative)
- Investment income (realized and unrealized)

Table III-2 shows the components of a change in the Market Value of Assets during 2018 and 2019.

Table III-2 Changes in Market Values		
	<u>2018</u>	<u>2019</u>
Contributions		
Employer's Contribution	\$ 7,669,178	\$ 8,503,815
Members' Contributions	143,094	193,293
Total Contributions	<u>\$ 7,812,272</u>	<u>\$ 8,697,108</u>
Investment Income		
Interest & Dividends	\$ 1,359,281	\$ 1,879,083

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

SECTION III – ASSETS

Actuarial Value of Assets (AVA)

The Actuarial Value of Assets represents a “smoothed” value developed by the actuary to reduce the volatile results that could develop due to short-term fluctuations in the Market Value of Assets. For this Plan, the Actuarial Value of Assets is calculated on a modified market-related value. The Market Value of Assets is adjusted to recognize, over a five-year period, investment earnings which are greater than (or less than) the assumed investment return.

Table III-3 Development of Actuarial Value of Assets as of July 1, 2019							
	(a)	(b)	(c)	(d)	(e) = (d) – (c)	(f)	(g) = (e) x (f)
Year	Total Contributions	Total Disbursements	Expected Return	Actual Return	Additional Earnings	Not Recognized	Unrecognized Earnings
2014-2015	7,335,569	(5,696,353)	5,480,809	2,132,136	(3,348,673)	0%	0
2015-2016	7,597,880	(6,460,605)	5,637,370	(396,556)	(6,033,926)	20%	(1,206,785)
2016-2017	7,374,844	(7,468,429)	5,646,767	9,388,876	3,742,109	40%	1,496,844
2017-2018	7,812,272	(5,387,976)	6,223,723	6,073,483	(150,240)	60%	(90,144)
2018-2019	8,697,108	(8,290,228)	6,766,681	5,649,123	(1,117,558)	80%	(894,046)
1. Total Unrecognized Dollars							(694,131)
2. Market Value of Assets as of June 30, 2019							99,186,092
3. Actuarial Value of Assets as of June 30, 2019: [(2) - (1)]							99,880,223
4. Ratio of Actuarial Value to Market Value [(3) ÷ (2)]							100.70%

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

SECTION III – ASSETS

Investment Performance

The following table calculates the investment related gain/loss for the plan year on both a market value and an actuarial value basis. The market value gain/loss is an appropriate measure for comparing the actual asset performance to the previous valuation’s long-term 7.25% assumption.

Table III-4 Asset Gain/(Loss)		
	Market Value	Actuarial Value
July 1, 2018 value	\$ 93,130,089	\$ 94,088,321
Employer Contributions	8,503,815	8,503,815
Employee Contributions	193,293	193,293
Benefit Payments and Expenses	(8,633,935)	(8,633,935)
Transfer In / (Out) from ATU	343,707	343,707
Expected Investment Earnings (7.25%)	6,766,681	6,836,153
Expected Value June 30, 2019	\$ 100,303,650	\$ 101,331,354
Investment Gain / (Loss)	(1,117,558)	(1,451,131)
July 1, 2019 value	\$ 99,186,092	\$ 99,880,223
Return	6.05%	5.71%

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

SECTION IV – LIABILITIES

In this section, we present detailed information on Plan liabilities including:

- **Disclosure** of Plan liabilities at July 1, 2018 and July 1, 2019
- Statement of **changes** in these liabilities during the year

Disclosure

Several types of liabilities are calculated and presented in this report. Each type is distinguished by the people ultimately using the figures and the purpose for which they are using them. Note that these liabilities are not applicable for settlement purposes, including the purchase of annuities and the payment of lump sums.

- **Present Value of Future Benefits:** Used for measuring all future Plan obligations, represents the amount of money needed today to fully fund all benefits of the Plan both earned as of the valuation date and those to be earned in the future by current plan participants, under the current Plan provisions.
- **Actuarial Liability:** Used for funding calculations, the normal cost rate is equal to the total projected value of benefits at entry age, divided by present value of future salary at entry age. The dollar amount of the normal cost equal to the normal cost rate multiplied by each member’s projected pay. The Actuarial Liability is the portion of the present value of future benefits not covered by future expected normal costs. This method is called **Entry Age to Final Decrement (EAFD)**.
- **Unfunded Actuarial Liability:** The excess of the Actuarial Liability over the Actuarial Value of Assets.

Table IV-1 discloses each of these liabilities for the current and prior valuations.

Table IV-1			
Liabilities/Net (Surplus)/Unfunded			
	July 1, 2018		July 1, 2019
<u>Present Value of Future Benefits</u>			
Active Participant Benefits	\$	94,049,804	\$ 93,370,028
Retiree and Inactive Benefits		81,242,328	93,273,279
Present Value of Future Benefits (PVB)	\$	175,292,132	\$ 186,643,307
<u>Actuarial Liability</u>			
Present Value of Future Benefits (PVB)	\$	175,292,132	\$ 186,643,307
Present Value of Future Normal Costs (PVFNC)		30,037,825	32,595,426
Actuarial Liability (AL = PVB – PVFNC)	\$	145,254,307	\$ 154,047,881
Actuarial Value of Assets (AVA)		94,088,321	99,880,223
Net (Surplus)/Unfunded (AL – AVA)	\$	51,165,986	\$ 54,167,658

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

SECTION IV – LIABILITIES

Changes in Liabilities

Each of the Liabilities disclosed in the prior table are expected to change at each valuation. The components of that change, depending upon which liability is analyzed, can include:

- New hires since the last valuation
- Benefits accrued since the last valuation
- Plan amendments increasing benefits
- Passage of time which adds interest to the prior liability
- Benefits paid to retirees since the last valuation
- Participants retiring, terminating, or dying at rates different than expected
- A change in actuarial or investment assumptions
- A change in the actuarial funding method or software
- Transfers of liabilities from one plan to another

Unfunded liabilities will change because of all of the above, and also due to changes in Plan assets resulting from:

- Employer contributions different than expected
- Investment earnings different than expected
- A change in the method used to measure plan assets
- Transfer of assets from one plan to another

Table IV-2 Changes in Actuarial Liability		
Actuarial Liability at July 1, 2018	\$	145,254,307
Actuarial Liability at July 1, 2019	\$	154,047,881
Liability Increase (Decrease)		8,793,574
Change due to:		
Actuarial Methods / Software Changes	\$	0
Plan Changes		0
Assumption Changes		0
Transfer In / (Out) from ATU		474,438
Accrual of Benefits		3,704,945
Actual Benefit Payments		(8,373,494)
Interest		10,376,551
Actuarial (Gain)/Loss		2,611,134

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

SECTION IV – LIABILITIES

Table IV-3 Development of Actuarial Gain / (Loss)		
1. Unfunded Actuarial Liability at Start of Year (not less than zero)	\$	51,165,986
2. Employer Normal Cost at Middle of Year		3,704,945
3. Interest on 1. and 2. to End of Year		3,841,488
4. Contributions, Admin Expenses and Transfers in Prior Year		8,305,936
5. Interest on 4. to End of Year		301,090
6. Change in Unfunded Actuarial Liability Due to Changes in Actuarial Methods		0
7. Change in Unfunded Actuarial Liability Due to Changes in Assumptions		0
8. Change in Unfunded Actuarial Liability Due to Changes in Plan Design		0
9. Expected Unfunded Actuarial Liability at End of Year [1. + 2. + 3. – 4. – 5. + 6. + 7. + 8.]	\$	50,105,393
10. Actual Unfunded Actuarial Liability at End of Year (not less than zero)		54,167,658
11. Actuarial Gain / (Loss) [9. – 10.]	\$	(4,062,265)

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

SECTION V – CONTRIBUTIONS

In the process of evaluating the financial condition of any pension plan, the actuary analyzes the assets and liabilities to determine what level (if any) of contributions is needed to properly maintain the funding status of the Plan. Typically, the actuarial process will use a funding technique that will result in a pattern of contributions that are both stable and predictable.

For this Plan, the actuarial funding method used to determine the normal cost and the Unfunded Actuarial Liability is the **Entry Age to Final Decrement (EAFD)** cost method.

The normal cost rate for each member is determined with the normal cost percentage equal to the total projected value of benefits at entry age, divided by present value of future salary at entry age. Normal cost contributions are assumed to be made throughout the year, or on average mid-year.

The Unfunded Actuarial Liability is the difference between the EAFD Actuarial Liability and the Actuarial Value of Assets. The UAL rate is based on a 13-year level percentage of payroll amortization of the remainder of the Unfunded Actuarial Liability as of July 1, 2019, again assuming mid-year payment to reflect the fact that employer contributions are made throughout the year.

Beginning with the June 30, 2013 actuarial valuation, an amount equal to the expected administrative expenses for the Plan is added directly to the actuarial cost calculation. Previously, this cost was implicitly included in the calculation of the normal cost and unfunded liability payment, based on the use of a discount rate that was net of anticipated administrative expenses.

Members hired on or after January 1, 2015 will contribute half of the normal cost of the Plan rounded to the nearest 0.25%. Once established, contribution rate for New Members will be adjusted to reflect a change in the normal cost rate, but only if the normal cost rate changed by more than 1% of payroll. For the current year, the contribution rate for PEPRA members was 5.75% of payroll (1/2 of 11.35%, rounded to the nearest quarter). The normal cost rate for the PEPRA members as of the July 1, 2019 valuation is 12.21%, and since the increase is less than 1%, the rate for the following fiscal year remains at 5.75%. Table V-2 contains the details of this calculation.

The tables on the following pages present the employer contributions for the Plan for the current and prior valuations.

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

APPENDIX B – STATEMENT OF ACTUARIAL ASSUMPTIONS AND METHODS

The assumptions and methods used in the actuarial valuation as of July 1, 2019 are:

Actuarial Method

As of July 1, 2012, the normal cost (and resulting Actuarial Liability) is determined as a single result for each individual, with the normal cost percentage equal to the total projected value of benefits at entry age, divided by the present value of future salary at entry age. This variation is known as the entry age to final decrement.

The excess of the Actuarial Liability over Plan assets is the Unfunded Actuarial Liability. Prior to July 1, 2007, this liability was amortized as a level percentage of payroll over the remainder of a 30-year period beginning January 1, 1997. As of July 1, 2007, the amortization period was reset to a new 30-year period, decreasing two years with each valuation until a 20-year amortization period was achieved, at which point the amortization period was reduced by one year annually. The amortization period as of July 1, 2019 is 13 years. Amounts may be added to or subtracted from the Unfunded Actuarial Liability due to Plan amendments, changes in actuarial assumptions, and actuarial gains and losses.

The total Plan cost is the sum of the normal cost, the amortization of the Unfunded Actuarial Liability, and the expected administrative expenses.

Actuarial Value of Plan Assets

The actuarial value of Plan assets is calculated on a modified market-related value. The Market Value of Assets is adjusted to recognize, over a five-year period, investment earnings which are greater than (or less than) the assumed investment return on the Market Value of Assets.

Actuarial Assumptions

The actuarial assumptions were developed based on an experience study covering the period from July 1, 2011 through June 30, 2015, except for the economic assumptions, which were updated by the Board as a result of an analysis completed in 2017.

1. Rate of Return

The annual rate of return on all Plan assets is assumed to be 7.25% for the current valuation net of investment, but not administrative, expenses.

2. Cost of Living

The cost of living as measured by the Consumer Price Index (CPI) is assumed to increase at the rate of 3.00% per year.

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

APPENDIX B – STATEMENT OF ACTUARIAL ASSUMPTIONS AND METHODS

3. Plan Expenses

Administrative expenses are assumed to be \$324,529 for Fiscal Year 2020-21, and are added directly to the actuarial cost calculation. The expenses are assumed to increase with CPI in future years.

4. Increases in Pay

Assumed pay increases for active Participants consist of increases due to inflation (cost-of-living adjustments) and those due to longevity and promotion.

Based on an analysis of pay levels and service for the Salaried Plan Participants, we assume that pay increases due to longevity and promotion will occur in accordance with the following table:

Pay Increases			
	Years of Service		
	0-9	10-19	20+
Base Increase	3.00%	3.00%	3.00%
Longevity & Promotion			
AFSME	2.00%	2.00%	0.00%
AEA/MCEG	3.25%	0.50%	0.50%
Total (Compound)			
AFSME	5.06%	5.06%	3.00%
AEA/MCEG	6.35%	3.52%	3.52%

5. Family Composition

85% of participants are assumed to be married. Males are assumed to be three years older than their spouses, and females are assumed to be three years younger than their spouses. This assumption is applied to active members, as well as retired members with a joint and survivor benefit where the data is missing the beneficiary date of birth.

6. Terminal Payments

Retirement benefits are assumed to be increased by 7% due to the application of payments for unused vacation and sick leave to Average Final Monthly Earnings.

No liability adjustment for retirement is used for members who joined the plan on or after January 1, 2015.

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

APPENDIX B – STATEMENT OF ACTUARIAL ASSUMPTIONS AND METHODS

7. Bridging Service

The Plan has been modified to enable members who are rehired after a previous period of non-vested service to use this prior service for benefit and eligibility purposes. As the impact on the liabilities and contribution level of the Plan is expected to be minor, and will depend on the number of members actually rehired (if any), no additional liability is currently being included for this provision.

8. Missed Pay Periods

A 0.57% load is applied to the normal cost for Salaried PEPRA members to adjust for the missed pay periods in which service is credited yet no contributions are made by the member.

9. Employment Status

No Plan Participants are assumed to transfer between the Salaried Plan and the ATU/IBEW Plan.

10. Rates of Termination

Rates of termination for all Participants from causes other than death, disability, and service retirement are based on the Participant’s age, service, and sex.

Representative rates are shown in the following table:

Termination Rates*		
	0-4 Years	5+ Years
Age	All	All
20-34	5.00%	8.00%
35-44	5.00%	3.00%
45	5.00%	0.25%
46	5.00%	0.20%
47	5.00%	0.15%
48	5.00%	0.10%
49	5.00%	0.50%
50+	5.00%	0.00%

* No terminations are assumed after eligibility for normal retirement or after 25 years of service for non-PEPRA members. PEPRA members terminating with at least five years of service are expected to receive a deferred annuity benefit; those terminating with less than five years of service are expected to receive a refund of contributions (with interest).

RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019

APPENDIX B – STATEMENT OF ACTUARIAL ASSUMPTIONS AND METHODS

11. Rates of Disability

Rates of disability are based on the age of the Participant. Representative rates are as follows:

Rates of Disability	
Age	Rate
22	0.0184%
27	0.0237%
32	0.0289%
37	0.0368%
42	0.0525%
47	0.0814%
52	0.1418%
57	0.2599%
62	0.5382%

Rates are applied after the Participant becomes eligible to receive a disability benefit. Disabled Participants are assumed not to return to active service.

12. Rates of Mortality for Active Healthy Lives

Rates of mortality for active Participants are given by the Retired Pensioners (RP) 2014 Male and Female Employee Mortality Tables projected with Scale MP-2015 published by the Society of Actuaries, with the base tables adjusted 130% for females.

13. Rates of Mortality for Disabled Retirees

Rates of mortality for all disabled Participants are given by Retired Pensioners (RP) 2014 Male and Female Disabled Retiree Mortality Tables projected with Scale MP-2015 published by the Society of Actuaries, with the base tables adjusted 130% for males and 115% for females.

14. Retired Member and Beneficiary Mortality

Rates of mortality for retired Participants and their beneficiaries are given by the Retired Pensioners (RP) 2014 Male and Female Healthy Annuitants Mortality Tables projected with Scale MP-2015 published by the Society of Actuaries, with the base tables adjusted 130% for females.

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

APPENDIX B – STATEMENT OF ACTUARIAL ASSUMPTIONS AND METHODS

15. Rates of Retirement

Rates of service retirement among all Participants eligible to retire are given by the following table:

Rates of Retirement			
Age	Years of Service		
	5-24	25-29	30+
50-54	0.00%	5.00%	25.00%
55-59	5.00%	5.00%	25.00%
60	15.00%	15.00%	15.00%
61-64	8.25%	8.25%	8.30%
65+	25.00%	25.00%	25.00%

*The rate of service retirement among all Participants eligible to retire with 30 or more years of service is assumed to be 25.0% per year, and 100% per year for all Participants 70 or older. PEPRAs are assumed to begin retiring at age 52, with at least five years of service.

16. Changes Since Last Valuation

None

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

APPENDIX C – SUMMARY OF PLAN PROVISIONS

1. Definitions

Average Final
Monthly
Earnings:

A Participant's Average Final Monthly Earnings is the highest average consecutive 48 months' Compensation paid. Payments for accumulated vacation or sick leave not actually taken prior to retirement are included in computing Average Final Monthly Earnings if the last 48 months of compensation are used in the calculation, except for PEPRA members.

Compensation:

A Participant's Compensation is the earnings paid in cash to the participant during the applicable period of employment with the District.

PEPRA member's Compensation is computed using base salary, without overtime or other special compensation such as terminal payments. Pensionable compensation is limited to an amount not to exceed a specific capped amount, originally tied to the Social Security Taxable Wage Base in 2013, and subsequently adjusted annually by the increase in the CPI-U.

Service:

Service is computed from the date in which the Participant becomes a full or part-time employee and remains in continuous employment to the date employment ceases. Service includes time with the District or predecessor companies immediately prior to August 1, 1968 and subsequent to hire.

For AFSCME employees, service earned prior to January 1, 2015 is measured in completed quarters of a year and completed months for service earned on or after January 1, 2015. For MCEG and AEA employees, service is measured in completed months.

2. Participation

Eligibility:

Any person employed by the District in a full or part-time position in an authorized job classification covered by one of the defined employee groups of (i) Non-union Management and Confidential Employees, (ii) Employee members of the Administrative Employee Association (AEA), or (iii) Employee members of American Federation of State, County and Municipal Employees (AFSCME), is eligible to participate in the Plan.

Any member joining the Plan for the first time on or after January 1, 2015 is a New Member and will follow PEPRA provisions. Employees who transfer from and are eligible for reciprocity with another public employer will not be New Members if the service in the reciprocal system was under a pre-PEPRA plan.

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

APPENDIX C – SUMMARY OF PLAN PROVISIONS

3. Retirement Benefit

Eligibility: Prior to January 1, 2006, a Participant is eligible for normal service retirement upon attaining age 55 and completing nine or more years of service.

On and after January 1, 2006, a Participant is eligible for normal service retirement upon attaining age 55 and completing five or more years of service.

Effective January 1, 2000, employees with 25 years of credited service will be eligible for an early retirement option.

PEPRA members are eligible upon attaining age 52 and completing five or more years of service.

Benefit Amount: The normal service retirement benefit is the greater of the benefit accrued under the plan provisions in effect prior to February 1, 1994 or the Participant's benefit under the current plan provisions. Under the current plan provision, the member would receive a percentage of the Participant's Average Final Monthly Earnings multiplied by the Participant's service at retirement. For AGSCME members with at least five but less than nine years of service, a vesting schedule is applied unless the member has reached age 62.

For retirements and terminations prior to January 1, 2005, the percentage is equal to:

- 2.0%, if the member retires prior to age 65, and
- 2.5%, if the member retires at age 65 or later.

For AEA and MCEG retirements and terminations on and after July 1, 2006 and prior to January 1, 2008, the percentage is equal to:

- 2.0%, if the member retires at age 55 or with 25 years of service,
- 2.125%, if the member retires at age 56 or with 26 years of service,
- 2.25%, if the member retires between the ages of 57 and 64 or with 27 or more years of service, and
- 2.5%, if the member retires at age 65 or later.

For retirements and terminations on and after January 1, 2008 (July 1, 2006 for AFSCME members), the percentage is equal to:

- 2.0%, if the member retires at age 55 or with 25 years of service,
- 2.1%, if the member retires at age 56 or with 26 years of service,
- 2.2%, if the member retires at age 57 or with 27 years of service,

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

APPENDIX C – SUMMARY OF PLAN PROVISIONS

- 2.3%, if the member retires at age 58 or with 28 years of service,
- 2.4%, if the member retires at age 59 or with 29 years of service, and
- 2.5%, if the member retires at age 60 or later or with 30 or more years of service.

For PEPRA members, the benefit multiplier will be 1% at age 52, increasing by 0.1% for each year of age to 2.5% at 67. In between exact ages, the multiplier will increase by 0.025% for each quarter year increase in age.

Form of Benefit: The benefit begins at retirement and continues for the Participant's life with no cost-of-living adjustments. A Participant may elect to receive reduced benefits in the form of a contingent annuity with 50% or 100% continuing to a beneficiary after death, or in the form of an increased benefit prior to receiving Social Security benefits, and a reduced benefit thereafter.

4. Disability Benefit

Eligibility: A Participant is eligible for a disability benefit if the Participant is unable to perform the duties of his or her job with the District, cannot be transferred to another job with the District, and has submitted satisfactory medical evidence of permanent disqualification from his or her job. Nine years of service is required to qualify for disability. Effective January 1, 2006, five years of service is needed to qualify for disability retirement for AEA and MCEG members.

Benefit Amount: For AEA and MCEG members, the disability benefit is equal to the Normal Retirement Benefit, using the Participant's Average Final Monthly Earnings and service accrued through the date of disability. For AFSCME members, the disability benefit is equal to 2% of the Participant's Average Final Monthly Earnings multiplied by service accrued through the date of disability. The disability benefit cannot exceed the Retirement Benefit the member would be entitled to on the basis of Average Final Monthly Earnings determined at the date of disability multiplied by the service the member would have attained had employment continued until age 62.

Form of Benefit: The benefit begins at disability and continues until recovery or for the Participant's life with no cost-of-living adjustments. A Participant may elect to receive reduced benefits in the form of a contingent annuity with 50% or 100% continuing to a beneficiary after death, or in the form of an increased benefit prior to receiving Social Security benefits, and a reduced benefit thereafter.

APPENDIX C – SUMMARY OF PLAN PROVISIONS

5. Pre-Retirement Death Benefit

Eligibility: For deaths prior to January 1, 2006, a Participant's surviving spouse, Domestic Partner or minor dependent child is eligible for a pre-retirement death benefit if the Participant has completed nine years of service with the District.

For deaths on and after January 1, 2006, a Participant's surviving spouse, Domestic Partner, or minor dependent child is eligible for a pre-retirement death benefit if the Participant has completed five years of service with the District.

Benefit Amount: The pre-retirement death benefit is the actuarial equivalent of the Normal Retirement Benefit, as if the member retired on the day prior to his/her death. The amount payable to the spouse or Domestic Partner is equal to the Life benefit payable under Article V of the Plan document.

Form of Benefit: The death benefit begins when the Participant dies and continues for the life of the surviving spouse or Domestic Partner, or until the death, marriage, or attainment of 21 years of age of a dependent minor child. No optional form of benefit may be elected. No cost-of-living increases are payable.

6. Termination Benefit

Eligibility: A Participant is eligible for a termination benefit after earning five years of service. The Participant will be eligible to commence benefits at age 55.

Benefit Amount: For AFSCME terminations, and AEA and MCEG terminations prior to January 1, 2006, the benefit payable to a vested terminated Participant is a percentage of the Normal Retirement Benefit earned on the date of termination, based on the age, service, and Average Final Monthly Earnings accrued by the Participant at that point. The percentage is based on the Participant's service with the District, as shown in the table below:

Service	Vested Percentage
5	20%
6	40%
7	60%
8	80%
9 or more	100%

For AEA and MCEG terminations on and after January 1, 2006, a Participant is eligible after earning five years of service for the full Normal Retirement Benefit earned on the date of termination, based on the age,

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
SALARIED ACTUARIAL VALUATION REPORT AS OF JULY 1, 2019**

APPENDIX C – SUMMARY OF PLAN PROVISIONS

service, and Average Final Monthly Earnings accrued by the Participant at that point.

PEPRA members are eligible after earning five years of service for the full Normal Retirement Benefit earned on the date of termination, based on the service and Average Final Monthly Earnings accrued by the Participant at that point, and using the factor based on the age at which the benefit commences.

Form of Benefit: The termination benefit is payable for the life of the Participant only beginning at age 55. For PEPRA members the benefit can begin as early as age 52. No cost-of-living increases are payable.

7. Reciprocity Benefit

Eligibility: A Participant who transfers from this Plan to the RT Union Plan, and who is vested under this Plan, is eligible for a retirement benefit from this Plan.

Benefit Amount: The benefit payable to a vested transferred Participant is equal to the Normal Retirement Benefit based on service earned under this Plan to the date of transfer and based on Average Final Earnings computed under this Plan and the Union Plan together, as if the plans were a single plan.

Form of Benefit: The reciprocity benefit begins at retirement and continues for the Participant's life with no cost-of-living adjustments. A Participant may elect to receive reduced benefits in the form of a contingent annuity with 50% or 100% continuing to a beneficiary after death, or in the form of an increased benefit prior to receiving Social Security benefits, and a reduced benefit thereafter.

8. Funding

Members hired on or after January 1, 2015 will contribute half of the normal cost of the Plan rounded to the nearest 0.25%. Once established, contribution rate for New Members will be adjusted to reflect a change in the normal cost rate, but only if the normal cost rate changed by more than 1% of payroll. For the current year, the contribution rate for PEPRA members was 5.75% of payroll (1/2 of 11.35%, rounded to the nearest quarter). The normal cost rate for the PEPRA members as of the July 1, 2019 valuation is 12.21%, and since the increase is less than 1%, the rate for the following fiscal year remains at 5.75%.

The remaining cost of the Plan is paid by the District.

9. Changes in Plan Provisions

None

APPENDIX D – GLOSSARY

1. Actuarial Assumptions

Assumptions as to the occurrence of future events affecting pension costs such as mortality, withdrawal, disability, retirement, changes in compensation, and rates of investment return.

2. Actuarial Cost Method

A procedure for determining the actuarial present value of pension plan benefits and expenses and for developing an allocation of such value to each year of service, usually in the form of a normal cost and an Actuarial Liability.

3. Actuarial Gain (Loss)

The difference between actual experience and that expected based upon a set of actuarial Assumptions during the period between two actuarial valuation dates, as determined in accordance with a particular actuarial cost method.

4. Actuarial Liability

The portion of the actuarial present value of projected benefits that will not be paid by future normal costs. It represents the value of the past normal costs with interest to the valuation date.

5. Actuarial Present Value (Present Value)

The value as of a given date of a future amount or series of payments. The actuarial present value discounts the payments to the given date at the assumed investment return and includes the probability of the payment being made.

6. Actuarial Valuation

The determination, as of a specified date, of the normal cost, Actuarial Liability, Actuarial Value of Assets, and related actuarial present values for a pension plan.

7. Actuarial Value of Assets

The value of cash, investments, and other property belonging to a pension plan as used by the actuary for the purpose of an actuarial valuation. The purpose of an Actuarial Value of Assets is to smooth out fluctuations in market values.

8. Actuarially Equivalent

Of equal actuarial present value, determined as of a given date, with each value based on the same set of actuarial assumptions.

APPENDIX D – GLOSSARY

9. Amortization Payment

The portion of the pension plan contribution, which is designed to pay interest and principal on the Unfunded Actuarial Liability in order to pay for that liability in a given number of years.

10. Entry Age Normal Actuarial Cost Method

A method under which the actuarial present value of the projected benefits of each individual included in an actuarial valuation is allocated on a level basis over the earnings of the individual between entry age and assumed exit ages.

11. Funded Ratio

The ratio of the Actuarial Value of Assets to the Actuarial Liabilities.

12. Normal Cost

That portion of the actuarial present value of pension plan benefits and expenses that is allocated to a valuation year by the actuarial cost method.

13. Projected Benefits

Those pension plan benefit amounts which are expected to be paid in the future under a particular set of actuarial assumptions, taking into account such items as increases in future compensation and service credits.

14. Unfunded Actuarial Liability

The excess of the Actuarial Liability over the Actuarial Value of Assets. The Unfunded Actuarial Liability is not appropriate for assessing the sufficiency of plan assets to cover the estimated cost of settling the Plan's benefit obligation in the event of a plan termination or other similar action. However, it is an appropriate measure for assessing the need for or the amount of future contributions.

Motion: Receive and File the Independent Auditor's Report, Auditor's Report to the Board of Directors, and the Report on Internal Control for the Twelve Month Period Ended June 30, 2019 (ALL). (Adelman)

FISCAL IMPACT

None.

DISCUSSION

In accordance with California Government Code Section 7504, the Retirement Plans for employees of the Sacramento Regional Transit District (District) are required to have an annual audit performed. Crowe LLC conducted the Plans' audit in accordance with generally accepted auditing standards. The standards require that the auditors plan and perform the audit to obtain reasonable assurance that the Plans' financial statements are free of material misstatements.

For the fiscal year ended June 30, 2019, the investment assets for the ATU, IBEW and Salaried Plans were combined into one commingled investment portfolio. The balance of investments owned by the ATU, IBEW and Salaried Plans are calculated based on a percentage of ownership as determined by the ATU, IBEW and Salaried Plans' custodian.

As noted in the report (Attachment 1), the combined net position held in trust for pension benefits increased \$13,910,135 or 4.91% from the beginning-of-year balance of \$283,474,775 to the end-of-year balance of \$297,384,910. The audit confirmed that the District made 100% of its actuarially determined contribution of \$20,336,135.

The audit also determined that the Retirement Plans' financial statements are free of material misstatements and that the Retirement Plans are operated with appropriate internal controls.

Staff Recommendation

The following documents (Attachments 1-3) are submitted to the Board for receipt and filing:

-) The Audited Financial Statements – Attachment 1
-) Report to the Board of Directors – Attachment 2
-) Report on Internal Control – Attachment 3

INDEPENDENT AUDITOR'S REPORT

Members of the Retirement Board of Directors
Sacramento Regional Transit District
Sacramento, California

Report on the Financial Statements

We have audited the accompanying financial statements of the ATU Plan, IBEW Plan and Salaried Plan for Sacramento Regional Transit District Employees (the Plans), as of and for the year ended June 30, 2019, and the related notes to the financial statements, which collectively comprise the Plans' basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Plans' preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plans' internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective fiduciary net position of the ATU Plan, IBEW Plan and the Salaried Plan for Sacramento Regional Transit District Employees as of June 30, 2019, and the respective changes in fiduciary net position for the year then ended in conformity with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the Schedules of Changes in the Net Pension Liability and Related Ratios, Schedules of District Contributions, and the Schedule of Investment Returns, as listed in the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Management has omitted the Management's Discussion and Analysis that governmental accounting principles generally accepted in the United States of America require to be presented to supplement the basic financial statements. Such missing information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. Our opinion on the basic financial statements is not affected by this missing information.

Supplementary Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the ATU Plan's, IBEW Plan's and the Salaried Plan's basic financial statements. The accompanying Members of the Retirement Board and Administrative Staff section and Schedules of Investment and Administrative Expenses, as listed in the table of contents, are presented for purposes of additional analysis and are not a required part of the financial statements.

The accompanying Schedules of Investment and Administrative Expenses are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the Schedules of Investment and Administrative Expenses are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The Members of the Retirement Board and Administrative Staff section has not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on it.

The accompanying notes to the financial statements are an integral part of these financial statements.

RETIREMENT PLANS FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES

NOTES TO THE FINANCIAL STATEMENTS FOR THE FISCAL YEAR ENDED JUNE 30, 2019

1. DESCRIPTION OF THE PLANS

The financial statements of the Retirement Plans for the Sacramento Regional Transit District Employees encompass the financial position and changes therein, for the ATU, IBEW, and Salaried Plans. The combined plans are reported as pension trust funds in the Sacramento Regional Transit District's (District) financial statements.

ATU and IBEW Plans

The Retirement Plan for Sacramento Regional Transit District Employees who are Members of Amalgamated Transit Union (ATU Plan) Local 256 and International Brotherhood of Electrical Workers (IBEW Plan) Local 1245 are single employer defined benefit pension plans covering contract employees of the District. Participants should refer to their respective plan agreements for more complete information. The ATU Plan and IBEW Plan were accounted for as one plan for accounting purposes prior to 2017 (collectively, the ATU/IBEW Plan). Effective July 1, 2016, separate trust agreements and financial record keeping was created for the ATU Plan and IBEW Plan based on actuarial calculations and trustee transactions. Each trust allows for accumulation of assets solely for the payment of benefits to plan members. The changes were approved and required by the Internal Revenue Service in order to establish the individual trusts.

Salaried Plan

The Retirement Plan for Sacramento Regional Transit District Salaried Employees (Salaried Plan) is a single employer defined benefit pension plan covering full- or part-time employees in the following employee groups: Administrative Employees Association (AEA), Management and Confidential Employees Group (MCEG), and the American Federation of State, County & Municipal Employees, Local 146, AFL-CIO (AFSCME). AFSCME is further split into two groups AFSCME-Technical and AFSCME-Supervisors. Participants should refer to the Salaried Plan agreement for more complete information. The Salaried Plan is reported as a pension trust fund in the District's financial statements.

Plan Tier Definition – As a result of labor negotiations and the court ruling on the Public Employees' Pension Reform Act (PEPRA), Tier 2 was created in the ATU, IBEW and Salaried Plans, as well as a Tier 3 for the ATU only. The Tiers effective dates are directly affected by labor negotiations and whether the union/employee group was under a current Memorandum of Understanding (MOU). As of June 30, 2019 the following tiers apply to employees, based on their date of hire.

- ATU – Tier 1 consists of all employees hired on or before December 31, 2014, Tier 2 consists of all employees hired on or after January 1, 2016, Tier 3 consists of all employees hired during the time period January 1, 2015 to December 31, 2015.
- IBEW – Tier 1 consists of all employees hired on or before December 30, 2014, Tier 2 consists of all employees hired on or after December 31, 2014.
- Salaried – Tier 1 consists of all employees hired on or before December 30, 2014, Tier 2 consists of all employees hired on or after December 31, 2014.

Tier 1 and Tier 3 are closed to new entrants as all newly hired employees will be placed into the respective Tier 2 plans.

**RETIREMENT PLANS FOR SACRAMENTO REGIONAL TRANSIT
DISTRICT EMPLOYEES**

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
FOR THE FISCAL YEAR ENDED
JUNE 30, 2019**

1. DESCRIPTION OF THE PLANS (Continued)

General Provisions ATU, IBEW and Salaried Plans

Contributions to the ATU, IBEW and Salaried Plans are authorized or amended by the Retirement Board based on an actuarial basis. The authority under which benefit provisions are established and amended rests with the District's Board of Directors as a result of labor negotiations. Assembly Bill 1064, effective January 1, 2004, mandates that the Retirement Boards be comprised of equal representation of management and Bargaining Group employees. The Retirement Board shall consist of not more than 4 members and 2 alternates. Two (2) voting members and one (1) alternate shall be appointed by the District's Board of Directors and two (2) voting members and one (1) alternate shall be appointed by the ATU, IBEW, AEA, AFSCME, and MCEG member groups.

The ATU, IBEW and Salaried Plans provide defined pension, disability, and death benefits to employees who are members of the ATU, IBEW, AEA, MCEG, AFSCME-Technical, and AFSCME-Supervisors bargaining units.

Plan membership for Tier 1, Tier 2 and Tier 3, at June 30, 2019, consisted of:

	ATU	IBEW	Salaried
Retirees and beneficiaries currently receiving benefits	467	142	314
Terminated members entitled to but not yet collecting benefits	26	18	45
Current active members	514	207	235
	1,007	367	594

Change in Bargaining Group - Changes in bargaining groups occur when an active employee of any Plan accepts a new position with a bargaining unit that participates in another Plan. When a change in bargaining group occurs contributions made on behalf of that employee must be assessed to determine if the assets need to be moved to the new Plan. Amounts related to a change in bargaining group are recorded upon final verification and approval of calculated amounts by the District and the related bargaining group's retirement board. During the year ending June 30, 2019 assets were moved from the ATU Plan to the Salaried Plan in the amount of \$343,707. The effects of the change can be seen on the Statement of Changes in Net Position as Change in Bargaining Group within the additions and deductions categories.

1. DESCRIPTION OF THE PLANS (Continued)

RETIREMENT BENEFITS

Table 1 below presents a summary of the retirement benefits for Tier 1 employees for each of the employee groups represented by the ATU, IBEW and Salaried Plans. Table 1 also includes the summary for ATU Tier 3.

Table 1

TIER 1 & TIER 3	ATU Plan	IBEW Plan	Salaried Plan			
Employee Unions/Groups	ATU	IBEW	AFSCME - Technical	AFSCME - Supervisors	AEA	MCEG
Plan Terms	MOU	MOU	MOU	MOU	MOU	MOU
Vesting Period: Years of Service - % Vested	10 - 100%	5 - 100%	5 - 20% 6 - 40% 7 - 60% 8 - 80% 9 - 100%	9 - 100%	5 - 100%	5 - 100%
Vacation and sick leave sell back towards pension calculation	Allowable	Allowable	Allowable	Allowable	Allowable	Allowable
Disability Retirement Multiplier	Equal to applicable retirement age multiplier or 2% if age and service are not met. Vesting required					

**RETIREMENT PLANS FOR SACRAMENTO REGIONAL TRANSIT
DISTRICT EMPLOYEES**

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
FOR THE FISCAL YEAR ENDED
JUNE 30, 2019**

1. DESCRIPTION OF THE PLANS (Continued)

Table 2 below presents a summary of the retirement benefits for Tier 2 employees for each of the employee groups represented by the ATU, IBEW and Salaried Plans.

Table 2

TIER 2	ATU Plan	IBEW Plan	Salaried Plan			
Employee Unions/Groups	ATU	IBEW	AFSCME - Technical	AFSCME - Supervisors	AEA	MCEG
Plan Terms	PEPRA	PEPRA	PEPRA	PEPRA	PEPRA	PEPRA
Vesting Period: Years of Service - % Vested	5 - 100%	5 - 100%	5 - 100%	5 - 100%	5 - 100%	5 - 100%
Vacation and sick sell back towards pension calculation	Not Allowable	Not Allowable	Not Allowable	Not Allowable	Not Allowable	Not Allowable
Disability Retirement Multiplier	Equal to applicable retirement age multiplier or 2% if age and service are not met. Vesting required					

The retirement ages, years of service and pension calculation multipliers vary by employee union/group. The multipliers and years of service range from 2% at age 55 or 25 years of service to 2.5% at age 60 or 30 or more years of service for Tier 1 and Tier 3. All Tier 2 participants fall under PEPRA requirements.

The benefits for both Tier 1 and Tier 2 members begin at retirement and continue for the participant's life with no cost of living adjustment. The participant can elect to receive reduced benefits with continuing benefits to a beneficiary after death.

Disability Benefits – A participant is eligible for a disability benefit if the participant is unable to perform the duties of his or her job with the District, cannot be transferred to another job with the District, and has submitted satisfactory medical evidence of permanent disqualification from his or her job. Members are required to be vested in their respective union or employee group to qualify for disability retirement. The disability benefit is equal to the retirement allowance, as defined by the ATU, IBEW or Salaried Plan, multiplied by service accrued through the date of disability. The disability benefit cannot exceed the retirement benefit. The benefit begins at disability and continues until recovery or for the participant's life unless the participant elects to receive reduced benefits with continuing benefits to a beneficiary after death.

Pre-Retirement Death Benefit – A participant's surviving spouse is eligible for a pre-retirement death benefit if the participant is vested, based on the respective bargaining agreements. The pre-retirement death benefit is the actuarial equivalent of the normal retirement benefit, as if the participant retired on the date of death. The death benefit begins when the participant dies and continues for the life of the surviving spouse.

RETIREMENT PLANS FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE FISCAL YEAR ENDED JUNE 30, 2019

1. DESCRIPTION OF THE PLANS (Continued)

Administration – The ATU, IBEW, and Salaried Plans are administered by the ATU, IBEW, and Salaried Plan's Retirement Boards. All expenses incurred in the administration of the ATU, IBEW, and Salaried Plans are paid by the respective plan.

Plan Termination – Should the ATU, IBEW or the Salaried Plan be terminated, the Plans' net position will first be applied to provide for retirement benefits to retired members. Any remaining net position will be allocated to other members, oldest first both active and inactive, on the basis of the actuarial present value of their benefits.

2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting – The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America. The ATU, IBEW and Salaried Plans are reported as pension trust funds which report resources that are required to be held in trust for the members and beneficiaries of the defined benefit pension plans. The ATU, IBEW and Salaried Plans are accounted for on the flow of economic resources measurement focus and the accrual basis of accounting.

The ATU, IBEW and Salaried Plans have adopted Governmental Accounting Standards Board (GASB) Statement No. 67, *Financial Reporting for Pension Plans – an amendment of GASB Statement No. 25*, as their source of accounting and reporting principles. The District's contributions to the ATU, IBEW and Salaried Plans are recognized in the period in which the contributions are due pursuant to formal commitments or contractual requirements. Benefits and refunds are recognized when due and payable in accordance with the ATU, IBEW and Salaried Plans' agreements.

Cash and Short-Term Investments – The ATU, IBEW and Salaried Plans consider all highly liquid investments with an original maturity of three months or less to be short-term investments.

Investments – Investments consist of securities or other assets held primarily for the purpose of income or profit and their present service capacity is based solely on its ability to generate cash or to be sold to generate cash. Realized gains or losses on the sale of investments are recorded on the trade date as the difference between proceeds received and the fair value at the beginning of the year, or cost if acquired during the year. Net appreciation (depreciation) in fair value of investments includes net unrealized market appreciation and depreciation of investments and net realized gains and losses on the sale of investments during the period. Interest income includes dividends and interest paid on the ATU, IBEW and Salaried Plans' investments. The investment assets for the ATU, IBEW and the Salaried Plans are combined into one commingled investment portfolio. The balances of investments owned by the plans are calculated based on a percentage of ownership as determined by the Plans' custodian, State Street.

Estimates – The preparation of financial statements in conformity with generally accepted accounting principles requires the ATU, IBEW and Salaried Plans' administrators to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results may differ from those estimates.

New Pronouncements – For the fiscal year ended June 30, 2019, the ATU, IBEW and Salaried Plans did not implement new GASB pronouncements as they did not apply to the ATU, IBEW and Salaried Plans' financial activity or were immaterial.

There are currently no future pronouncements that will be applicable to or will have a material impact on the ATU, IBEW and Salaried Plans' financial statements.

DISTRICT EMPLOYEES**

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
FOR THE FISCAL YEAR ENDED
JUNE 30, 2019**

3. CONTRIBUTION REQUIREMENTS

EMPLOYER CONTRIBUTIONS

The ATU, IBEW and Salaried Plans' funding policies provides for actuarially determined periodic contributions. Contribution rates for retirement benefits are determined using the entry age normal cost method. During the fiscal year ended June 30, 2019, the District made 100% of the actuarially determined contributions to the ATU, IBEW and Salaried Plans of \$20,336,135, for all employees.

TIER 1 EMPLOYEES

For the fiscal year ended June 30, 2019, the actuarially determined rate for the ATU Plan was 28.15% of covered payroll, the IBEW Plan was 25.03% of covered payroll, and the Salaried Plan was 34.30% of covered payroll. No contributions are required by the ATU, IBEW and Salaried Plans' members pursuant to each respective bargaining agreement for employees hired before January 1, 2015.

TIER 2 EMPLOYEES

As of January 1, 2015, all new employees were required to contribute to their pension based upon the terms of the bargaining groups MOU or based on PEPRA.

ATU employees are required to contribute 50% of normal cost which is currently 6.50% of their annual salary. The employer portion of the actuarially determined rate for the ATU members was 21.65% of covered payroll for the fiscal year ending June 30, 2019. The total contribution by Tier 2 employees of the ATU Plan for the fiscal year ended June 30, 2019 was \$447,767.

IBEW employees are required to contribute 50% of normal cost which is currently 5.25% of their annual salary. The employer portion of the actuarially determined rate for the IBEW members was 19.78% of covered payroll for the fiscal year ending June 30, 2019. The total contribution by Tier 2 employees of the IBEW Plan for the fiscal year ended June 30, 2019 was \$209,531.

Members of AEA, MCEG, AFSCME-Supervisors, and AFSCME-Technical are required to contribute 50% of normal cost which is currently 5.25% of their annual salary. The employer portion of the actuarially determined rate for the AEA, MCEG, and AFSCME-Supervisors members was 29.05% of covered payroll for the fiscal year ending June 30, 2019. The total contribution by Tier 2 employees of the Salaried Plan for the fiscal year ended June 30, 2019 was \$193,293.

The employee contribution rates calculated in compliance with PEPRA, for June 30, 2019, were actuarially determined as part of the valuations dated July 1, 2017.

TIER 3 EMPLOYEES

ATU employees hired during the time period January 1, 2015 and December 31, 2015, are required to contribute 3% of pay. The employer portion of the actuarially determined rate for the ATU members was 25.15% of covered payroll for the fiscal year ending June 30, 2019. The total contribution by Tier 3 employees of the ATU Plan for the fiscal year ended June 30, 2019 was \$45,830.

**RETIREMENT PLANS FOR SACRAMENTO REGIONAL TRANSIT
DISTRICT EMPLOYEES**

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
FOR THE FISCAL YEAR ENDED
JUNE 30, 2019**

4. CASH AND INVESTMENTS

CASH AND SHORT-TERM INVESTMENTS

At June 30, 2019, the reported amount of cash and short-term investments of the ATU, IBEW and Salaried Plans was \$10,781,293. The amount was collateralized with securities held by the counterparty's trust department or agent in the District's name on behalf of the Retirement Plans.

INVESTMENTS

An annual Board-adopted policy, the "Statement of Investment Objectives and Policy Guidelines for the Sacramento Regional Transit District Retirement Plans" (Policy), governs the ATU, IBEW and Salaried Plans' investments. The Policy focuses on the continued feasibility of achieving, and the appropriateness of, the Asset Allocation Policy, the Investment Objectives, the Investment Policies and Guidelines, and the Investment Restrictions. The Retirement Boards have the authority to amend the asset allocation targets as well as establish and amend investment policies. The following was the Plans' adopted asset allocation policy as of June 30, 2019:

<u>Asset Class</u>	<u>Target Allocation</u>
Domestic Equity Large Cap	32%
Domestic Equity Small Cap	8%
International Equity Developed Large Cap	14%
International Equity Developed Small Cap	5%
International Equity Emerging Markets	6%
Domestic Fixed Income	35%

For the years ended June 30, 2019, the annual money-weighted rate of return on pension plan investments, net of pension plan investment expenses, was 6.23%. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

4. CASH AND INVESTMENTS (Continued)

INVESTMENT RISK FACTORS

There are many factors that can affect the value of investments. Such factors as interest rate risk, credit risk, custodial credit risk, concentration of credit risk, and foreign currency risk may affect both equity and fixed income securities.

INTEREST RATE RISK

Interest rate risk is the risk that the value of fixed income securities will decline because of rising interest rates. The prices of fixed income securities with a longer time to maturity, measured by duration, tend to be more sensitive to changes in interest rates and, therefore, more volatile than those with shorter duration.

The following table provides information about the interest rate risks associated with the ATU, IBEW and Salaried Plans' investments at June 30, 2019.

	Maturity in Years				Amount
	Less than 1	1 - 5	6 - 10	More than 10	
Collateralized Mortgage Obligations	\$ -	\$ 566,076	\$ 365,560	\$ 6,183,537	\$ 7,115,173
Corporate Bonds	1,662,113	10,886,361	9,260,826	6,898,510	28,707,810
Municipal Bonds	-	-	131,153	460,597	591,750
U.S. Government Agency Obligations	-	24,034	1,134,174	28,669,525	29,827,733
U.S. Government Issued Obligations	-	15,945,332	3,134,353	7,627,936	26,707,621
Asset-Backed Securities	-	681,023	1,473,513	7,584,764	9,739,300
Total	\$ 1,662,113	\$ 28,102,826	\$ 15,499,579	\$ 57,424,869	\$ 102,689,387

In accordance with the ATU, IBEW and Salaried Plans' investment policy, investments may include collateralized mortgage obligations, mortgage pass-through securities, asset-backed securities, callable bonds and corporate debts that are considered to be highly sensitive to changes in interest rates.

**RETIREMENT PLANS FOR SACRAMENTO REGIONAL TRANSIT
DISTRICT EMPLOYEES**

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
FOR THE FISCAL YEAR ENDED
JUNE 30, 2019**

4. CASH AND INVESTMENTS (Continued)

COLLATERALIZED MORTGAGE OBLIGATIONS

Collateralized mortgage obligations (CMOs) are bonds that represent claims to specific cash flow from large pools of home mortgages. The streams of principal and interest payments on the mortgages are distributed to the different classes of CMO interests.

CMOs are often highly sensitive to changes in interest rates and any resulting change in the rate at which homeowners sell their properties, refinance, or otherwise pre-pay their loans. Investors in these securities may not only be subjected to such prepayment risk, but also exposed to significant market and liquidity risks.

MORTGAGE PASS-THROUGH SECURITIES

These securities, disclosed as U.S. Government Agency Obligations in the interest rate risk table above, are issued by Government Sponsored Enterprises (GSEs) which are a group of financial services corporations created by the United States Congress. The GSEs include: the Federal National Mortgage Association (Fannie Mae), the Federal Home Loan Mortgage Corporation (Freddie Mac), and the Federal Home Loan Banks. Another institution that issues these securities is the Government National Mortgage Association (Ginnie Mae). These securities are highly sensitive to interest rate fluctuations because they are subject to early payment. In a period of declining interest rate, the resulting reduction in expected total cash flows affects the value of these securities.

ASSET-BACKED SECURITIES

Asset-backed securities generate a return based upon either the payment of interest or principal on obligations in an underlying pool. The relationship between interest rates and prepayments make the value highly sensitive to changes in interest rates.

CALLABLE BONDS

Although bonds are issued with clearly defined maturities, an issuer may be able to redeem, or call, a bond earlier than its maturity date. The Plans must then replace the called bond with a bond that may have a lower yield than the original bond. The call feature causes the value to be highly sensitive to changes in interest rates. As of June 30, 2019, the ATU, IBEW and Salaried Plans held callable bonds with a value of \$18,843,046.

CREDIT RISK

Fixed income securities are subject to credit risk, which is the risk that a bond issuer or other counterparty to a debt instrument will not fulfill its obligation to pay interest or principal in a timely manner, or that negative perceptions of the issuer's ability to make these payments will cause security prices to decline. The circumstances may arise due to a variety of factors such as financial weakness, bankruptcy, litigation and/or adverse political developments.

**RETIREMENT PLANS FOR SACRAMENTO REGIONAL TRANSIT
DISTRICT EMPLOYEES**

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
FOR THE FISCAL YEAR ENDED
JUNE 30, 2019**

4. CASH AND INVESTMENTS (Continued)

A bond's credit quality is an assessment of the issuer's ability to pay interest on the bond, and ultimately, to pay the principal. Credit quality is evaluated by one of the independent bond-rating agencies, for example Moody's Investors Services (Moody's). The lower the rating the greater the chance, in the rating agency's opinion, the bond issuer will default, or fail to meet their payment obligations. Generally, the lower a bond's credit rating, the higher its yield should be to compensate for the additional risk.

Certain fixed income securities, including obligations of the U.S. government or those explicitly guaranteed by the U.S. government, are not considered to have credit risk.

For the fiscal year ending June 30, 2019, the ATU, IBEW and Salaried Plans were in adherence with the credit risk provisions of the Statement of Investment Objectives and Policy Guidelines which require a minimum overall portfolio quality rating and a minimum credit rating at the time of purchase.

The following table provides information on the credit ratings and fair value associated with the ATU, IBEW and Salaried Plans' investments as of June 30, 2019.

Investment Rating	Amount	Percentage of Portfolio
Not Applicable	\$ 188,933,546	64.79%

4. CASH AND INVESTMENTS (Continued)

CONCENTRATION OF CREDIT RISK

Concentration of credit risk is the risk associated with a lack of diversification of having too much invested in a few individual issuers, thereby exposing the organization to greater risks resulting from adverse economic, political, regulatory, geographic, or credit developments.

The investment policies of the ATU, IBEW and Salaried Plans state that an investment in each domestic or international equity fund managers' securities of a single issuer shall not exceed 5% (at cost) of the value of the portfolios and/or of the total outstanding shares. As of June 30, 2019, the Plans held more than 5% of the Plans' fiduciary net position and more than 5% of total investments in the following fixed-income securities investments.

Federal Home Loan Mortgage Corporation	\$ 16,680,482
--	---------------

CUSTODIAL CREDIT RISK

Custodial credit risk for *deposits* is the risk that, in the event of the failure of a depository financial institution, a government will not be able to recover its deposits or will not be able to recover collateral securities that are in the possession of an outside party.

The custodial credit risk for *investments* is the risk that, in the event of the failure of the counterparty (e.g., broker-dealer) to a transaction, a government will not be able to recover the value of its investment or collateral securities that are in the possession of another party. The ATU, IBEW and Salaried Plans' investment policy does not contain legal or policy requirements that would limit the exposure to custodial credit risk for deposits or investments. The ATU, IBEW and Salaried Plans' investment securities are not exposed to custodial credit risk because all securities are held by the ATU, IBEW and Salaried Plans' custodian bank in the District's name.

FOREIGN CURRENCY RISK

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or a deposit. The ATU, IBEW and Salaried Plans' investment policy states international equity securities shall be comprised of American Depository Receipts (ADR) of non-U.S. companies, common stocks of non-U.S. companies, preferred stocks of non-U.S. companies, foreign convertible securities including debentures convertible to common stocks, and cash equivalents.

As of June 30, 2019, the ATU, IBEW and Salaried Plans do not have any deposits or investments in a foreign currency.

4. CASH AND INVESTMENTS (Continued)

Fair Value Measurements

The ATU, IBEW and Salaried Plans categorize their fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted market prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs. The ATU, IBEW and Salaried Plans had the following recurring fair value measurements as of June 30, 2019:

	June 30, 2019	Fair Value Measurements Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Debt Securities				
Collateralize mortgage obligations	\$ 7,115,173	\$ -	\$ 7,115,173	\$ -
Corporate bonds	28,707,810	-	28,707,810	-
Municipals	591,750	-	591,750	-
U.S. Government Agency obligations	29,827,733	-	29,827,733	-
U.S. Government issued obligations	26,707,621	-	26,707,621	-
Asset backed obligations	9,739,300	-	9,739,300	-
Equity Securities				
Common stock	68,132,659	68,132,659	-	-
Depository receipts	504,111	504,111	-	-
Real estate investment trust	1,191,964	1,191,964	-	-
Total investments by fair value level	<u>\$ 172,518,121</u>	<u>\$ 69,828,734</u>	<u>\$ 102,689,387</u>	<u>\$ -</u>

4. CASH AND INVESTMENTS (Continued)

Debt and equity securities classified in Level 1 of the fair value hierarchy are valued using prices quoted in active markets for those securities. Debt securities classified in Level 2 of the fair value hierarchy are valued using a matrix pricing technique. Matrix pricing is used to value securities based on the securities' relationship to benchmark quoted prices. Net asset value (NAV) securities are valued based on the net asset value of the pooled investments. The NAV is determined by dividing the total value of the securities and other assets, less any liabilities, by the total outstanding shares of the fund.

Investment measured at the net asset value (NAV)

	06/30/2019	Fair Value	Unfunded Commitments	Redemptions Frequency	Redemptions Notice Period
S&P 500 index fund ¹	\$ 50,461,404	\$ 50,461,404	\$ -	Daily	1 day
MSCI EAFE index fund ²	11,402,909	11,402,909	-	Semi-monthly	6-8 days
International large capital equity fund ³	27,795,829	27,795,829	-	Monthly	7 days
International small capital equity fund ⁴	12,987,509	12,987,509	-	Monthly	2 days
International emerging markets fund ⁵	16,457,161	16,457,161	-	Daily	1 day
Total investments measured at the NAV	<u>\$ 119,104,812</u>	<u>\$ 119,104,812</u>	<u>\$ -</u>		

1. S&P 500 index fund. This type includes an investment in a S&P 500 index fund that invests to match the S&P 500® Index. The S&P 500 is made up of primarily U.S. common stocks. The fair value of the investment in this type has been determined using the NAV per unit of the investment. The NAV per unit of the investment are determined each business day. Issuances and redemptions of fund units may be made on such days, based upon the closing market value on the valuation date of the investments bought or sold and the NAV per unit of the fund.

2. MSCI EAFE index fund. This type includes an investment in the Morgan Stanley Capital International Europe, Australasia, Far East Index (MSCI EAFE) Index fund that invest to approximate as closely as practicable, before expenses, the performance of the MSCI EAFE Index over the long term. The MSCI EAFE Index is made up of primarily International stocks. The per unit NAV of the fund is determined as of the last business day of each month and at least one other business day during the month. Issuances and redemptions of fund units may be made on such days, based upon the closing market value on the valuation date of the investments bought or sold and the NAV per unit of the fund.

3. International large capital equity fund. This type includes an investment in an International Equity Fund that seeks total return from long-term capital growth and income, while attempting to outperform the MSCI EAFE Index over a market cycle, gross of fees. The fair value of the investment in this type has been determined using the NAV per unit of the investment. The Trust has one dealing day per month, which is the first business day, and units are issued based upon a valuation on the last business day of the preceding month.

4. International small capital equity fund. The fund intends to utilize a set of valuation, momentum and economic factors to generate an investment portfolio based on security selection procedures geared to assist the fund in meeting its investment objectives. The fund generally will be managed by underweighting and overweighting securities relative to the benchmark. The investment objective is to outperform the MSCI EAFE Small Cap Index over a full market cycle. The fair value of the investment in this type has been determined using the NAV per unit of the investment. The fund has one dealing day per month, which is the first business day, and notification is required at least two business days in advance of a subscription or withdrawal.

FOR THE FISCAL YEAR ENDED
JUNE 30, 2019**

4. CASH AND INVESTMENTS (Continued)

5. International emerging markets fund. This type invests substantially all of its assets in the Emerging Market Series. The Emerging Market Series purchases a broad market coverage of larger companies associated with emerging markets, which may include frontier markets (emerging market countries in an earlier stage of development), authorized for investment by the Advisor's Investment Committee. As a non-fundamental policy, under normal circumstances, the Emerging Markets Series will invest at least 80% of its net assets in emerging markets investments that are defined in the Prospectus as Approved Market securities. The fair values of the investments in this type have been determined using the NAV per share of the investments. Investors may purchase or redeem shares of the fund on any business day.

5. NET PENSION LIABILITY

ATU Plan

The components of the net pension liability of the ATU Plan at June 30, 2019, were as follows:

Total pension liability	\$	183,053,830
Plan fiduciary net position		(138,049,710)
ATU net pension liability	<u>\$</u>	<u>45,004,120</u>
Plan fiduciary net position as a percentage of the total pension liability		75.41%

The total pension liability was determined by an actuarial valuation as of July 1, 2018, using the following actuarial assumptions, applied to all periods included in the measurement, and using update procedures to roll forward the total pension liability to the pension plan's fiscal year-end:

Inflation	3.00%
Amortization growth rate	3.00%
Salary increases	3.00%, plus merit component
Investment Rate of Return	7.25%, net of investment expense
Post-retirement mortality	RP 2014 w/ Scale MP-2015, base tables adjusted 115% for males and 130% for females

The actuarial assumptions used in the July 1, 2018 valuation were based on the results of an actuarial experience study for the period July 1, 2011 through June 30, 2015.

The discount rate used to measure the Total Pension Liability was 7.25%. The projection of cash flows used to determine the discount rate assumed that the District will continue to contribute to the ATU Plan based on an actuarially determined contribution, reflecting a payment equal to annual Normal Cost, the expected administrative expenses, and an amount necessary to amortize the remaining Unfunded Actuarial Liability as a level percentage of payroll over a closed period (14 years remaining as of the July 1, 2018 actuarial valuation).

Based on those assumptions, the ATU Plan's fiduciary net position was projected to be available to make all projected future benefit payments of the current ATU Plan members. Therefore, the long-term expected rate of return on the ATU Plan's investments was applied to all periods of projected benefit payments to determine the Total Pension Liability.

DISTRICT EMPLOYEES**

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
FOR THE FISCAL YEAR ENDED
JUNE 30, 2019**

5. NET PENSION LIABILITY (Continued)

The following presents the net pension liability of the ATU Plan, calculated using the discount rate of 7.25 percent, as well as what the ATU Plan's net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (6.25%) or 1-percentage-point higher (8.25%) than the current rate:

	1% Decrease 6.25%	Discount Rate 7.25%	1% Increase 8.25%
Total pension liability	\$ 201,535,070	\$ 183,053,830	\$ 167,226,379
Plan fiduciary net position	(138,049,710)	(138,049,710)	(138,049,710)
Net pension liability	\$ 63,485,360	\$ 45,004,120	\$ 29,176,669
Plan fiduciary net position as a percentage of the total pension liability	68.50%	75.41%	82.55%

IBEW Plan

The components of the net pension liability of the IBEW Plan at June 30, 2019, were as follows:

Total pension liability	\$ 80,003,157
Plan fiduciary net position	(60,149,108)
IBEW net pension liability	\$ 19,854,049
Plan fiduciary net position as a percentage of the total pension liability	75.18%

The total pension liability was determined by an actuarial valuation as of July 1, 2018, using the following actuarial assumptions, applied to all periods included in the measurement, and using update procedures to roll forward the total pension liability to the pension plan's fiscal year-end:

Inflation	3.00%
Amortization growth rate	3.00%
Salary increases	3.00%, plus merit component
Investment Rate of Return	7.25%, net of investment expense
Post-retirement mortality	RP 2014 w/ Scale MP-2015, base tables adjusted 115% for males and 130% for females

The actuarial assumptions used in the July 1, 2018 valuation were based on the results of an actuarial experience study for the period July 1, 2011 through June 30, 2015.

The discount rate used to measure the Total Pension Liability was 7.25%. The projection of cash flows used to determine the discount rate assumed that the District will continue to contribute to the IBEW Plan based on an actuarially determined contribution, reflecting a payment equal to annual Normal Cost, the expected administrative expenses, and an amount necessary to amortize the remaining Unfunded Actuarial Liability as a level percentage of payroll over a closed period (14 years remaining as of the July 1, 2018 actuarial valuation).

5. NET PENSION LIABILITY (Continued)

Based on those assumptions, the IBEW Plan's fiduciary net position was projected to be available to make all projected future benefit payments of the current IBEW Plan members. Therefore, the long-term expected rate of return on the IBEW Plan's investments was applied to all periods of projected benefit payments to determine the Total Pension Liability.

The following presents the net pension liability of the IBEW Plan, calculated using the discount rate of 7.25 percent, as well as what the IBEW Plan's net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (6.25%) or 1-percentage-point higher (8.25%) than the current rate:

	1% Decrease 6.25%	Discount Rate 7.25%	1% Increase 8.25%
Total pension liability	\$ 88,680,041	\$ 80,003,157	\$ 72,618,426
Plan fiduciary net position	(60,149,108)	(60,149,108)	(60,149,108)
Net pension liability	\$ 28,530,933	\$ 19,854,049	\$ 12,469,318
Plan fiduciary net position as a percentage of the total pension liability	67.83%	75.18%	82.83%

Salaried Plan

The components of the net pension liability of the Salaried Plan at June 30, 2019, were as follows:

Total pension liability	\$ 151,558,856
Plan fiduciary net position	(99,186,092)
Salaried net pension liability	\$ 52,372,764
Plan fiduciary net position as a percentage of the total pension liability	65.44%

5. NET PENSION LIABILITY (Continued)

The total pension liability was determined by an actuarial valuation as of July 1, 2018, using the following actuarial assumptions, applied to all periods included in the measurement, and using update procedures to roll forward the total pension liability to the pension plan's fiscal year-end:

Inflation	3.00%
Amortization growth rate	3.00%
Salary increases	3.00%, plus merit component
Investment Rate of Return	7.25%, net of investment expense
Post-retirement mortality	RP 2014 w/ Scale MP-2015, base tables adjusted 130% for females

The actuarial assumptions used in the July 1, 2018 valuation were based on the results of an actuarial experience study for the period July 1, 2011 through June 30, 2015.

The discount rate used to measure the Total Pension Liability was 7.25%. The projection of cash flows used to determine the discount rate assumed that the District will continue to contribute to the Salaried Plan based on an actuarially determined contribution, reflecting a payment equal to annual Normal Cost, the expected administrative expenses, and an amount necessary to amortize the remaining Unfunded Actuarial Liability as a level percentage of payroll over a closed period (14 years remaining as of the July 1, 2018 actuarial valuation).

Based on those assumptions, the Salaried Plan's fiduciary net position was projected to be available to make all projected future benefit payments of the current Salaried Plan members. Therefore, the long-term expected rate of return on Salaried Plan investments was applied to all periods of projected benefit payments to determine the Total Pension Liability.

The following presents the net pension liability of the Salaried Plan, calculated using the discount rate of 7.25 percent, as well as what the Salaried Plan's net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (6.25%) or 1-percentage-point higher (8.25%) than the current rate:

	1% Decrease 6.25%	Discount Rate 7.25%	1% Increase 8.25%

FOR THE FISCAL YEAR ENDED
JUNE 30, 2019**

5. NET PENSION LIABILITY (Continued)

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Actuarially determined amounts are subject to continual revision as actual results are compared to past expectations and new estimates are made about the future. Actuarial calculations reflect a long-term perspective and are based on the benefits provided under the terms of the substantive plan in effect at the time of each valuation. Actuarial methods and assumptions used include techniques designed to reduce short-term volatility in actuarial accrued liabilities and the actuarial value of plan assets.

The projection of benefits for financial reporting purposes does not explicitly incorporate the potential effect of legal or contractual funding limitations.

ATU, IBEW and Salaried Plan

The ATU, IBEW, and Salaried Plans' investments are invested as one comingled fund for economies of scale. The long-term expected rate of return on pension plan's investments were determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the pension plan's target asset allocation as of June 30, 2019, are summarized in the following table:

Asset Class	Long-Term Expected Real Rate of Return
Domestic Equity Large Cap	8.25%
Domestic Equity Small Cap	9.55%
International Equity Developed	8.70%
International Equity Emerging	10.70%
Domestic Fixed Income	3.75%

Covered payroll	\$ 39,996,326	\$ 37,950,269	\$ 38,857,668
Net pension liability as a percentage of covered payroll	176.89%	133.33%	114.65%

Notes to Schedule:

- Beginning in FY2015, payroll amounts are based on actual pensionable compensation from the employer. In prior years, payroll amounts are projected payroll from the actuarial valuation reports
- FY2015: amounts reported as changes of assumptions resulted from lowering the discount rate from 7.75% to 7.65%
- FY2016: amounts reported as changes of assumptions resulted from lowering the discount rate from 7.65% to 7.50% and updated demographic and economic assumptions that were adopted following an experience study
- FY2017: the ATU and IBEW Plans were separated; combined disclosures are not available going forward. See schedules of the individual plans on pages 24 and 25.

Information prior to 2014 is not available.

RETIREMENT PLANS FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES

**SCHEDULE OF DISTRICT CONTRIBUTIONS
EMPLOYEES WHO ARE MEMBERS OF
ATU LOCAL 256
FOR THE FISCAL YEARS ENDING JUNE 30, 2019, 2018 AND 2017
(Dollar amounts in thousands)**

	2019	2018	2017
Actuarially determined contribution	\$ 8,533	\$ 7,863	\$ 7,987
Contributions in relation to the actuarially determined contribution	8,533	7,863	7,987
Contribution deficiency (excess)	-	-	-
Covered payroll	\$ 30,126	\$ 31,575	\$ 30,212
Contributions as a percentage of covered payroll	28.33%	24.90%	26.44%

Notes to Schedule

Valuation Date
Timing

7/1/2017 (to determine FY18-19 contribution)
Actuarially determined contribution rates are calculated based on the actuarial valuation one year prior to the beginning of the plan year.

Key methods and assumptions used to determine contribution rates:

Actuarial cost method
Amortization method
Asset valuation method
Discount Rate
Amortization growth rate
Price inflation
Salary Increases
Mortality

Entry Age
Level percentage of payroll, closed 15 year period as of 6/30/2017
5-year smoothed market
7.25%
3.00%
3.00%
3.00%, plus merit component on employee classification and years of service
RP 2014 w/Scale MP-2015, base tables adjusted 1.15% for males and 130% for females

Other information:

A complete description of the methods and assumptions used to determine contribution rates for the year ending June 30, 2019, can be found in the July 1, 2017 actuarial valuation report. The financial reporting for the ATU and IBEW Plans' was split during FY2017, previous years information is not available.

RETIREMENT PLANS FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES

**SCHEDULE OF DISTRICT CONTRIBUTIONS
EMPLOYEES WHO ARE MEMBERS OF IBEW
FOR THE FISCAL YEARS ENDING JUNE 30, 2019, 2018 AND 2017
(Dollar amounts in thousands)**

	2019	2018	2017

Crowe LLP
Independent Member Crowe Global

Members of the Retirement Board of Directors
Sacramento Regional Transit District
Sacramento, California

Professional standards require that we communicate matters related to our audit of the financial statements of the ATU Plan, IBEW Plan, and Salaried Plan for Sacramento Regional Transit District Employees ("the Plans") that we consider significant and relevant to the responsibilities of Those Charged with Governance in overseeing the financial reporting process. Those Charged with Governance includes the person(s) with responsibility for overseeing the strategic direction of and obligations related to the accountability of the Plans. We cover such matters below.

AUDITOR'S RESPONSIBILITY UNDER AUDITING STANDARDS GENERALLY ACCEPTED IN THE UNITED STATES OF AMERICA

You should understand that the auditor is responsible for forming and expressing an opinion about whether the financial statements that have been prepared by management with your oversight are presented fairly, in all material respects, in conformity with accounting principles generally accepted in the United States of America and that the audit of the financial statements does not relieve you of your responsibilities and does not relieve management of their responsibilities. Refer to our engagement letter with the Plans for further information on the responsibilities of management and Crowe LLP.

PLANNED SCOPE AND TIMING OF THE AUDIT

We are to communicate an overview of the planned scope and timing of the audit. Accordingly, we communicated the following matters regarding the planned scope and timing of the audit with you.

- How we proposed to address the significant risks of material misstatement, whether due to fraud or error.
- Our approach to internal control relevant to the audit.
- The concept of materiality in planning and executing the audit, focusing on the factors considered rather than on specific thresholds or amounts.
- Where the entity has an internal audit function, the extent to which the auditor will use the work of internal audit, and how the external and internal auditors can best work together.
- Your views and knowledge about matters you consider warrant our attention during the audit, as well as your views on:
 - The allocation of responsibilities between you and management.
 - The entity's objectives and strategies, and the related business risks that may result in material misstatements.
 - Significant communications with regulators.
 - Other matters you believe are relevant to the audit of the financial statements.

SIGNIFICANT ACCOUNTING POLICIES AND MANAGEMENT JUDGMENTS AND ACCOUNTING ESTIMATES

Significant Accounting Policies: Those Charged with Governance should be informed of the initial selection of and changes in significant accounting policies or their application. Also, Those Charged with Governance should be aware of methods used to account for significant unusual transactions and the effect of significant accounting policies in controversial or emerging areas where there is a lack of authoritative consensus. We believe management has the primary responsibility to inform Those Charged with Governance about such matters. There were no such accounting changes or significant policies requiring communication.

Management Judgments and Accounting Estimates: Further, accounting estimates are an integral part of the financial statements prepared by management and are based upon management's current judgments. These judgments are based upon knowledge and experience about past and current events and assumptions about future events. Certain estimates are particularly sensitive because of their significance and because of the possibility that future events affecting them may differ markedly from management's current judgments and may be subject to significant change in the near term.

The process used by management in formulating particularly sensitive accounting estimates and the primary basis for our conclusions regarding the reasonableness of those estimates primarily involved the following areas for this year:

Significant Accounting Estimate	Process Used by Management	Basis for Our Conclusions
Fair Values of Investments	The recording of investments at fair value requires management to use certain assumptions and estimates pertaining to the fair value of its.	We reviewed the reasonableness of these estimates and assumptions.
Classification of Investment Securities Within the Fair Value Hierarchy	GASB Statement No. 72 - Fair Value Measurements and Application requires the reporting of by classification level within a fair value hierarchy.	We reviewed the documentation maintained by management and performed procedures to test the reasonableness of management's judgments and accounting estimates related to the classification levels of investments within the fair value hierarchy as defined by GASB 72.
Actuarial Present Value of Accumulated Plan Benefits	The actuarial present value of accumulated plan benefits is determined by the Plans' actuary and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for disability, withdrawal or retirement) between the valuation date and the expected date of payment.	We reviewed the reasonableness of the actuarial assumptions.

AUDITOR'S JUDGMENTS ABOUT QUALITATIVE ASPECTS OF SIGNIFICANT ACCOUNTING PRACTICES

We are to discuss with you our comments about the following matters related to the Plans' accounting policies and financial statement disclosures. Accordingly, these matters will be discussed during our meeting with you, as applicable.

- The appropriateness of the accounting policies to the particular circumstances of the Plan, considering the need to balance the cost of providing information with the likely benefit to users of the Plans' financial statements.
- The overall neutrality, consistency, and clarity of the disclosures in the financial statements.
- The effect of the timing of transactions in relation to the period in which they are recorded.
- The potential effect on the financial statements of significant risks and exposures, and uncertainties that are disclosed in the financial statements.
- The extent to which the financial statements are affected by unusual transactions including nonrecurring amounts recognized during the period, and the extent to which such transactions are separately disclosed in the financial statements.
- The issues involved, and related judgments made, in formulating particularly sensitive financial statement disclosures.
- The factors affecting asset and liability carrying values, including the Plans' basis for determining useful lives assigned to tangible and intangible assets.
- The selective correction of misstatements, for example, correcting misstatements with the effect of increasing reported earnings, but not those that have the effect of decreasing reported earnings.

CORRECTED AND UNCORRECTED MISSTATEMENTS

Corrected Misstatements: We are to inform you of material corrected misstatements that were brought to the attention of management as a result of our audit procedures.

There were no such misstatements.

Uncorrected Misstatements: We are to inform you of uncorrected misstatements that were aggregated by us during the current engagement and pertaining to the latest and prior period(s) presented that were determined by management to be immaterial, both individually and in the aggregate, to the financial statements taken as a whole. For your consideration, we have distinguished misstatements between known misstatements and likely misstatements.

There were no such misstatements.

OTHER COMMUNICATIONS

Communication Item	Results
<p>Other Information In Documents Containing Audited Financial Statements You often consider information prepared by management that accompanies the financial statements. To assist your consideration of this information, you should know that we are required by audit standards to read such information and consider whether such information, or the manner of its presentation, is materially inconsistent with information in the financial statements. If we consider the information materially inconsistent based on this reading, we are to seek a resolution of the matter.</p>	<p>We read the following items and noted no material inconsistencies or misstatement of facts in such information based on our reading thereof.</p>

Communication Item	Results
<p>Significant Difficulties Encountered During the Audit We are to inform you of any significant difficulties encountered in dealing with management related to the performance of the audit.</p>	<p>There were no significant difficulties encountered in dealing with management related to the performance of the audit.</p>
<p>Disagreements With Management We are to discuss with you any disagreements with management, whether or not satisfactorily resolved, about matters that individually or in the aggregate could be significant to the Plans' financial statements or the auditor's report.</p>	<p>During our audit, there were no such disagreements with management.</p>
<p>Consultations With Other Accountants If management consulted with other accountants about auditing and accounting matters, we are to inform you of such consultation, if we are aware of it, and provide our views on the significant matters that were the subject of such consultation.</p>	<p>We are not aware of any instances where management consulted with other accountants about auditing or accounting matters since no other accountants contacted us, which they are required to do by Statement on Auditing Standards No. 50, before they provide written or oral advice.</p>
<p>Representations The Auditor Is Requesting From Management We are to provide you with a copy of management's requested written representations to us.</p>	<p>We direct your attention to a copy of the letter of management's representation to us provided separately.</p>
<p>Significant Issues Discussed, or Subject to Correspondence, With Management We are to communicate with you any significant issues that were discussed or were the subject of correspondence with management.</p>	<p>There were no such significant issues discussed, or subject to correspondence, with management.</p>
<p>Significant Related Party/Party-in-Interest Findings and Issues We are to communicate to you significant findings and issues arising during the audit in connection with the Plans' related parties and parties-in-interest.</p>	<p>There were no such findings or issues that are, in our judgment, significant and relevant to you regarding your oversight of the financial reporting process.</p>
<p>Other Findings or Issues We Find Relevant or Significant We are to communicate to you other findings or issues, if any, arising from the audit that are, in our professional judgment, significant and relevant to you regarding the oversight of the financial reporting process.</p>	<p>There were no such other findings or issues that are, in our judgment, significant and relevant to you regarding the oversight of the financial reporting process.</p>

We were pleased to serve the Plans as its independent auditors and look forward to our continued relationship. We provide the above information to assist you in performing your oversight responsibilities and would be pleased to discuss this letter or any matters further, should you desire. This letter is intended solely for the information and use by you and, if appropriate, management and is not intended to be and should not be used by anyone other than these specified parties.

Independent Member Crowe Global

Members of the Retirement Board of Directors
Sacramento Regional Transit District
Sacramento, California

In planning and performing our audit of the financial statements of the ATU Plan, IBEW Plan, and Salaried plan for Sacramento Regional Transit District Employees ("the Plans") as of and for the year ended June 30, 2019, in accordance with auditing standards generally accepted in the United States of America we considered the Plans' internal control over financial reporting ("internal control") as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Plans' internal control. Accordingly, we do not express an opinion on the effectiveness of the Plans' internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis.

Our consideration of internal control was for the limited purpose described in the first paragraph and was not designed to identify all deficiencies in internal control that might be significant deficiencies or material weaknesses and therefore, there can be no assurance that all deficiencies, significant deficiencies, or material weaknesses have been identified. We did not identify any deficiencies in internal control that we consider to be material weaknesses, as defined above.

This communication is intended solely for the information and use of management, members of the Retirement Board of Directors and others within the organization, and is not intended to be and should not be used by anyone other than these specified parties.

STAFF REPORT

DATE: March 11, 2020
TO: Sacramento Regional Transit Retirement Boards (ALL)
FROM: Jamie Adelman, AVP Finance and Treasury
SUBJ: RECEIVE AND FILE THE FISCAL YEAR 2019 STATE CONTROLLER'S REPORT SALARIED PENSION PLAN (AEA/AFSCME/MCEG). (ADELMAN)

RECOMMENDATION

Motion to Approve.

RESULT OF RECOMMENDED ACTION

Motion: Receive and File the Fiscal Year 2019 State Controller's Report for the Salaried Pension Plan (AEA/AFSCME/MCEG). (Adelman)

FISCAL IMPACT

None.

DISCUSSION

The financial data for the annual State Controller's Public Retirement Systems Financial Transactions Report is prepared in accordance with California Government Code Section 7504. This statute requires all state and local retirement systems to annually submit audited financial statements of their Pension Plans to the State Controller's Office by the close of each calendar year. The State Controller's Public Retirement Systems Financial Transactions Report (Attachment #1) for the fiscal year ended June 30, 2019 was filed on December 20, 2019.

Per Government Code section 7504, this report is due within six months after the end of the fiscal year. Public Employee Retirement Systems are also required to furnish an audited financial statement on an annual basis and, for defined benefit systems, an actuarial valuation report at least every three years. To meet the filing requirements, all portions must be received by the State Controller's Office.

**HANSON BRIDGETT LLP &
SACRAMENTO REGIONAL TRANSIT DISTRICT RETIREMENT BOARDS**

LEGAL SERVICES SUMMARY

Set forth below is a broad summary report of significant legal matters addressed by Hanson Bridgett LLP for the Sacramento Regional Transit District Retirement Boards during the Quarter ended December 31, 2019.

1. Weekly client conference calls and internal conferences on pending matters, upcoming Board meetings and follow-up from prior Board meetings.
2. Preparation for and participation in Quarterly Board Meetings, including review and markup of agenda materials and related Board Chair conference calls.
3. Finalize custodian services agreement with Northern Trust and related Investment Risk and Analytical Services (“IRAS”) materials; address Northern Trust SEC-required disclosure documents as part of transition of custodian services.
4. Analyze draft operations audit reports and address potential correction issues; prepare documentation and communications regarding the same.
5. Provide counsel on issues including, but not limited to:
 - a. Financial reporting;
 - b. Calculation of benefits under various scenarios;
 - c. Fiduciary duties.

Respectfully Submitted,

/s/ Shayna M. van Hoften

TO: Sacramento Regional Transit Retirement Boards (ALL)
FROM: Jamie Adelman, AVP Finance and Treasury
SUBJ: RECEIVE AND FILE INVESTMENT PERFORMANCE RESULTS FOR THE ATU, IBEW AND SALARIED EMPLOYEE RETIREMENT PLANS FOR THE QUARTER ENDED DECEMBER 31, 2019 (ALL). (ADELMAN)

RECOMMENDATION

Motion to Approve.

RESULT OF RECOMMENDED ACTION

Motion: Receive and File Investment Performance Results for the ATU, IBEW and Salaried Employee Retirement Plans for the Quarter Ended December 31, 2019 (ALL). (Adelman)

FISCAL IMPACT

None.

DISCUSSION

Pension funds are invested consistent with the Statement of Investment Objectives and Policy Guidelines adopted by each Retirement Board. Attached are the two investment performance reports prepared by the Boards' pension investment consultants. The first report is the Fourth Quarter 2019 Market Update (Attachment 1) and the second is the Investment Measurement Service Quarterly Review as of December 31, 2019 (Attachment 2). These reports provide a detailed analysis of the performance of each of the investment managers retained by the Retirement Boards to manage the Retirement Funds for the quarter ended December 31, 2019. The second report compares the performance of each investment manager with benchmark indices, other fund managers of similarly invested portfolios and other indices.

The table below provides an overview of the quarter performance, quarter ending December 31, 2019 – gross of investment management fees:

Investment Manager - Description - Benchmark	Benchmark Index	ATU, IBEW & Salaried Fund	Investment Gains/ (Losses)	Pension Fund Contributions/ (Withdrawals)
Boston Partners (large cap value) Russell 1000 Value	7.41%	8.18%	\$3,847,412	-
S&P 500 Index (large cap value) S&P 500	9.07%	9.08%	\$4,618,642	\$(465,242)
Atlanta Capital (small cap) Russell 2000	9.94%	4.42%	\$1,156,517	-
Pyrford (international equities) MSCI EAFE	8.17%	8.63%	\$2,376,439	-
MSCI EAFE Index (international equities) MSCI EAFE	8.17%	8.20%	\$925,111	-
AQR (small cap international equities) MSCI EAFE SC	11.52%	12.69%	\$1,594,107	-

Economic Commentary

Fourth Quarter 2019

Quarterly Real GDP Growth

Inflation Year-Over-Year

Central bank policy front and center

- The Fed was alone on a path to normalize interest rates; euro zone sat out. U.S. rates have been substantially higher than developed markets globally for an extended period but the Fed reversed course in January 2019.
- Rates held constant through Q2; rates cut twice in Q3, and once more in Q4, but the Fed signaled no more rate cuts 2020.

Rest of the global economy is slowing, but U.S. remains strong, labor market very tight, reaching the limits of full employment

- Q4 GDP held up surprisingly well (2.2 estimate), despite slowing global growth and trade uncertainty; growth totaled 2.3% for the year
- Slower growth seemed inevitable after the impact of 2018 fiscal stimulus faded and full impact of nine rate hikes fed through the economy; Fed pivot has reduced probability of recession in 2020 substantially
- Switch to dovish Fed policy boosted consumer and business confidence and juiced stock market; drop in borrowing costs expected to sustain consumption growth and soften slowdown. Policy reversal simultaneously stoked fears of coming slowdown and fed a rally in bonds, which enjoyed an “outlier” year in 2019.
- Odds of a recession will rise once growth falls below trend; prospects for 2020 are for one more year of above-trend growth.

Inflation remains stuck below 2% in U.S., weaker overseas

- Wage pressures in U.S. have yet to translate into headline inflation; low inflation gives Fed cover to cut rates.

Bloomberg TIPS:

U.S. Equity Performance

Shift away from defensive sectors toward cyclicals

- Utilities, Real Estate, and Staples took a back seat to cyclically oriented sectors during the fourth quarter.
- Investors harnessed three interest rate cuts, a potential U.S.-China trade armistice, and some clarity around Brexit in the risk-on environment.

Small caps outpaced large for quarter but lagged on year

- Heightened new drug approvals and M&A activity within Health Care’s biotech and pharma industries propelled small caps.
- While small cap prevailed in the fourth quarter, large caps led for the third straight year, owing much of the gains to the Tech sector (+50.3%) and Communication Services (+32.7%).
- Apple (+85%) and Microsoft (+54%) hit over \$1 trillion in market cap, accounting for 15% of the S&P 500’s annual advance.

Growth outpaced value across the market cap spectrum

- Growth continued its dominance over value during the quarter, closing out a decade-long trend supported by a low-rate environment.

Stock Market Returns by Calendar Year

2019 performance in perspective: History of the U.S. stock market (230 years of returns)

Source: Ibbotson, Callan

Non-U.S. Equity Performance

Trade war de-escalation and Brexit clarity turned global ex-U.S. markets positive

- The “phase one” trade deal triggered “risk-on” market environment.
- The Conservative Party gained command of Parliament in December, adding further clarity to the Brexit withdrawal plan and sparking the pound to rally.
- China soared 14.7% with easing trade tensions and expected fiscal and monetary stimulus packages in 2020.

Trade-related sectors prevailed

- Technology, specifically within Asia, fueled the market as trade tensions receded.
- Factor performance favored risk, including beta and volatility, reflecting “risk-on” market environment.

U.S. dollar vs. other developed and emerging market currencies

- Major developed and emerging market currencies declined vs. the dollar as optimism replaced market anxiety as the “phase one” trade deal neared.

Growth vs. value

- Growth continues to outperform value within markets and capitalizations, supported by Technology and Health Care.

Global Equity: Quarterly Returns

Global Equity: Annual Returns

Source: MSCI

U.S. Fixed Income Performance

The yield curve steepened on stronger growth expectations

- Treasuries declined 0.8% with the steepening yield curve, with yields falling on short end and rising modestly on intermediate to long end of the curve on stronger economic growth expectations.
- Spread between the 2-year and 10-year Treasuries remained positive, ending the year at 34 bps.
- Long Treasuries fell (-4.1%) as the 30-year yield rose 27 bps to end the year at 2.39% as investors favored risk assets.
- TIPS outperformed nominal Treasuries as inflation expectations rose; 10-year breakeven spread was 1.77% as of quarter-end, up from 1.53% as of Sept. 30.

Corporate bonds rally across credit ratings spectrum

- IG corporate spreads narrowed and posted best results within BB U.S. Aggregate amid risk-on market; BBB-rated corporates (+1.7%) outperformed single A or higher (+0.7%), indicating investor willingness to extend risk down the credit spectrum.
- Below-investment grade CCC-rated corporates (+3.7%) outperformed BB-rated corporates (+2.5%), as the risk-on market sentiment spurred demand for lower-rated securities.
- Spreads across credit quality buckets tightened in the fourth quarter, as the market anticipated improvement in credit fundamentals.

Yield Curve Flattens While Global Rates Diverge

U.S. Treasury Yield Curves

10-Year Global Government Bond Yields

Treasury yield curve no longer inverted from 90-day T-bill through the 10-year T-note

- Yields have fallen more than 100 bps on the long end from one year ago.
- Inverted yield curve has presaged most recessions in past 70 years.
- Yield curve inverted from 2- to 10-year notes in August, but has wavered through the end of September.

U.S. yields have diverged from the rest of the world as monetary policies fell out of sync

- U.S. tightened for two years while euro zone waited.
- U.S. has now paused and has reversed course with three rate cuts in 2019, two in Q3 and one in Q4.
- Euro zone will skip tightening entirely in this cycle; U.S. spread remains very wide.

*Current quarter target = 35% Bloomberg Barclays Aggregate Index, 32% S&P 500 Index, 8% Russell 2000 Index, 14% MSCI EAFE Index, 5% MSCI EAFE Small Cap Index, and 6% MSCI Emerging Markets Index.

U.S. EQUITY

The fourth quarter closed out a near-historic year for equity markets, in particular the S&P 500, which ended 2019 up 31.5%—enough to claim second place behind 2013 for the strongest year of the decade (during which large cap equities only saw one down year). Both Apple (+85%) and Microsoft (+54%) reached over \$1 trillion in market cap and accounted for 15% of the S&P 500's advance for the year. For the recent quarter, investors globally were spurred by three interest rate cuts by the Fed, a potential U.S.-China trade armistice, continued low inflation, and some clarity around Brexit.

Large cap vs. small cap (Russell 2000: +9.9%; Russell 1000: +9.0%)

- Small cap trailed for most of 2019 but eclipsed large cap stocks in the fourth quarter due to notable contributions from the Health Care sector, where the biotech and pharmaceutical industries saw heightened new drug approvals and M&A activity during the quarter.
- Small growth outpaced small value for the quarter, the year, and the decade; the Russell 2000 Growth Index outpaced the Russell 2000 Value Index by 3% annualized over the past 10 years as the low interest rate environment favored growth stocks and challenged the Russell 2000 Value's heavy exposure to Financials.
- While small cap outpaced large cap in the fourth quarter, large cap stocks led for the third straight year, owing much to Tech (+50.3%) and Communication Services (+32.7%).

Growth vs. Value (Russell 1000 Growth: +10.6%; Russell 1000 Value: +7.4%)

- Growth continued its dominance over value during the quarter, closing out a decade-long trend.
- Tech giants Facebook, Apple, Microsoft, and Alphabet/Google remained meaningful contributors for the quarter although Health Care (+14.4%) was also among the top sector performers.
- The fourth quarter saw a rotation away from the more defensive sectors (e.g., Consumer Staples (+3.5%), Utilities (+0.8%), and Real Estate (-0.5%)) and into Cyclical, further supporting growth stocks.

GLOBAL/GLOBAL EX-U.S. EQUITY

Global equity markets bounced back in the fourth quarter as uncertainties abated. De-escalation of the U.S.-China trade war coupled with some Brexit clarity boosted markets. With this backdrop, trade-related areas of the market led the rally.

Global/Developed ex-U.S. (MSCI EAFE: +8.2%; MSCI World ex USA: +7.9%; MSCI ACWI ex USA: +8.9%; MSCI Japan: +7.6%; MSCI Pacific ex Japan: +5.8%)

- Optimism catalyzed by easing tension between the U.S. and China and nearing conclusion of Brexit boosted the markets, and the U.S. dollar fell against most currencies within developed and emerging markets.
- British Prime Minister Boris Johnson gained command of the Parliament as a result of the Dec. 12 election, adding further clarity to Brexit and sparking the pound to its best quarterly results in a decade by rising 7.5% relative to the dollar.
- Accommodative policies such as a fiscal stimulus program and dovish monetary rhetoric continued to support the Japanese economy and its market.
- Despite GDP contraction of 3.2% and its first recession in a decade due to political protests, Hong Kong rose 7.3% as U.S.-China trade tensions improved.
- Every sector generated positive returns, led by Technology.

Emerging Markets (MSCI Emerging Markets Index: +11.8%)

- Emerging markets were the best-performing among the global ex-U.S. markets as trade war uncertainty receded.
- China soared 14.7% with easing trade tensions and expected fiscal and monetary stimulus packages in 2020.
- Brazil posted a 14.2% gain, its best quarter since late 2017, emboldened by President Jair Bolsonaro’s deregulation policies, the country’s 1.2% GDP growth, and pending pension reform.
- Russia was the best-performing country in 2019 (+50.9%) and a top five performer in the quarter (+16.8%) as rising oil prices over the past year helped fuel sentiment.
- Every sector generated positive returns, led by Asian technology companies, given the “phase one” trade deal, chip demands for 5G, and growth in China.

Global ex-U.S. Small Cap (MSCI World ex USA Small Cap: +11.4%; MSCI EM Small Cap: +9.5%; MSCI ACWI ex USA Small Cap: +11.0%)

- The “risk-on” market environment triggered by the U.S.-China trade war de-escalation enabled small caps to outperform large caps.
- Additional Brexit clarity drove the U.K. as the top country performer (+19.4%) within developed ex-U.S.
- Argentina (+33.5%) and Brazil (+24.8%) were two of the top EM country performers as key appointments in the Argentinian government, and deregulation and pension reform in Brazil, boosted market sentiment.

FIXED INCOME

The Federal Open Market Committee (FOMC) cut short-term interest rates by 25 basis points once in the fourth quarter to 1.50%-1.75%, citing weak business investment and export data, along with muted inflation. The overall economic backdrop remained strong supported by a solid labor market, which led to a pause in rate cuts at the most recent FOMC meeting. The FOMC indicated its current monetary policy stance is appropriate to sustain the economic expansion. The European Central Bank kept rates steady while continuing to purchase assets in the open market. Yield movement was mixed in the U.S. as short-term rates fell and long-term rates rose amid ongoing trade negotiations.

U.S. Fixed Income (Bloomberg Barclays US Aggregate Bond Index: +0.2%)

- Treasuries fell 0.8% as the Treasury yield curve steepened, with yields falling on the short end and rising modestly in the intermediate and long end of the curve on expectations of stronger economic growth.
- The spread between the 2-year and 10-year Treasury remained positive, ending the year at 34 bps.
- Long Treasuries fell 4.1% as the 30-year yield rose 27 bps to end the year at 2.39% as investors favored risk assets.
- TIPS outperformed nominal Treasuries as inflation expectations rose; the 10-year breakeven spread was 1.77% at quarter end, up from 1.53% as of Sept. 30.

Investment Grade Corporates (Bloomberg Barclays Corporate: +1.2%)

- Investment grade corporate credit spreads narrowed in the fourth quarter and posted the best results within the Bloomberg Barclays US Aggregate Bond Index amid a risk-on market environment; BBB-rated corporates (+1.7%) outperformed single A-rated or higher corporates (+0.7%), indicating investors' willingness to extend risk down the credit spectrum.
- Issuance in the corporate bond market was \$200 billion in the fourth quarter, which was \$8 billion lower than that from a year ago. Issuance was \$140 billion lower compared to the third quarter, as is typical toward year-end; demand remained strong amid the risk-on market tone as global investors continued their hunt for positive-yielding assets.

High Yield (Bloomberg Barclays Corporate High Yield: +2.6%)

- CCC-rated corporates (+3.7%) outperformed BB-rated corporates (+2.5%), as the risk-on market sentiment spurred demand for lower-rated securities.
- Spreads across credit quality buckets tightened in the fourth quarter, as the market anticipated improvements in credit fundamentals.

U.S. Fixed Income: Quarterly Returns

U.S. Fixed Income: One-Year Returns

U.S. Treasury Yield Curves

Sources: Bloomberg, Bloomberg Barclays, Credit Suisse

Leveraged Loans (CS Leveraged Loans: +1.7%)

- Bank loans, which have floating-rate coupons, underperformed high yield as investors shunned loans in favor of high yield bonds.
- CLO issuance remained consistent, providing technical support for the leveraged loan market.

Global Fixed Income (Bloomberg Barclays Global Aggregate (unhedged): +0.5%; (hedged): -0.5%)

- Developed market sovereign bond yields rose modestly in the fourth quarter as global financial conditions improved, but ended lower on the year. The ECB kept the deposit rate steady at its December meeting; negative-yielding debt totaled less than \$12 trillion, down from \$17 trillion in the third quarter.
- The U.S. dollar declined in the fourth quarter versus the euro, Australian dollar, and British pound; however, it had a modest gain versus the Japanese yen.

US\$ EMD (JPM EMBI Global Diversified: +1.8%), **Local Currency EMD** (JPM GBI-EM Global Diversified: +5.2%)

- Broadly, emerging market debt benefited from dovish global central banks and a risk-on environment.
- Within the dollar-denominated benchmark, which posted mixed results, Lebanon (-29.4%) was an outlier as the debt-to-GDP ratio continued to swell and anti-government protests persisted; Argentina rallied (+20.8%) to end the year down 23.6% as a new president was inaugurated. Returns in the local debt benchmark were largely positive, with only Chile (-6.2%) and the Dominican Republic (-0.7%) declining. South Africa (+10.2%) and Russia (+10.0%) were top performers.

Quarterly Total Fund Relative Attribution - December 31, 2019

The following analysis approaches Total Fund Attribution from the perspective of relative return. Relative return attribution separates and quantifies the sources of total fund excess return relative to its target. This excess return is separated into two relative attribution effects: Asset Allocation Effect and Manager Selection Effect. The Asset Allocation Effect represents the excess return due to the actual total fund asset allocation differing from the target asset allocation. Manager Selection Effect represents the total fund impact of the individual managers excess returns relative to their benchmarks.

Asset Class Under or Overweighting

Actual vs Target Returns

Relative Attribution by Asset Class

Relative Attribution Effects for Quarter ended December 31, 2019

Current Holdings Based Style Analysis Domestic Equity As of December 31, 2019

This page analyzes the current investment style of a portfolio utilizing a detailed holdings-based style analysis to determine actual exposures to various market capitalization and style segments of the domestic equity market. The market is segmented quarterly by capitalization and style. The capitalization segments are dictated by capitalization decile breakpoints. The style segments are determined using the "Combined Z Score", based on the eight fundamental factors used in the MSCI stock style scoring system. The upper-left style map illustrates the current market capitalization and style score of the portfolio relative to indices and/or peers. The upper-right style exposure matrix displays the current portfolio and index weights and stock counts (in parentheses) in each capitalization/style segment of the market. The middle chart illustrates the total exposures and stock counts in the three style segments, with a legend showing the total growth, value, and "combined Z" (growth - value) scores. The bottom chart exhibits the sector weights as well as the style weights within each sector.

Historical Holdings Based Style Analysis

Large Cap

For Five Years Ended December 31, 2019

This page analyzes the historical investment style of a portfolio utilizing a detailed holdings-based style analysis to determine average actual exposures to various market capitalization and style segments of the domestic equity market. The market is segmented quarterly by capitalization and style. The capitalization segments are dictated by capitalization decile breakpoints. The style segments are determined using the "Combined Z Score", based on the eight fundamental factors used in the MSCI stock style scoring system. The upper-left style map illustrates the average historical market capitalization and style score of the portfolio relative to indices and/or peers. The upper-right style exposure matrix displays the average historical portfolio and index weights and stock counts (in parentheses) in each capitalization/style segment of the market. The next two style exposure charts illustrate the actual quarterly cap/style and style only segment exposures of the portfolio through history.

Atlanta Capital Equity Characteristics Analysis Summary

Portfolio Characteristics

This graph compares the manager's portfolio characteristics with the range of characteristics for the portfolios which make up the manager's style group. This analysis illustrates whether the manager's current holdings are consistent with other managers employing the same style.

Portfolio Characteristics Percentile Rankings Rankings Against Callan Small Capitalization as of December 31, 2019

Sector Weights

The graph below contrasts the manager's sector weights with those of the benchmark and median sector weights across the members of the peer group. The magnitude of sector weight differences from the index and the manager's sector diversification are also shown. Diversification by number and concentration of holdings are also compared to the benchmark and peer group. Issue Diversification represents by count, and Diversification Ratio by percent, the number of holdings that account for half of the portfolio's market value.

Current Holdings Based Style Analysis

Atlanta Capital

As of December 31, 2019

This page analyzes the current investment style of a portfolio utilizing a detailed holdings-based style analysis to determine actual exposures to various market capitalization and style segments of the domestic equity market. The market is segmented quarterly by capitalization and style. The capitalization segments are dictated by capitalization decile breakpoints. The style segments are determined using the "Combined Z Score", based on the eight fundamental factors used in the MSCI stock style scoring system. The upper-left style map illustrates the current market capitalization and style score of the portfolio relative to indices and/or peers. The upper-right style exposure matrix displays the current portfolio and index weights and stock counts (in parentheses) in each capitalization/style segment of the market. The middle chart illustrates the total exposures and stock counts in the three style segments, with a legend showing the total growth, value, and "combined Z" (growth - value) scores. The bottom chart exhibits the sector weights as well as the style weights within each sector.

International Equity VS Intl Eq - Benchmark Characteristics

Country Allocation

The chart below contrasts the portfolio's country allocation with that of the index as of December 31, 2019. This chart is useful because large deviations in country allocation relative to the index are often good predictors of tracking error in the subsequent quarter. To the extent that the portfolio allocation is similar to the index, the portfolio should experience more "index-like" performance. In order to illustrate the performance effect on the portfolio and index of these country allocations, the individual index country returns are also shown.

Pyrford

Period Ended December 31, 2019

Investment Philosophy

Pyrford's investment strategy is based on a value-driven, absolute return approach, with both top-down and bottom-up elements. At the country level they seek to invest in countries that offer an attractive market valuation relative to their long-term prospects. At the stock level they identify companies that offer excellent value relative to in-house forecasts of long-term (5 years) earnings growth. This approach is characterized by low absolute volatility and downside protection. Returns prior to 6/30/2017 are linked to a composite history.

Quarterly Summary and Highlights

- Pyrford's portfolio posted a 8.63% return for the quarter placing it in the 44 percentile of the Callan Non-US Developed Core Equity group for the quarter and in the 58 percentile for the last year.
- Pyrford's portfolio outperformed the MSCI EAFE Index by 0.46% for the quarter and outperformed the MSCI EAFE Index for the year by 0.28%.

Pyrford Equity Characteristics Analysis Summary

Portfolio Characteristics

This graph compares the manager's portfolio characteristics with the range of characteristics for the portfolios which make up the manager's style group. This analysis illustrates whether the manager's current holdings are consistent with other managers employing the same style.

Portfolio Characteristics Percentile Rankings Rankings Against Callan Non-US Developed Core Equity as of December 31, 2019

Sector Weights

The graph below contrasts the manager's sector weights with those of the benchmark and median sector weights across the members of the peer group. The magnitude of sector weight differences from the index and the manager's sector diversification are also shown. Diversification by number and concentration of holdings are also compared to the benchmark and peer group. Issue Diversification represents by count, and Diversification Ratio by percent, the number of holdings that account for half of the portfolio's market value.

Current Holdings Based Style Analysis

Pyrford

As of December 31, 2019

This page analyzes the current investment style of a portfolio utilizing a detailed holdings-based style analysis to determine actual exposures to various regional and style segments of the international/global equity market. The market is segmented quarterly by region and style. The style segments are determined using the "Combined Z Score", based on the eight fundamental factors used in the MSCI stock style scoring system. The upper-left chart illustrates the current market capitalization and style score of the portfolio relative to indices and/or peers. The upper-right style exposure matrix displays the current portfolio and index weights and stock counts (in parentheses) in each region/style segment of the market. The middle chart illustrates the total exposures and stock counts in the three style segments, with a legend showing the total growth, value, and "combined Z" (growth - value) scores. The bottom chart exhibits the sector weights as well as the style weights within each sector.

Country Allocation

Pyrford VS MSCI EAFE Index

Country Allocation

The chart below contrasts the portfolio's country allocation with that of the index as of December 31, 2019. This chart is useful because large deviations in country allocation relative to the index are often good predictors of tracking error in the subsequent quarter. To the extent that the portfolio allocation is similar to the index, the portfolio should experience more "index-like" performance. In order to illustrate the performance effect on the portfolio and index of these country allocations, the individual index country returns are also shown.

DFA Emerging Markets Equity Characteristics Analysis Summary

Portfolio Characteristics

This graph compares the manager's portfolio characteristics with the range of characteristics for the portfolios which make up the manager's style group. This analysis illustrates whether the manager's current holdings are consistent with other managers employing the same style.

Portfolio Characteristics Percentile Rankings Rankings Against Callan Emerging Markets Equity Mut Funds as of December 31, 2019

Sector Weights

The graph below contrasts the manager's sector weights with those of the benchmark and median sector weights across the members of the peer group. The magnitude of sector weight differences from the index and the manager's sector diversification are also shown. Diversification by number and concentration of holdings are also compared to the benchmark and peer group. Issue Diversification represents by count, and Diversification Ratio by percent, the number of holdings that account for half of the portfolio's market value.

Current Holdings Based Style Analysis

DFA Emerging Markets

As of December 31, 2019

This page analyzes the current investment style of a portfolio utilizing a detailed holdings-based style analysis to determine actual exposures to various regional and style segments of the international/global equity market. The market is segmented quarterly by region and style. The style segments are determined using the "Combined Z Score", based on the eight fundamental factors used in the MSCI stock style scoring system. The upper-left style map illustrates the current market capitalization and style score of the portfolio relative to indices and/or peers. The upper-right style exposure matrix displays the current portfolio and index weights and stock counts (in parentheses) in each region/style segment of the market. The middle chart illustrates the total exposures and stock counts in the three style segments, with a legend showing the total growth, value, and "combined Z" (growth - value) scores. The bottom chart exhibits the sector weights as well as the style weights within each sector.

Country Allocation DFA Emerging Markets VS MSCI Emerging Markets Index

Country Allocation

The chart below contrasts the portfolio's country allocation with that of the index as of December 31, 2019. This chart is useful because large deviations in country allocation relative to the index are often good predictors of tracking error in the subsequent quarter. To the extent that the portfolio allocation is similar to the index, the portfolio should experience more "index-like" performance. In order to illustrate the performance effect on the portfolio and index of these country allocations, the individual index country returns are also shown.

Metropolitan West Period Ended December 31, 2019

Investment Philosophy

Metropolitan West Asset Management (MWAM) attempts to add value by limiting duration, managing the yield curve, rotating among bond market sectors and using proprietary quantitative valuation techniques.

Quarterly Summary and Highlights

- Metropolitan West's portfolio posted a (0.51)% return for the quarter placing it in the 100 percentile of the Callan Core Plus Fixed Income group for the quarter and in the 83 percentile for the last year.
- Metropolitan West's portfolio underperformed the Bloomberg Aggregate Index by 0.69% for the quarter and outperformed the Bloomberg Aggregate Index for the year by 0.69%.

Portfolio Structure Comparison

The charts below compare the structure of the portfolio to that of the index from the three perspectives that have the greatest influence on return. The first chart compares the two portfolios across sectors. The second chart compares the duration distribution. The last chart compares the distribution across quality ratings.

Sector Distribution

Duration Distribution

Quality Distribution

Risk/Reward Statistics

The risk statistics used in this report examine performance characteristics of a manager or a portfolio relative to a benchmark (market indicator) which assumes to represent overall movements in the asset class being considered. The main unit of analysis is the excess return, which is the portfolio return minus the return on a risk free asset (3 month T-Bill).

Alpha measures a portfolio's return in excess of the market return adjusted for risk. It is a measure of the manager's contribution to performance with reference to security selection. A positive alpha indicates that a portfolio was positively rewarded for the residual risk which was taken for that level of market exposure.

Beta measures the sensitivity of rates of portfolio returns to movements in the market index. A portfolio's beta measures the expected change in return per 1% change in the return on the market. If a beta of a portfolio is 1.5, a 1 percent increase in the return on the market will result, on average, in a 1.5 percent increase in the return on the portfolio. The converse would also be true.

Downside Risk stems from the desire to differentiate between "good risk" (upside volatility) and "bad risk" (downside volatility). Whereas standard deviation punishes both upside and downside volatility, downside risk measures only the standard deviation of returns below the target. Returns above the target are assigned a deviation of zero. Both the frequency and magnitude of underperformance affect the amount of downside risk.

Excess Return Ratio is a measure of risk adjusted relative return. This ratio captures the amount of active management performance (value added relative to an index) per unit of active management risk (tracking error against the index.) It is calculated by dividing the manager's annualized cumulative excess return relative to the index by the standard deviation of the individual quarterly excess returns. The Excess Return Ratio can be interpreted as the manager's active risk/reward tradeoff for diverging from the index when the index is mandated to be the "riskless" market position.

Information Ratio measures the manager's market risk-adjusted excess return per unit of residual risk relative to a benchmark. It is computed by dividing alpha by the residual risk over a given time period. Assuming all other factors being equal, managers with lower residual risk achieve higher values in the information ratio. Managers with higher information ratios will add value relative to the benchmark more reliably and consistently.

R-Squared indicates the extent to which the variability of the portfolio returns are explained by market action. It can also be thought of as measuring the diversification relative to the appropriate benchmark. An r-squared value of .75 indicates that 75% of the fluctuation in a portfolio return is explained by market action. An r-squared of 1.0 indicates that a portfolio's returns are entirely related to the market and it is not influenced by other factors. An r-squared of zero indicates that no relationship exists between the portfolio's return and the market.

Relative Standard Deviation is a simple measure of a manager's risk (volatility) relative to a benchmark. It is calculated by dividing the manager's standard deviation of returns by the benchmark's standard deviation of returns. A relative standard deviation of 1.20, for example, means the manager has exhibited 20% more risk than the benchmark over that time period. A ratio of .80 would imply 20% less risk. This ratio is especially useful when analyzing the risk of investment grade fixed-income products where actual historical durations are not available. By using this relative risk measure over rolling time periods one can illustrate the "implied" historical duration patterns of the portfolio versus the benchmark.

Residual Portfolio Risk is the unsystematic risk of a fund, the portion of the total risk unique to the fund (manager) itself and not related to the overall market. This reflects the "bets" which the manager places in that particular asset market. These bets may reflect emphasis in particular sectors, maturities (for bonds), or other issue specific factors which the manager considers a good investment opportunity. Diversification of the portfolio will reduce or eliminate the residual risk of that portfolio.

Risk/Reward Statistics

Rising Declining Periods refer to the sub-asset class cycles vis-a-vis the broader asset class. This is determined by evaluating the cumulative relative sub-asset class index performance to that of the broader asset class index. For example, to determine the Growth Style cycle, the S&P 500 Growth Index (sub-asset class) performance is compared to that of the S&P 500 Index (broader asset class).

Sharpe Ratio is a commonly used measure of risk-adjusted return. It is calculated by subtracting the "risk-free" return (usually 3 Month Treasury Bill) from the portfolio return and dividing the resulting "excess return" by the portfolio's risk level (standard deviation). The result is a measure of return gained per unit of risk taken.

Sortino Ratio is a downside risk-adjusted measure of value-added. It measures excess return over a benchmark divided by downside risk. The natural appeal is that it identifies value-added per unit of truly bad risk. The danger of interpretation, however, lies in these two areas: (1) the statistical significance of the denominator, and (2) its reliance on the persistence of skewness in return distributions.

Standard Deviation is a statistical measure of portfolio risk. It reflects the average deviation of the observations from their sample mean. Standard deviation is used as an estimate of risk since it measures how wide the range of returns typically is. The wider the typical range of returns, the higher the standard deviation of returns, and the higher the portfolio risk. If returns are normally distributed (ie. has a bell shaped curve distribution) then approximately 2/3 of the returns would occur within plus or minus one standard deviation from the sample mean.

Total Portfolio Risk is a measure of the volatility of the quarterly excess returns of an asset. Total risk is composed of two measures of risk: market (non-diversifiable or systematic) risk and residual (diversifiable or unsystematic) risk. The purpose of portfolio diversification is to reduce the residual risk of the portfolio.

Tracking Error is a statistical measure of a portfolio's risk relative to an index. It reflects the standard deviation of a portfolio's individual quarterly or monthly returns from the index's returns. Typically, the lower the Tracking Error, the more "index-like" the portfolio.

Treynor Ratio represents the portfolio's average excess return over a specified period divided by the beta relative to its benchmark over that same period. This measure reflects the reward over the risk-free rate relative to the systematic risk assumed.

Note: Alpha, Total Risk, and Residual Risk are annualized.

New Research from Callan's Experts

Long-Dated Private Equity Funds: More Illiquidity Please? |

In this paper, Ashley DeLuce of Callan's Private Equity Consulting Group analyzes long-dated private equity funds, which have terms of 15 years or more (some even have no fixed term), and tend to focus on stable, mature businesses that may not fit a traditional private equity investment profile. Although these companies may not generate the outsized internal rates of return associated with traditional private equity investments, they tend to have stronger downside protection. In evaluating a potential long-dated fund investment, investors need to be wary of the strategy's increased illiquidity and how it can impact annual commitment pacing.

Callan 2019 Investment Management Fee Study | This study using Callan's proprietary database is our eighth examination of institutional investment management

fee trends. The purpose of the study is to provide a detailed analysis on fee levels and trends across multiple asset classes and mandate sizes, for both active and passive management.

Gold: Real Asset, Risk Mitigator, or Pet Rock? | In this *Hedge Fund Monitor*, Jim McKee reviews the history of gold as a form of money, the reasons behind the recent renaissance in gold, the potential roles of gold

for institutional investors, and the alternative approaches to invest in gold-related themes. For some institutional investors, gold can play a useful role in diversifying risk or enhancing returns. For others, particularly those with higher risk tolerances and longer time horizons, a strategic gold allocation has about as much purpose as a Pet Rock.

Quarterly Periodicals

Private Equity Trends, 3Q19 | This newsletter from Callan's Private Equity Consulting Group provides a high-level summary of private equity activity in the quarter through all the investment stages, from fundraising to exits, as well as long-term performance data.

Monthly Periodic Table of Investment Returns, November 2019 | A regular update to Callan's Periodic Table covering the major public equity and fixed income asset classes.

Active vs. Passive Report, 3Q19 | This series of charts compares active managers alongside relevant benchmarks over the long term.

Market Pulse Flipbook, 3Q19 | A quarterly market reference guide covering trends in the U.S. economy, developments for institutional investors, and the latest data for U.S. and global ex-U.S. equities and fixed income, alternatives, and defined contribution plans.

Capital Market Review, 3Q19 | This newsletter provides analysis and a broad overview of the economy and public and private market activity each quarter across a wide range of asset classes.

Hedge Fund Quarterly, 3Q19 | Callan's Jim McKee of our Hedge Fund Research Group provides commentary on developments for hedge funds and multi-asset class (MAC) strategies.

Real Estate Indicators: Too Hot to Touch or Cool Enough to Handle? | Callan's Real Assets Consulting Group identifies seven indicators that, combined with an understanding of prevailing market dynamics, have helped signal when the institutional real estate market is overheated or cooled.

Real Assets Reporter, 3Q19 | This newsletter from our experts offers Callan's data and insights on real estate and other real asset investment topics.

Events

Miss out on a Callan conference or workshop? Event summaries and speakers' presentations are available on our website: www.callan.com/library/

Please mark your calendar and look forward to upcoming invitations:

2020 June Regional Workshops

June 23 – San Francisco

June 25 – Chicago

2020 October Regional Workshops

October 27 – Atlanta

October 29 – Portland

Please also keep your eye out for upcoming Webinars in 2020! We will be sending invitations to register for these events and will also have registration links on our website at www.callan.com/webinarsupcoming.

For more information about events, please contact Barb Gerraty: 415-274-3093 / gerraty@callan.com

Education: By the Numbers

50+

Unique pieces of research the Institute generates each year

525

Attendees (on average) of the Institute's annual National Conference

3,700

Total attendees of the "Callan College" since 1994

"Research is the foundation of all we do at Callan, and sharing our best thinking with the investment community is our way of helping to foster dialogue to raise the bar across the industry."

Greg Allen, CEO and Chief Research Officer

Education

Through the "Callan College," the Callan Institute offers educational sessions for industry professionals involved in the investment decision-making process. It was founded in 1994 to provide both clients and non-clients with basic- to intermediate-level instruction.

Introduction to Investments for Institutional Investors

April 21-22, 2020 – San Francisco

July 21-22, 2020 – Chicago

October 13-14, 2020 – Chicago

This program familiarizes institutional investor trustees and staff and asset management advisers with basic investment theory, terminology, and practices. It lasts one-and-a-half days and is designed for individuals with less than two years of experience with asset-management oversight and/or support responsibilities. Tuition is \$2,350 per person and includes instruction, all materials, breakfast and lunch on each day, and dinner on the first evening with the instructors.

Learn more at www.callan.com/callan-college-intro-2/

Alternative Investments for Institutional Investors

June 16, 2020 – San Francisco

November 3, 2020 – Chicago

Alternative investments like private equity, hedge funds, and real estate can play a key role in any portfolio. In this one-day session, Callan experts will provide instruction about the importance of allocations to alternatives, and how to integrate, evaluate, and monitor them.

Learn from some of Callan's senior consultants and experts, including the head of Alternatives Consulting Pete Keliuotis. The session will cover private equity, private credit, hedge funds, real estate, and real assets; why invest in alternatives; risk/return characteristics and liquidity; designing and implementing an alternatives program; and trends and case studies.

Tuition is \$2,000 per person and includes instruction, all materials, and breakfast and lunch with the instructors.

List of Callan's Investment Manager Clients

Confidential – For Callan Client Use Only

Callan takes its fiduciary and disclosure responsibilities to clients very seriously. We recognize that there are numerous potential conflicts of interest encountered in the investment consulting industry and that it is our responsibility to manage those conflicts effectively and in the best interest of our clients. At Callan, we employ a robust process to identify, manage, monitor and disclose potential conflicts on an on-going basis.

The list below is an important component of our conflicts management and disclosure process. It identifies those investment managers that pay Callan fees for educational, consulting, software, database or reporting products and services. We update the list quarterly because we believe that our fund sponsor clients should know the investment managers that do business with Callan, particularly those investment manager clients that the fund sponsor clients may be using or considering using. Please note that if an investment manager receives a product or service on a complimentary basis (e.g. attending an educational event), they are not included in the list below. Callan is committed to ensuring that we do not consider an investment manager's business relationship with Callan, or lack thereof, in performing evaluations for or making suggestions or recommendations to its other clients. Please refer to Callan's ADV Part 2A for a more detailed description of the services and products that Callan makes available to investment manager clients through our Institutional Consulting Group, Independent Adviser Group and Fund Sponsor Consulting Group. Due to the complex corporate and organizational ownership structures of many investment management firms, parent and affiliate firm relationships are not indicated on our list.

Fund sponsor clients may request a copy of the most currently available list at any time. Fund sponsor clients may also request specific information regarding the fees paid to Callan by particular fund manager clients. Per company policy, information requests regarding fees are handled exclusively by Callan's Compliance Department.

STAFF REPORT

DATE: March 11, 2020
TO: Sacramento Regional Transit Retirement Boards (ALL)
FROM: Jamie Adelman, AVP Finance and Treasury
SUBJ: INVESTMENT PERFORMANCE REVIEW BY BMO PYRFORD FOR THE ATU, IBEW AND SALARIED FUNDS FOR THE INTERNATIONAL LARGE CAPITAL EQUITY ASSET CLASS FOR THE QUARTER ENDED DECEMBER 31, 2019 (ALL). (ADELMAN)

RECOMMENDATION

No Recommendation — For Information Only.

RESULT OF RECOMMENDED ACTION

Information Only

FISCAL IMPACT

None.

DISCUSSION

Retirement funds are invested consistent with the Statement of Investment Objectives and Policy Guidelines (Policy) adopted by each Retirement Board (Board). Under the Policy, the Boards meet at least once every eighteen (18) months with each investment manager to review the performance of the manager's investment, the manager's adherence to the Policy, and any material changes to the manager's organization. The Policy also establishes the Retirement Funds' asset allocation policy and the asset classes in which the Plans funds are invested. The asset classes established by the Policy are (1) Domestic Large Capitalization Equity, (2) Domestic Small Capitalization Equity, (3) International Large Capitalization Equity, (4) International Small Capitalization Equity, (5) International Emerging Markets, and (6) Domestic Fixed-Income.

BMO Pyrford is the Retirement Boards' International Large Capital Equity fund manager. BMO Pyrford will be presenting performance results for the quarter ended December 31, 2019, shown in Attachment 1, and answering any questions.

Presentation to: Sacramento Regional Transit Authority

Pyrford International Equity Strategy

March 11, 2020

Presented by:

John Mirante, CFA, CPA
Director, Relationship Management
BMO Global Asset Management

Suhail Arain, CFA	Head of Portfolio Management – the Americas	11	22
Bruce Campbell	Strategic Investment Advisor	33	50

* These figures include investors in pooled investment vehicles.

Assets under management breakdown

As at 31 December 2019

Product	USD	No. of investors
Global Absolute Return	4.78bn	53
International Equities	5.03bn	43
Global Equities	2.16bn	16
Total	11.97bn	112

Assets Under Management – Investor Domicile

These figures include investors in pooled investment vehicles.

International Equity (EAFE) Strategy

Effective downside protection – enjoy the upside

Growth of a Unit Value US\$, 31 March 2000 – 31 December 2019. Bull & Bear Markets

31 Mar 2000 – 31 Dec 2019 (quarterly data)

Downside Capture 63.98%

Upside Capture 87.44%

Source: Pyrford International / MSCI EAFE

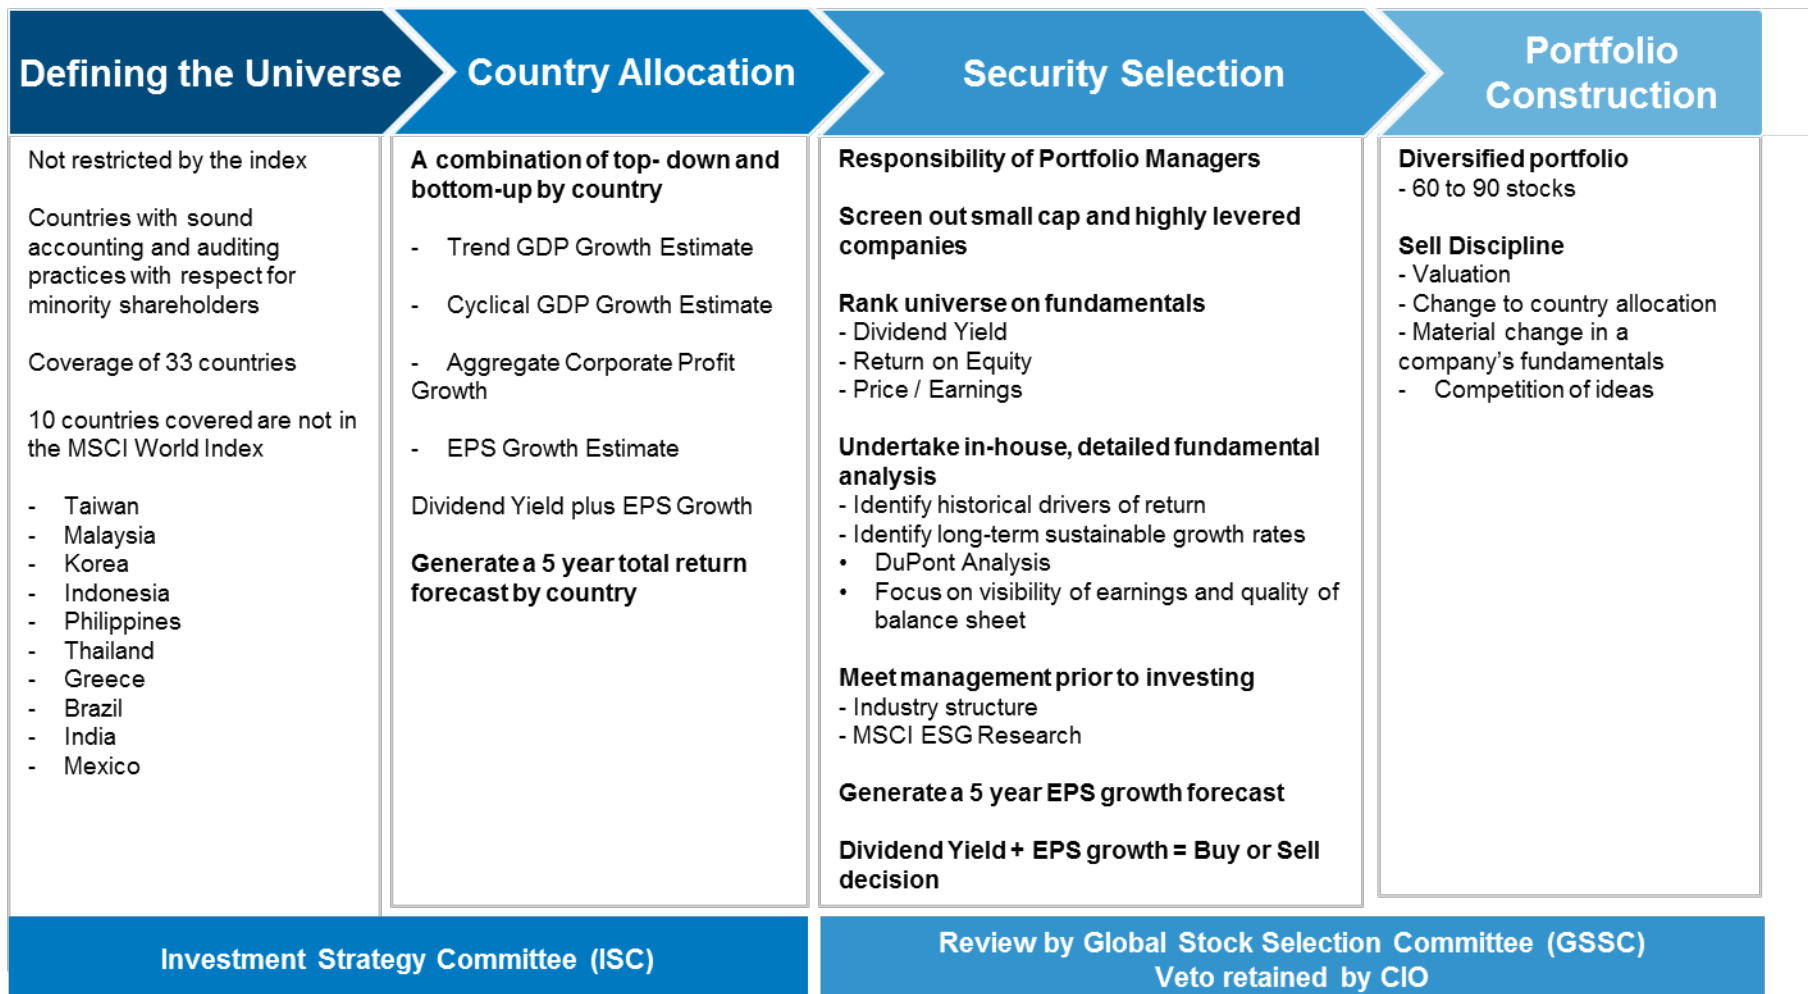

Performance relates to the gross of fees Pyrford International Ltd 'International Equity (Base Currency US\$) Composite'. This is supplementary information. Please see complete GIPS compliant presentation at the end of this document.

Past performance does not guarantee future results. Capital is at risk and an investor may receive back less than the original investment.

Pyrford's investment philosophy

- Five year time horizon
- Total return approach → Dividend Yield + Earnings Growth forecast
 - Applies to country and stock analysis
- “Absolute” not “*relative*” risk - possible zero weight in any country, sector or stock
 - Key to managing risk
 - “We won’t invest in a company or country simply because it’s big!”
- Not index oriented
- Low absolute volatility
- Low portfolio turnover

Past performance does not guarantee future results.

How the portfolio is positioned going forward

Europe

Remain defensively positioned:

- positioned in “core” Europe.
- zero exposure to European banks

Underweight UK:

- Brexit negotiations and impact on EU access remains an uncertainty
 - concerns over condition of household finances
-

Asia Pacific

Remain defensively positioned:

- overweight Telecoms – sustainable earnings and attractive dividend yields
- emerging market exposure to economies with significant current account surpluses
- no direct exposure to Real Estate in the region and only selective exposure to banks

Underweight Japan:

- all Japan’s long-term problems (poor demographics, unsustainable public finances and corporate inefficiency) remain. Appetite for bolder reforms remains unclear.

Overweight South-East Asia, Taiwan and Hong Kong:

- able to engage in more orthodox monetary policy compared to US, UK, Eurozone and Japan. We are encouraged by the gradual transition to consumption led growth in China as it remains an important regional influence.
-

Pyrford's current views

31 December 2019

- The shift to quantitative tightening at the end of 2018 proved short lived as the Fed pivoted away from monetary tightening in early 2019. Reverting **back to quantitative easing** weakens confidence, misallocates capital, prolongs the existence of “zombie” companies, destroys the hopes of savers and decimates the prospective returns of pension funds. It has **no discernible positive impact** upon productivity or economic growth, does not lift inflation yet widens wealth inequality.
- Overall **debt** levels (relative to GDP) have increased in the developed and emerging economies since the financial crisis. We believe this to be the most significant threat to “healthy” economic growth going forward. The debt ratios need to be modified without triggering another financial crisis. Increasingly, there is little option but to engage in fiscal easing.
- Despite reasonable economic growth, the **Fed** continues to cut rates since the peak in July 2018. The Fed has little room to cut aggressively should they need to – a trait they share with other major central banks.
- **Eurozone** growth has faltered of late as German industrial output is struggling, driven by weak export demand. The ECB recently cut interest rates deeper into negative territory whilst announcing the resumption of quantitative easing - €20bn a month “for as long as necessary”. Given their budget surplus there are growing calls for Germany to embrace fiscal easing.
- In the **UK** the Conservative Party won a resounding majority following the election in December 2019, helping smooth the legislative path for Brexit negotiations. Despite the initial rally in Sterling, valuations indicate the currency remains still cheap versus several major currencies as uncertainty lingers as to the future trade deal with the EU.
- The **Chinese** economy is slowing, not helped by the trade conflict with the US. The damaging trade conflict shows only limited signs of being resolved. Every so often there appears some hope of rapprochement but then the hope is ruthlessly torn away. Significant stimulus was recently announced through tax cuts and infrastructure initiatives. China now has far more debt as a percentage of GDP in both the public and private sector. The law of diminishing returns still applies.
- We believe **Asia ex-Japan** offers the best absolute value and most attractive opportunities for long-term economic growth. Demographics provide a favourable “window” over the next 20 years.
- In general, markets (both equity and bond) are expensive. **The world economy is characterised by extremely low or no growth**, low or no interest rates, low inflation and masses of debt. The way to get out of the corner is through higher growth but that will only come about when confidence is restored, sensible long-term capital investment decisions initiated, a more buoyant consumer emerges, and interest rates and inflation reflect a more positive economic outlook.

This is not intended to serve as a complete analysis of every material fact regarding any company, industry or security. The opinions expressed here reflect our judgement at this date are subject to change. Information has been obtained from sources we consider to be reliable, but we cannot guarantee the accuracy.

Supplementary Information

BMO Global Asset Management

Worldwide investment capabilities

Unless otherwise noted, all Assets Under Management (AUM) reported is as at 30-Sep-19 and includes both discretionary and non-discretionary assets. AUM figures are in Canadian dollars.

1 Includes AUM managed by BMO Global Asset Management (Canada), BMO Global Asset Management (United States), BMO Global Asset Management (EMEA), Pyrford International and LGM Investments. LLC are wholly owned subsidiaries of BMO Asset Management Corp. BMO Real Estate Partners is a subsidiary of BMO Global Asset Management (EMEA). AUM may not add up due to rounding. Figures are adjusted to avoid double-counting of assets sub-advised by investment specialists.

2 Includes \$7.6 billion managed by BMO Real Estate Partners.

3 AUM of Hong Kong domiciled BMO Exchange Traded Funds.

BMO Global Asset Management is the brand name for various affiliated entities of BMO Financial Group that provide investment management and trust and custody services. Certain products and services offered under the brand name

BMO Global Asset Management are designed specifically for various categories of investors in a number of different countries and regions and may not be available to all investors. Products and services are only offered to such investors in those countries and regions in accordance with applicable laws and regulations. BMO Financial Group is a service mark of Bank of Montreal (BMO). The organisational diagram is for illustrative purposes only and (1) is only a representation of the capabilities and strategies of BMO Global Asset Management and (2) does not reflect actual legal entities or entity ownership. BMO Global Asset Management (Asia-Pacific) consists of BMO Global Asset Management (Asia) Limited. BMO Global Asset Management is a trading name of BMO Asset Management Limited, which is authorised and regulated by the Financial Conduct Authority, in the EU by BMO Asset Management Netherlands B.V., which is regulated by the Dutch Authority for the Financial Markets (AFM); and in Switzerland by BMO Global Asset Management (Swiss) GmbH, which is authorised and regulated by the Swiss Financial Market Supervisory Authority (FINMA).

Disclosure

Pyrford International Ltd claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Pyrford International Ltd has been independently verified for the period January 1, 1994 to September 30, 2018 by Grant Thornton UK LLP. The verification report is available upon request.

Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards.

Verification does not ensure the accuracy of any specific composite presentation.

Notes to the performance presentation

Pyrford International, a wholly owned subsidiary of the Bank of Montreal, is an investment management firm based in the United Kingdom providing international asset management services for its clients. Pyrford is part of BMO's Wealth Management group which provides wealth management services in North America, Middle East, UK, Asia, Australia and Europe. As at 31 December 2019 Pyrford International Ltd had total assets under management and administration and term investments of US\$11,985m. For the purpose of measuring and presenting investment performance, all discretionary fee paying accounts of Pyrford International Ltd are allocated to a composite and a complete list and description of the composites is available on request. Additional information regarding the firm's policies and procedures for calculating and reporting performance returns is available upon request.

The Pyrford International Ltd "International Equity (Base Currency US\$) composite" comprises all fully discretionary, international equity accounts with a market value greater than US\$10m, a base currency of US\$ and no hedging restrictions. The benchmark for the composite is the MSCI EAFE index. The composite was first created on July 1, 1996. On April 1, 2002 the composite construction criteria were redefined to allow the inclusion of pooled funds, taxable funds and funds of between US\$10 – 15 million on the basis that these do not materially impact the returns generated.

All returns are calculated in US\$ terms on a time-weighted basis. Effective May 1, 2013, portfolio returns are calculated daily. Prior to this date, portfolio returns were calculated monthly using the Modified Dietz method. Monthly composite returns are calculated by weighting each account's monthly return by its relative beginning market value.

Where there are more than four accounts in the composite over a full year, dispersion is measured as the asset weighted standard deviation of asset weighted portfolio returns of all accounts in the composite for the full year.

The three-year annualised standard deviation measures the variability of the composite returns over the preceding 36-month period.

The accounts in this composite are unleveraged and derivatives are used solely for currency hedging purposes.

As at 31 December 2019, 7.0% of the composite assets were invested in Malaysia, Thailand and Taiwan which are not included in the MSCI EAFE Index. Historically the composite has invested between 2.4% and 13.0% in these countries.

Performance results are presented gross of management and custodial fees, but net of transaction costs and before taxes (except for non-reclaimable withholding tax). The standard management fee schedule for segregated management is as follows: 0.70% per annum on the first US\$50 million; 0.50% on the next US\$50 million, and thereafter 0.35% per annum.

Net-of-fees performance has been calculated using the highest management fee of 0.70% per annum, as described in the firm's fee schedule shown above.

Returns will be reduced by advisory fees and other expenses, and the effect of these fees will compound over time. As a hypothetical example, if an account generated a 10% return each year for five years, it would have appreciated by 61%. If such an account paid a 1% annual fee, the appreciation on the fund would be 54%, or seven percentage points lower after five years.

There have been no significant events within the firm (such as ownership or personnel changes) which have materially impacted the historical investment performance.

All requests for further information should be sent to:

STAFF REPORT

DATE: March 11, 2020

TO: Sacramento Regional Transit Retirement Boards (ALL)

FROM: Jamie Adelman, AVP Finance and Treasury

SUBJ: RECEIVE AND FILE THE ASSET ALLOCATION REVIEW, ADJUST ASSET ALLOCATIONS TO DIRECT FUNDS TO REAL ESTATE INVESTMENTS, AND SELECT TWO FUND MANAGERS TO PARTICIPATE IN THE REAL ESTATE SECTOR (ALL). (ADELMAN)

RECOMMENDATION

Adopt the Attached Resolutions.

RECOMMENDED ACTION

1. Receive and File the Asset Allocation Review
2. Direct Staff to Amend the Statement of Investment Objectives and Policy Guidelines to Direct 10% of Investments to a New Real Estate Asset Class by either (A) Reducing Investments in the Fixed Income Asset Class by 10% or (b) Reducing the Asset Allocation Target for Fixed Income Investments by 7%, and Reducing the Asset Allocation Targets for Large Cap U.S. Equity Investments, Large Cap Non-U.S. Developed Equity Investments and Emerging Markets Equity Investments each by 1%
3.
 - A. Adopt Resolution 20-03-____, Directing Staff to Negotiate a Contract with Morgan Stanley to Provide Investment in the Prime Property Fund and Authorizing the Sacramento Regional Transit District General Manager/CEO to Execute Said Contract, in a Form Acceptable to Legal Counsel
 - B. Adopt Resolution 20-03-____, Directing Staff to Negotiate a Contract with Clarion Partners to Provide Investment in the Clarion Lion Properties Fund and Authorizing the Sacramento Regional Transit District General Manager/CEO to Execute Said Contract, in a Form Acceptable to Legal Counsel

FISCAL IMPACT

The fees associated with investments through two Real Estate fund managers, based on a total investment of approximately \$30 million, with a \$15 million allocation to each manager, is estimated to be as follows:

The base fee for the Morgan Stanley Prime Property Fund is 84 Basis Points (BPs) (estimated to be \$126,000). An additional performance fee, which is capped at 35 BPs, is calculated as 5% of the Net Asset Value x Comparable

Property Net Operating Income Growth divided by 12.

The base fee for the Clarion Lion Properties Fund is 110 BPs (estimated to be \$165,000). There are no performance fees.

DISCUSSION

The Retirement Plans' investment advisor, Callan LLC (Callan), is required to conduct annual Asset Allocation Studies to evaluate the Retirement Plans' investment goals, objectives and risk tolerance (risk versus return). Asset Allocation Studies are different from Asset/Liability Studies. Asset/Liability Studies take a more in-depth look at the Retirement Plans' investment strategy as well as their liabilities. Generally, it is recommended that an Asset/Liability study be conducted only once every three to five years, unless there is a significant change in market conditions or a significant change to the asset allocation mix. Callan last performed an Asset/Liability Study for the ATU, IBEW and Salaried Employees' Retirement Plans in 2019.

Over the past year, Callan provided three educational sessions to the Boards regarding diversifying the Asset Allocation and potentially investing in Real Estate, Private Equity/Multi-Asset Class, and/or Hedge Funds. The Boards provided direction to Staff and Callan, at the June 12, 2019 Quarterly Retirement Board meeting, to perform a search for potential Real Estate Investment Managers.

The Retirement Boards' Search Committee, supported by Anne Heaphy, Senior Vice President in Callan's Fund Sponsor Consulting Group, and Avery Robinson, Senior Vice President and Co-Manager of Callan's Real Assets Consulting Group, narrowed the selection of potential Real Estate Investment Managers down to three. At the February 26, 2020 Special Retirement Board meeting, the Boards heard presentations from the three potential Real Estate Investment Managers and requested staff to prepare for the Boards to enter into contracts with Morgan Stanley for its Prime Property Fund, and with Clarion Partners for its Clarion Lion Properties Fund.

Callan will present the 2020 Asset Allocation Review, provided in Attachment #1, to assist the Boards with determining the total allocation that will be made to Real Estate, and from which current asset classes the new allocation will be funded. One option for establishing a 10% target allocation for the Real Estate asset class is to fund the new asset class entirely from the Plans' Fixed Income asset class. Another option could be to reduce of the current allocation to Fixed Income by 7%, and to reduce be 1% each the current allocations to the following three asset classes: Large Cap U.S. Equity Investments, Large Cap Non-U.S. Developed Equity Investments, and Emerging Markets. Based on the Boards' direction on this issue, Callan and staff will revise the Plans' Statement of Investment Objectives and Policy Guidelines for approval at the Boards' June meeting.

RESOLUTION NO. _____

Adopted by the Board of Directors for the Retirement Plan for Sacramento Regional Transit District Employees Who Are Members of the ATU Local Union 256 on this date:

March 11, 2020

RECEIVE AND FILE THE ASSET ALLOCATION REVIEW, ADJUST ASSET ALLOCATIONS TO DIRECT FUNDS TO REAL ESTATE INVESTMENTS, AND SELECT TWO FUND MANAGERS TO PARTICIPATE IN THE REAL ESTATE SECTOR (ALL). (ADELMAN)

BE IT HEREBY RESOLVED BY THE RETIREMENT BOARD OF DIRECTORS FOR THE RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES WHO ARE MEMBERS OF THE ATU LOCAL UNION 256 AS FOLLOWS:

THAT, the Retirement Board hereby authorizes the Sacramento Regional Transit District General Manager/CEO to execute a contract, in a form acceptable to the Board's legal counsel, for Morgan Stanley to invest 5% of the Retirement Plan's investments in the Morgan Stanley Prime Property Fund, and

THAT the Retirement Board hereby authorizes the Sacramento Regional Transit District General Manager/CEO to execute a contract, in a form acceptable to the Board's legal counsel, for Clarion Partners to invest 5% of the Retirement Plan's investments in the Clarion Lion Properties Fund.

2020 Asset Allocation Review

Gary Chang, CFA
Capital Markets Research

Anne Heaphy
Fund Sponsor Consulting

Jay Kloepfer
Capital Markets Research

Uvan Tseng, CFA
Fund Sponsor Consulting

Goal of the Study

Callan conducted an asset-liability study for SacRT in 2019. The goal of a asset-liability study is to establish a long-term strategic asset allocation target for Sacramento Regional Transit District pension fund (the “Plan”).

Investment solution is an optimal balance between sustainable funded status volatility and minimization of costs over the long run.

Sacramento Regional Transit District (“SacRT”) needs a tilt toward growth assets to serve the goal of funding the plan and the current policy target contains such a tilt.

The current target is diversified across stocks and bonds and it would be reasonable to retain it as the policy target going forward.

SacRT can also consider further diversification, and looked at the potential to add new asset classes: real estate, private equity and hedge funds. The Plan board found real estate appealing and discussed adopting a 10% allocation.

- Callan believes real estate offers a potentially attractive source of return that would complement and diversify the existing portfolio.
- There are cost and implementation considerations to take into account.
 - Real estate features higher fees than many public stock and bond strategies.
 - Source of funding for real estate can affect the return/risk profile for the total portfolio. The more real estate from fixed income, the greater the expected return and risk for the portfolio.

The liability and demographic profiles suggest SacRT has a sufficiently long time horizon in which to assume investment risk.

Agenda

Model portfolio with 2020-2029 capital market projections

Present Alternative Asset Mixes

Review asset-liability results from 2019 study

- Appropriate risk tolerance for the Plan
- Consider further diversification with the addition of real estate

Propose candidate asset allocation mixes

Illustrate a range of potential outcomes

Objective

Confirm the appropriate asset allocation

Where Does Asset Allocation Fit In?

We evaluate the interaction of the three key policies that govern a pension plan with the goal of establishing the best investment policy

Investment Policy

- How will the assets supporting the benefits be invested?
- What risk and return objectives?
- How to manage cash flows?

Benefits Policy

- What type/kind of benefits?
- What level of benefit?
- When and to whom are they payable?

Funding / Accounting Policy

- How will the benefits be paid for (funded)?
- What actuarial discount rate?
- How will deficits be paid for?
- How will costs be recognized?

Today's Focus is on Examining the Investment Policy

Overview of Investment Goals

The investment policy, or asset allocation, is one of the three key components of a benefit plan (along with contribution and benefit policy).

Asset allocation is the process of determining the optimal allocation of a portfolio among broad asset classes based on several factors:

- Capital market expectations
- Cash flow considerations
- Recent experience
- Investment goals and objectives
- Risk tolerance
- Time horizon

A well engineered asset allocation considers:

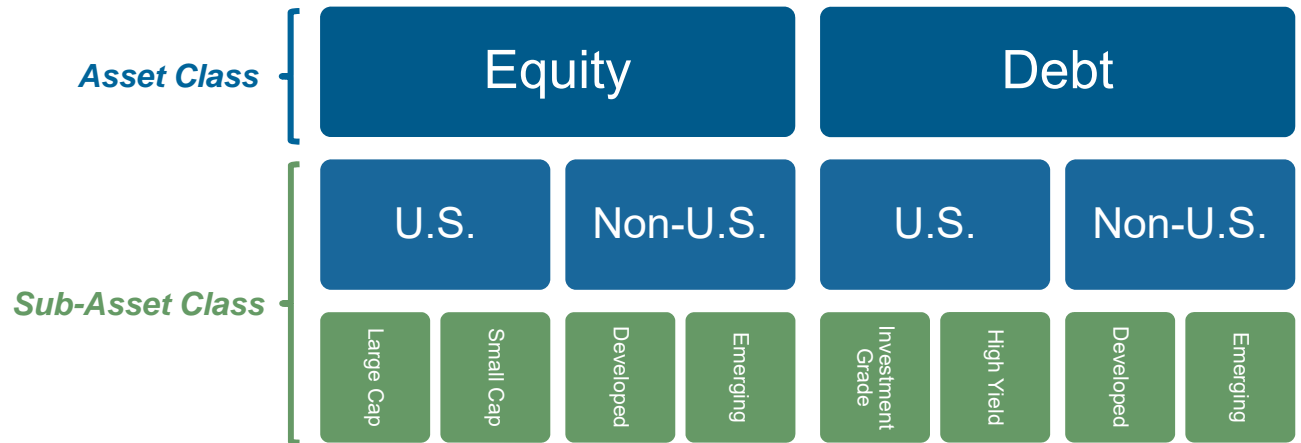

- All appropriate asset classes for inclusion
- Liquidity needs, asset class limitations, implementation challenges, administrative and legal burdens, size or capacity constraints
- Rebalancing discipline

The Focus is on Broad Asset Classes

Breakdowns between investment styles within asset classes (growth vs. value, large cap vs. small cap) are best addressed in a manager structure analysis.

Primary asset classes and important sub-asset classes include:

- U.S. Stocks
- U.S. Bonds
- Non-U.S. Stocks
- Non-U.S. Bonds
- Real Estate
- Alternative Investments
 - Private equity
 - Absolute return
- Cash

Callan Capital Market Process and Philosophy

Underlying beliefs guide the development of the projections:

- An initial bias toward long-run averages
- A conservative bias
- An awareness of risk premiums
- A presumption that markets ultimately clear and are rational

Reflect our belief that long-term equilibrium relationships between the capital markets and lasting trends in global economic growth are key drivers to setting capital market expectations.

Long-term compensated risk premiums represent “beta”—exposure to each broad market, whether traditional or “exotic,” with limited dependence on successful realization of alpha.

The projection process is built around several key building blocks:

- Advanced modeling at the individual asset class level (e.g., a detailed bond model, an equity model)
- A path for interest rates and inflation
- A cohesive economic outlook
- A framework that encompasses Callan beliefs about the long-term operation and efficiencies of the capital markets.

2020 - 2029 Return and Risk Assumptions

Asset Class	Index	Expected Return*	Standard Deviation
Equities			
Broad U.S. Equity	Russell 3000	7.15%	18.10%
Large Cap U.S. Equity	S&P 500	7.00%	17.70%
Small Cap U.S. Equity	Russell 2500	7.25%	21.20%
Global ex-U.S. Equity	MSCI ACWI ex USA	7.25%	20.50%
Developed ex-U.S. Equity	MSCI World ex USA	7.00%	19.70%
Emerging Market Equity	MSCI Emerging Markets	7.25%	25.70%
Fixed Income			
Short Duration Govt/Credit	Bloomberg Barclays 1-3 Yr G/C	2.70%	2.10%
Core U.S. Fixed	Bloomberg Barclays Aggregate	2.75%	3.75%
Long Government/Credit	Bloomberg Barclays Long G/C	2.75%	10.60%
TIPS	Bloomberg Barclays TIPS	2.40%	5.05%
High Yield	Bloomberg Barclays High Yield	4.65%	10.25%
Global ex-U.S. Fixed	Bloomberg Barclays Gbl Agg xUSD	0.90%	9.20%
Emerging Market Sovereign Debt	EMBI Global Diversified	4.35%	9.50%
Other			
Core Real Estate	NCREIF ODCE	6.25%	14.00%
Private Equity	Cambridge Private Equity	8.50%	27.80%
Hedge Funds	Callan Hedge FoF Database	5.00%	8.70%
Commodities	Bloomberg Commodity	2.75%	18.00%
Cash Equivalents	90-Day T-Bill	2.25%	0.90%
Inflation	CPI-U	2.25%	1.50%

* 10 year annualized return

Capital market expectations represent passive exposure (beta only) with the exception of Real Estate, Private Equity, and Hedge Funds.

All return expectations are net of fees.

Asset classes modeled in the 2019 asset-liability study are highlighted in green.

Policy Target Allocation – 2020 Capital Market Return Assumptions

Asset Class	Policy Target
Global Equity	65%
Large Cap U.S. Equity	32%
Small Cap U.S. Equity	8%
LC Non-U.S. Developed Equity	14%
SC Non-U.S. Developed Equity	5%
Emerging Markets Equity	6%
Fixed Income	35%
U.S. Fixed Income	35%
Alternative Assets	0%
Real Estate	0%
2020 Expected Geometric Return	6.14%
2020 Expected Standard Deviation	11.69%
2019 Expected Geometric Return	6.48%
2019 Expected Standard Deviation	11.89%

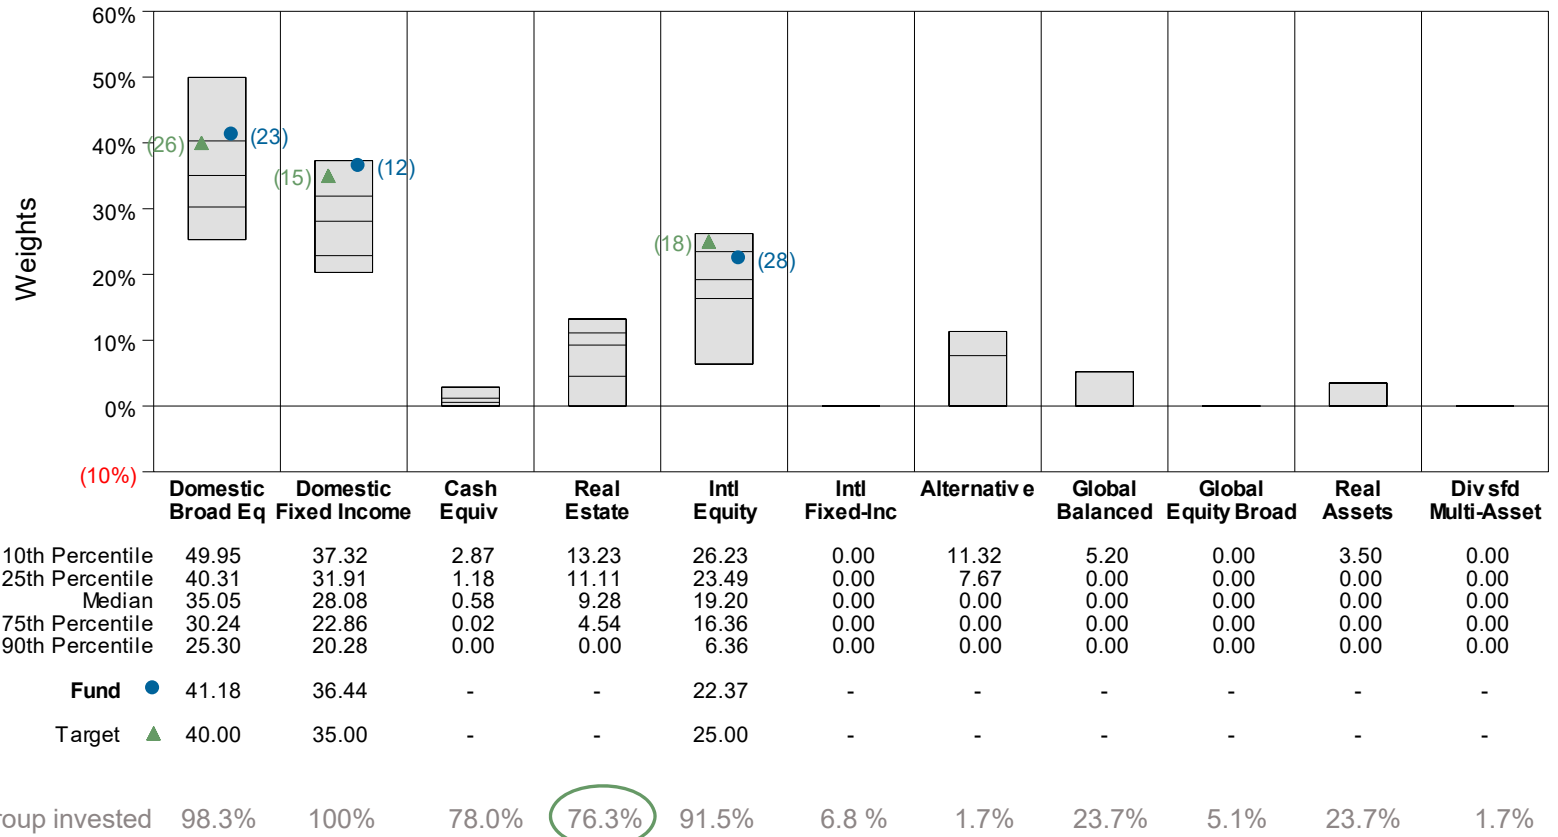

SacRT employs an actuarial discount rate of 7.25% which is based on a 3.0% inflation expectation while Callan uses a 2.25% inflation expectation.

Callan expects lower inflation to flow through the liabilities and result in a lower liability growth rate of 6.90% (vs. the actuarial discount rate of 7.25%).

Expected returns assume passive implementation; however, roughly 80% of SacRT's assets are actively managed.

Peer Group Comparisons

Asset Class Weights vs Callan Public Fund Spons- Mid (100M-1B)

Relative to a peer group of other public funds, the target policy is relatively conservative with a high allocation to fixed income.

Real estate is the alternative asset class most likely to be employed by peers (76% are in invested in real estate).

- Peer groups do not take into account differences in risk tolerances

Peer Real Estate Allocations*

CalPERS

Total Fund Size: \$400 billion

Metropolitan Atlanta Rapid Transit Authority (MARTA)

Total Fund Size: \$431 million
Real Estate: 5%
Fixed Income: 38%

- A 10% allocation to real estate would be in line with the real estate allocations of other local public funds and transit agencies. Reducing fixed income from the current allocation of 35% would also be reasonable.

*data for non-Callan clients based on publicly available information and may not be most current data.

Alternative Asset Mixes

Asset Class	Policy Target	Real Estate Mixes	
		RE 100% Fix	RE 70/30
Global Equity	65%	65%	62%
Large Cap U.S. Equity	32%	32%	31%
Small Cap U.S. Equity	8%	8%	8%
LC Non-U.S. Developed Equity	14%	14%	13%
SC Non-U.S. Developed Equity	5%	5%	5%
Emerging Markets Equity	6%	6%	5%
Fixed Income	35%	25%	28%
U.S. Fixed Income	35%	25%	28%
Alternative Assets	0%	10%	10%
Real Estate	0%	10%	10%
2020 Expected Geometric Return	6.14%	6.45%	6.33%
2020 Expected Standard Deviation	11.69%	12.75%	12.17%

The optimal mixes add real estate at 10% of the portfolio and vary by the source of funding for real estate:

- RE 100% Fix = 100% from fixed income
- RE 70/30 = 70% from fixed income, 30% from equity

Real estate return and risk are greater than those for fixed income; the more real estate is funded from fixed income, the more the total portfolio return and risk increase.

The Efficient Frontier

The efficient frontier represents mixes which optimally trade off between expected return and expected risk; the numbered dots represent optimal mixes without real estate, separated by 5% increments to fixed income.

The upper line represents the efficient frontier including a 10% allocation to real estate. Return for a given level of risk is higher; risk for a given level of return is lower.

Mixes on the Real Estate line represent alternatives to funding real estate from equity and fixed income, as depicted on the previous slide. The more real estate is funded from fixed income, the more the total portfolio return and risk increase.

Probability of Achieving a 7.25% or 6.90% Return

3rd Percentile	13.6%	14.5%	14.0%
25th Percentile	8.7%	9.3%	9.0%
Median	6.1%	6.5%	6.3%
75th Percentile	3.6%	3.6%	3.6%
98th Percentile	(1.4%)	(1.8%)	(1.6%)
Prob > 7.25%	38%	42%	41%
Prob > 6.90%	42%	45%	44%

The above chart illustrates the probability of achieving 7.25% and 6.90% return over the next 10 years.

The more real estate is funded from fixed income, the more the total portfolio return and risk increase. When Real estate is funded 100% from fixed income, the expected return rises from 6.1% to 6.5%, and the range of results widens. The worse case result (98th percentile) has a greater potential loss than the other portfolios.

Callan

Liability Modeling

Build Actuarial Liability Model

For purposes of asset-liability modeling, Callan built an actuarial liability model based on the Plan's specific liabilities which match Cheiron's actuarial accrued liability within +/-3%.

- Results are then scaled to match the actuarial report exactly.

Liability model is based on the 7/1/2018 actuarial valuation report.

Other assumptions:

- Open to new entrants
- 0% workforce growth
- UAL amortized by 2032 (14 years)

July 1, 2018 Actuarial Valuation	All Plans
Actuarial Accrued Liability	\$398.9 mm
Market Value of Assets	\$283.5 mm
Actuarial Value of Assets	\$288.0 mm
Market Funded Status (MVA/AL)	71%
Actuarial Funded Status (AVA/AL)	72%
Employer Contribution (\$)	\$20.8mm
Employer Contribution (%)	29.7%

Key Assumptions	Actuarial Assumption	Callan 10-year Expectation
Investment Return	7.25%	6.50%
Price Inflation	3.0%	2.25%

Demographic Projection

Plan membership is gradually increasing.

- Total population increases from 2,000 to 2,300
- Active population is assumed to hold while inactive population is growing over time
- Average age of active members remains around 50

Expected Funded Status Projections

A return gap (6.5% vs 7.25%) results in a lower funded status at the end of 10 years.

- The return gap is offset to some extent by projecting liabilities at lower price inflation

This study will introduce annual return volatility.

Funded status is projected to reach 87% at the end of 10 years.

Liquidity Needs

Net Outflow (% of Market Assets)

Net Outflow = Benefit Payments – Funding Contributions (Employer + Employee), taken as a percentage of the market value of assets at the beginning of the year.

Liquidity needs help define the appropriate time horizon for plan investments and shape the ability of the Plan to commit to illiquid asset classes – liquidity needs are projected to be manageable.

Under the current funding policy, liquidity needs are low.

Callan

Observations and Recommendations

Summary of Results and Observations

The liability and demographic profiles suggest SacRT has a sufficiently long time horizon in which to assume investment risk.

Liquidity needs are manageable and low

- Net outflows are less than 5% over much of the next 10 years
- No illiquid asset classes in the current target

Liabilities are expected to grow at a moderate pace

- Plan is open and accruing benefits

After taking into account different inflation expectations, Callan models the liability return as 6.90%, which is slightly less than the 7.25% actuarial discount rate.

- A return objective of 6.90% is consistent with Callan's capital market assumptions with embedded price inflation of 2.25%
- Higher inflation than expected (2.25%) should result in higher nominal returns and higher liabilities over the long run

The risk/return stance of the current target appears to be sufficient to meet the very long-term goals and funding needs for the plan.

Examining alternative asset classes, SacRT focused on adding real estate as a diversifier to stocks and bonds, at a level of 10% of the total portfolio. Today's analysis shows the potential benefit to adding real estate (greater return for a given level of risk), and shows the return and risk implications for different sources of funding real estate.

Conclusion

Following last year's asset/liability study and subsequent educational sessions, SacRT has decided to further diversify its portfolio beyond stocks and bonds and into real estate.

Callan believes real estate offers an attractive source of return that would complement and diversify the existing portfolio. Of course, there are cost and implementation considerations to take into account.

Additionally, the more real estate is funded from fixed income, the more the total portfolio return and risk increase.

Other considerations:

- Real estate is a diversifier to public equities and fixed income
- Lagged valuation process helps smooth out volatility
- Intermediate to long term inflation hedge
- Potential to add active management premium
- Many similarly sized public funds (~76%) have an allocation to real estate
- Real estate has both equity and fixed income components so it is consistent to fund the allocation from both sources

STAFF REPORT

DATE: March 11, 2020

TO: Sacramento Regional Transit Retirement Boards (ALL)

FROM: Jamie Adelman, AVP Finance and Treasury

SUBJ: AUTHORIZING SACRAMENTO REGIONAL TRANSIT DISTRICT GENERAL MANAGER/CEO TO AMEND THE RETIREMENT BOARDS' MOU WITH SACOG FOR FUNDING AND PERFORMANCE OF ANNUAL AUDITS BY INCREASING THE NOT-TO-EXCEED VALUE AND EXTENDING THE TERM OF THE AGREEMENT (ALL). (ADELMAN)

RECOMMENDATION

Adopt the Attached Resolution.

RECOMMENDED ACTION

Adopt Resolution No. 20-03-____, Authorizing the Sacramento Regional Transit District General Manager/CEO to Amend the Retirement Boards' Memorandum of Understanding (MOU) with Sacramento Area Council of Governments (SACOG) for Funding and Performance of Annual Audits by Increasing the Not-to-Exceed Value and Extending the Term of the Agreement.

FISCAL IMPACT

The annual cost to the Retirement Plans is not yet known as of publication of this Staff Report. Staff will provide estimates of annual audit costs for the amended term of the MOU at the March 11, 2020 Quarterly Retirement Boards' meeting.

DISCUSSION

As the Regional Transportation Planning Agency for the Sacramento area, SACOG receives and distributes Transportation Development Act (TDA) funding for the region. As part of the annual requirements for receiving TDA funding, SACOG enters into a contract with an independent auditor to conduct audits for all of its TDA claimants. Historically, SACOG has procured auditors and paid the audit fees for all transit operators in the region, including Sacramento Regional Transit District (RT), but SACOG does not pay the audit fees for the Retirement Plans' pension funds. Of note, RT is the only transit operator in the Sacramento region that has self-managed pension plans, as the other operators' employees and retirees are members of CalPERS.

The Retirement Boards and SACOG entered into the MOU in 2015. The MOU provides for the Retirement Boards and SACOG to jointly procure audit services but for the Retirement Plans to pay their own audit fees. The MOU covered services through the Fiscal Year (FY) 2019 audit. SACOG is currently undergoing the procurement process

to contract with auditors for FY2020 through 2022, and potential option years through FY 2024.

Staff has determined that using the same auditors for the Retirement Plans as for RT is more efficient than using separate auditors, in large part because the Retirement Plans' funds are presented as Fiduciary Funds in RT's Comprehensive Annual Financial Report (CAFR). Engaging separate auditors to perform the Retirement Plan audits likely would increase the cost to the Retirement Plans.

The audit fees for the Retirement Plans were \$25,280 for the FY 2019 audit. It is common for audit firms to apply a 3%-5% increase in annual fees, year over year. Please note that these fees are split evenly between the three plans (ATU, IBEW, and Salaried).

Staff recommends that the Boards authorize execution of an amendment to the MOU, in a form approved by legal counsel, to continue to provide the Retirement Plans with access to SACOG and RT's auditor, at the Retirement Plans' cost, through FY 2025, upon staff's confirmation that the audit costs under SACOG's new audit contract will continue to be cost-effective for the Retirement Plans. Staff will provide the final contract amount to the Retirement Boards at their June 10, 2020, meeting.

RESOLUTION NO. _____

Adopted by the Board of Directors for the Retirement Plan for Sacramento Regional Transit District Employees Who Are Members of the ATU Local Union 256 on this date:

March 11, 2020

AUTHORIZE EXECUTION OF AMENDMENT TO THE MEMORANDUM OF UNDERSTANDING WITH SACRAMENTO COUNTY AREA COUNCIL OF GOVERNMENTS FOR FUNDING AND PERFORMANCE OF ANNUAL AUDITS OF THE RETIREMENT PLAN BY INCREASING THE NOT-TO-EXCEED VALUE AND EXTENDING THE TERM OF THE MOU

BE IT HEREBY RESOLVED BY THE RETIREMENT BOARD OF DIRECTORS FOR THE RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES WHO ARE MEMBERS OF THE ATU LOCAL UNION 256 AS FOLLOWS:

THAT, the Retirement Board hereby authorizes the Sacramento Regional Transit District General Manager/CEO to execute an amendment, in a form acceptable to the Board's legal counsel, to a Memorandum of Understanding (MOU) with the Sacramento Area Council of Governments (SACOG) for performance of annual audits of the Retirement Plan by the auditor selected by SACOG for Sacramento Regional Transit District's annual financial audits to:

1. Extend the term of the MOU to cover annual audits of the Retirement Plan under the contract resulting from the pending SACOG procurement for financial audits covering Fiscal Years (FY) 2020 through 2022, with options through the FY 2024 audits, and
2. Increase the not-to-exceed value of the MOU to cover the Retirement Plan's annual audit costs, and

THAT, exercise of this delegation of authority to the Sacramento Regional Transit District General Manager/CEO is conditioned upon Retirement Plan Staff's confirmation that the audit costs under SACOG's audit procurement will be continue to be cost-effective for the Retirement Plans.

RESOLUTION NO. _____

Adopted by the Board of Directors for the Retirement Plan for Sacramento Regional Transit District Employees Who Are Members of the MCEG on this date:

March 11, 2020

AUTHORIZE EXECUTION OF AMENDMENT TO THE MEMORANDUM OF UNDERSTANDING WITH SACRAMENTO COUNTY AREA COUNCIL OF GOVERNMENTS FOR FUNDING AND PERFORMANCE OF ANNUAL AUDITS OF THE RETIREMENT PLAN BY INCREASING THE NOT-TO-EXCEED VALUE AND EXTENDING THE TERM OF THE MOU

BE IT HEREBY RESOLVED BY THE RETIREMENT BOARD OF DIRECTORS FOR THE RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES WHO ARE MEMBERS OF THE MCEG AS FOLLOWS:

THAT, the Retirement Board hereby authorizes the Sacramento Regional Transit District General Manager/CEO to execute an amendment, in a form acceptable to the Board's legal counsel, to a Memorandum of Understanding (MOU) with the Sacramento Area Council of Governments (SACOG) for performance of annual audits of the Retirement Plan by the auditor selected by SACOG for Sacramento Regional Transit District's annual financial audits to:

1. Extend the term of the MOU to cover annual audits of the Retirement Plan under the contract resulting from the pending SACOG procurement for financial audits covering Fiscal Years (FY) 2020 through 2022, with options through the FY 2024 audits, and
2. Increase the not-to-exceed value of the MOU to cover the Retirement Plan's annual audit costs, and

THAT, exercise of this delegation of authority to the Sacramento Regional Transit District General Manager/CEO is conditioned upon Retirement Plan Staff's confirmation that the audit costs under SACOG's audit procurement will be continue to be cost-effective for the Retirement Plans.
